Eppendorf & Science Prize for Neurobiology

Congratulations to Dr. Tiago Branco on winning the 2011 Eppendorf & Science Prize for his studies on how dendrites discriminate temporal input sequences and apply different integration rules depending on input location. The results of Dr. Branco's research provide insight on how the brain performs computations, and suggest that even single neurons can solve complex computational tasks.

You could be the 11th winner of this award.

The annual Eppendorf & Science Prize for Neurobiology honors young scientists for their outstanding contributions to neurobiological research based on methods of molecular and cell biology. The winner and finalists are selected by a committee of independent scientists, chaired by *Science's* Senior Editor, Dr. Peter Stern.

To be eligible, you must be 35 years of age or younger. If you're selected as this year's winner, you will receive US\$ 25,000, have your work published in *Science* and be invited to visit Eppendorf in Hamburg, Germany. Past winners and finalists have come from as far a field as China, Chile, India and New Zealand.

Yes, it can happen to you. Enter your research now!
