

Enhanced Biological Safety for Flow Cytometry

Innovative solutions that connect with your needs.

Get connected to enhanced biological safety.

Helping all people live healthy lives

Biological safety in flow cytometry is a growing concern for all labs and is another reason you can depend on BD Biosciences to bring together innovative solutions across the spectrum of your needs.

The BioProtect IV from The Baker Company is a biosafety cabinet designed specifically for the BD FACSAria™ product family. Baker has verified that it meets standards for both a Class II Type A2 biosafety cabinet and the National Sanitation Foundation Internal Standard 49.

This enhanced biological safety solution meets a high standard of safety, simplifies cleaning and maintenance, and provides an ergonomic work environment.

Find out how BD Biosciences is addressing biosafety in flow cytometry by delivering interconnected innovations in instrumentation, services, research tools, and partnerships worldwide to help simplify your workflow and protect the integrity of your results.
