A pair of chemical compounds (light blue and purple) target wild-type and mutant forms of the Plasmodium falciparum chloroquine resistance transporter, which mediates the parasite’s (yellow) resistance to the widely used antimalarial drug. Using high-throughput chemical and genetic analyses, Yuan et al. identify potential new antimalarial drugs that could be used in combination to suppress the development of drug resistance. See page 724.

RESEARCH ARTICLES

719 Glacial-Interglacial Indian Summer Monsoon Dynamics
Z. An et al.
Indian summer monsoon changes during the Pleistocene were influenced by dynamic effects originating in both hemispheres.

755 High-Speed Atomic Force Microscopy Reveals Rotary Catalysis of Rotorless F1-ATPase
T. Uchihashi et al.
Intrinsic cooperativity drives cyclic propagation of conformational states in the stator ring of an adenosine triphosphate–driven rotary motor.

758 Structural Basis for Tail-Anchored Membrane Protein Biogenesis by the Get3-Receptor Complex
S. Stefer et al.
Docking of cytoplasmic and membrane receptors facilitates conformational changes that drive protein insertion.

REPORTS

729 Nonreciprocal Light Propagation in a Silicon Photonic Circuit
L. Feng et al.
An engineered metallic-silicon waveguide allows for direction-dependent light propagation.

733 A Synthetic Model of the MnCa Subsite of the Oxygen-Evolving Complex in Photosystem II
J. S. Kanady et al.
A model compound sheds light on the puzzling role of calcium in the metal cluster that oxidizes water during photosynthesis.

736 Spectroscopic Observation of Dual Catalytic Sites During Oxidation of CO on a Au/TiO2 Catalyst
I. X. Green et al.
The low-temperature oxidation of carbon monoxide proceeds initially with oxygen molecules that bridge titanium and gold sites.

740 Seasonal Flows on Warm Martian Slopes
A. S. McEwen et al.
Rare meter-scale slope features on Mars might be explained by the transient flow of liquid salty water.

743 Reduced Interannual Rainfall Variability in East Africa During the Last Ice Age
C. Wolff et al.
Extreme rainfall was weaker and less frequent in East Africa during the last ice age.

747 A 10,000-Year Record of Arctic Ocean Sea-Ice Variability—View from the Beach
S. Funder et al.
Sea-ice coverage near northern Greenland and in the western Arctic Ocean varied in opposition over much of the Holocene.
Aene May Explain 'Elephant Man' Disorder

Spinal fusion surgery to 'Living disk' brown Disks May Cure

bryogenesis is implicated in the growth of common human brain tumor.

Mutations in CIC and FUBP1 Contribute to Human Oligodendroglioma

A gene originally studied for its role in fruit fly embryogenesis is implicated in the growth of a common human brain tumor.

Tet-Mediated Formation of 5-Carboxylycysteine and Its Excision by TDG in Mammalian DNA

Y.-F. He et al.

Evidence for a possible route for DNA demethylation in animals is suggested.

Control of Local Protein Synthesis and Initial Events in Myelination by Action Potentials

H. Wake et al.

Axons signal through both glutamate and adenosine triphosphate release to regulate their insulating wraps.

Vacuum-Induced Transparency

H. Tanji-Suzuki et al.

The transmission of light through an atomic gas can be controlled by manipulating the confining cavity.

Single-Shot Correlations and Two-Qubit Gate of Solid-State Spins

K. C. Nowack et al.

Independent readout of two single-spin qubits in quantum dots is achieved in an all-electrical setup.
