

MPC-200 Multi-manipulator system

- Versatile:** User friendly interface controls up to two manipulators with one controller. Select components to tailor a system to fit your needs.
- Expandable:** Daisy chain a second controller and operate up to four manipulators with one input device.
- Stable:** Stepper motors and cross-rolled bearings guarantee reliable, drift-free stability.
- Doubly Quiet:** Linear stepper-motor drive reduces electrical noise. Thermostatically-controlled cooling fans barely whisper.

Make the right move!

RNAscope®

in situ hybridization.
easy. powerful.

visualize
single-copy RNA expression

- Biomarker Analysis
- Target ID & Validation
- Molecular Pathology
- Companion Dx
- Validate IHC Results
- Non-coding RNA
- Stem Cell Research
- Tumor Heterogeneity
- Rare-cell Analysis
- Exquisite sensitivity & specificity
- Optimized for archival FFPE tissue
- Easy 7-hour IHC-like workflow
- Quantifiable and automatable
- New assays in < 3 weeks
- Guaranteed assay performance

AAAS is here – connecting government to the scientific community.

As a part of its efforts to introduce fully open government, the White House is reaching out to the scientific community for a conversation on America's national scientific and technological priorities. To enable this dialogue, AAAS launched Expert Labs, directed by blogger and tech guru Anil Dash. Expert Labs is building online tools that allow government agencies to ask questions of the scientific community and then sort and rank the answers.

As a AAAS member, your dues support our efforts to help government base policy on direct feedback from the scientific community. If you are not already a member, join us. Together we can make a difference.
