COVER
False-colored transmission electron microscopy image of avian H5N1 influenza virus isolated in Hong Kong (field-of-view width ~260 nm). A highly pathogenic influenza subtype is currently pandemic among the world’s wild birds, with serious outbreaks occurring in domestic poultry. Concern about the possibility of the virus evolving into a human pandemic threat has prompted controversial research on mutations that facilitate airborne infection between mammals. See the special section beginning on page 1521 for details of the scientific investigations and policy.

CONTENTS

1518  Carbon from Tropical Deforestation
  D. J. Zarin
  >> Report p. 1573

1519  Wnt Regulates TERT—Putting the Horse Before the Cart
  C. W. Greider
  >> Research Article p. 1549

RESEARCH ARTICLE

1549  Wnt/β-Catenin Signaling Regulates Telomerase in Stem Cells and Cancer Cells
  K. Hoffmeyer et al.
  A molecular link exists between two key regulators of the "undifferentiated" state of proliferative cells.
  >> Perspective p. 1519

REPORTS

1554  A Sharp Peak of the Zero-Temperature Penetration Depth at Optimal Composition in BaFe$_2$(As$_{1-x}$P$_x$)$_2$
  K. Hashimoto et al.
  A quantum critical point may be lurking inside the superconducting dome of a pnictide series.
  >> Perspective p. 1510

1557  Electromechanical Properties of Graphene Drumheads
  N. N. Klimov et al.
  Mechanical straining of suspended graphene films leads to confinement of charge carriers into quantum dots.

1561  Electrical Wind Force–Driven and Dislocation-Templated Amorphization in Phase-Change Nanowires
  S.-W. Nam et al.
  The transition from crystalline to amorphous states in a phase-change material may not require a melting process.

1566  Breaking the Speed Limits of Phase-Change Memory
  D. Loke et al.
  A constant applied voltage causes preordering and accelerates phase changes in Ge$_2$Sb$_2$Te$_5$, leading to faster switching.
  >> Perspective p. 1515

1570  Roton-Type Mode Softening in a Quantum Gas with Cavity-Mediated Long-Range Interactions
  R. Mottl et al.
  Low-energy excitations of the type present in superfluid helium are observed in a cold gas of rubidium atoms.

1573  Baseline Map of Carbon Emissions from Deforestation in Tropical Regions
  N. L. Harris et al.
  Tropical deforestation and degradation across three continents led to ~0.8 petagrams of yearly carbon emissions from 2000 to 2005.
  >> Perspective p. 1518

1576  Endophytic Insect-Parasitic Fungi Translocate Nitrogen Directly from Insects to Plants
  S. W. Behie et al.
  A fungal plant symbiont also consumes insects in surrounding soil and transfers animal nitrogen to the plant's roots.

1578  The Dorsal Aorta Initiates a Molecular Cascade That Instructs Sympatho-Adrenal Specification
  D. Saito et al.
  Morphogenetic proteins provided by the dorsal aorta control early and late processes in neurovascular development.

1581  Membrane Fusion Intermediates via Directional and Full Assembly of the SNARE Complex
  J. M. Hernandez et al.
  During vesicle membrane fusion, straining of lipids at the edges of an extended contact zone may initiate fusion.

1585  The Fission Yeast FANCM Ortholog Directs Non-Crossover Recombination During Meiosis
  A. Lorenz et al.

1588  FANCM Limits Meiotic Crossovers
  W. Crismani et al.
  A homolog of a human Fanconi anemia complementation group protein is involved in controlling crossing over during meiosis.

1590  Septin-Mediated Plant Cell Invasion by the Rice Blast Fungus, Magnaporthe oryzae
  Y. F. Dagdas et al.
  A plant pathogen mechanically ruptures cell walls in rice leaves to enter the plant cells and initiate infection.

1595  The lac Repressor Displays Facilitated Diffusion in Living Cells
  P. Hammar et al.
  The lac repressor slides along DNA in living cells, frequently passing its operator before binding.
