

# Bioidentify.

Introducing the MISSION®  
3'UTR Lenti GoClone™.

Take the guess work out of  
your *miRNA* target validation.

You can now validate the 3'UTR targets of your favorite miRNA with a functional, versatile and quantitative assay. Sigma® Life Science and SwitchGear Genomics™, have partnered to offer you a collection of lentiviral constructs, each with a unique human 3'UTR cloned downstream of an optimized *Renilla* luciferase. Identify and validate the 3'UTR targets of your favorite miRNA with the powerful new MISSION 3'UTR Lenti GoClone.
