COVER
Illustration of the black hole in Cygnus X-1, a binary star system 6000 light-years away. A disk of stellar material feeds this black hole, which is 15 times as massive as the Sun but less than 60 kilometers across. As it falls toward the black hole, some of the material gets expelled in two opposite jets. A section highlighting recent research on black holes begins on page 535. For the story behind the cover, go to http://scim.ag/cov6094.

502  This Week in Science
504  Editors’ Choice
505  Science Staff
603  New Products
604  Science Careers
REVIEW
549  Transformation Optics and Subwavelength Control of Light
J. B. Pendry et al.

BREVIA
553  Cartwheel Architecture of Trichonympha Basal Body
P. Guichard et al.
Electron microscopy provides a close-up view of the ninefold symmetric stacked rings at the base of cilia and flagella.

REPORTS
554  Radio Detections During Two State Transitions of the Intermediate-Mass Black Hole HLX-1
N. Webb et al.
Observations of a candidate intermediate-mass black hole support the scale invariance of jets in black holes.

556  Kepler-36: A Pair of Planets with Neighboring Orbits and Dissimilar Densities
J. A. Carter et al.
The Kepler spacecraft detected a super-Earth and a Neptune-like planet in very tightly spaced orbits around the same star.

559  Non-Centrosymmetric Cylindrical Micelles by Unidirectional Growth
P. A. Rupar et al.
A capping approach is used to create asymmetrical block copolymer micelles through self-assembly.

563  A Reversible and Higher-Rate Li-O₂ Battery
Z. Peng et al.
A viable lithium-oxygen battery is demonstrated using dimethyl sulfoxide electrolyte and a porous gold cathode.

566  Aerosols from Overseas Rival Domestic Emissions over North America
H. Yu et al.
Roughly half of all particulate matter found in the air above North America originates from sources overseas.

569  Aerial Photographs Reveal Late-20th-Century Dynamic Ice Loss in Northwestern Greenland
K. H. Kjær et al.
Archived photographs extending back to the mid-1980s help show the role of dynamic thinning in ice mass loss from Greenland.

574  Function, Targets, and Evolution of Caenorhabditis elegans piRNAs
M. P. Bagijn et al.
Piwi-bound piRNAs recruit endogenous small interfering RNAs to silence mobile genetic elements.

578  Cuckoos Combat Socially Transmitted Defenses of Reed Warbler Hosts with a Plumage Polymorphism
R. Thorogood and N. B. Davies
Parasitic cuckoos sporting new colors flourish after their warbler hosts learn to defend against the mainstream fashion.

580  Unraveling the Life History of Successful Invaders
D. Sol et al.
Allocating resources to long-lived adults is one means by which birds succeed in new niches.

584  Quantitative Modulation of Polycomb Silencing Underlies Natural Variation in Vernalization
V. Coustham et al.
Arabidopsis adjusts the onset of flowering to the length of winters via an epigenetic mechanism.

587  Mitochondrial Import Efficiency of ATFS-1 Regulates Mitochondrial UPR Activation
A. M. Nargund et al.
When stressed, the mitochondrion reduces import of a transcription factor, which enters the nucleus instead.

591  How Low Can You Go? Physical Production Mechanism of Elephant Infrasonic Vocalizations
C. T. Herbst et al.
Elephants produce low-frequency sounds via intrinsic vocal-fold vibrations similar to those in humans.

599  Feedback Regulation of Transcriptional Termination by the Mammalian Circadian Clock PERIOD Complex
K. Padmanabhan et al.
A circadian rhythm regulator acts by altering the elongation stage of gene expression.
Flushing Out Drug Users

Chemical analysis of sewage yields a new picture of drug use across Europe.

Conduction of Ultracold Fermions Through a Mesoscopic Channel

J.-P. Brantut et al.

Lithium atoms are used to simulate electronic transport.

Synaptic Inhibition in C. elegans

T. A. Wang et al.

Two synaptic adhesion molecules that have been shown to leave parts behind when provoked.

Disarming Deep-Sea Tactics

A robotic submersible documents the first squid known to interact with the ocean's deep waters.

Diurnal metabolic changes in circadian clock neurons

T. A. Wang et al.

The PD-1 receptor in effector T cells and the transcription factor Foxp3 in T regulatory cells are promising targets for therapies.

Anacardic acid attenuates mutant TDP-43–associated neurodegeneration in mice.

N. Egawa et al.

A quantitative trader urges physics students to consider careers in finance, even if they think they aren't interested.

The Signal Transduction Knowledge Environment

31 July issue: http://scim.ag/ss073112

EDITORIAL GUIDE: Focus Issue—Regulation of Lymphocyte Functions

E. Andrianantoandro and J. F. Foley

Similar modes of regulation across different cell types promote effective innate and adaptive immunity.

RESEARCH ARTICLE: The Sensing Protein Synapse-Associated Protein 97 Is Required for Enhanced Signaling Through Isotype-Switched IgG Memory B Cell Receptors

W. Liu et al.

PODCAST

S. K. Pierce and A. M. VanHook

A scaffolding protein clusters B cell receptors to promote antibody secretion by memory B cells.

RESEARCH ARTICLE: Differential RET Signaling Pathways Drive Development of the Enteric Lymphoid and Nervous Systems

A. Patel et al.

Cis and trans signaling mechanisms direct different developmental responses to ligands for the receptor tyrosine kinase RET.

PERSPECTIVE: T Cell Signaling Targets for Enhancing Regulatory or Effector Function

E. Pan et al.

The PD-1 receptor in effector T cells and the transcription factor Foxp3 in Treg cells are promising targets for therapies.

PERSPECTIVE: Tyrosine Kinases Enabling Adaptor Molecules for Chemokine-Induced Rap1 Activation in T Cells

L. P. Malherbe and D. Wang

T cell migration requires phosphorylation of an adaptor protein by Ab1 family kinases to activate guanine triphosphatase Rap1.

Lineage Tracing Reveals Lgr5+ Stem Cell Activity in Mouse Intestinal Adenomas

A. G. Schepers et al.

Multicolor reporter genes signal the fate of these cells in vivo.

Mycobacterial Disease and Impaired IFN-γ Immunity in Humans with Inherited ISG15 Deficiency

D. Bogunovic et al.

A mutation that accounts for severe defects in the adaptive immune response to Mycobacterium tuberculosis is identified.

Neurexin and Neuroligin Mediate Retrograde Synaptic Inhibition in C. elegans

Z. Hu et al.

Two synaptic adhesion molecules that have been implicated in psychiatric diseases affect the kinetics of synaptic events.

Circadian Rhythm of Redox State Regulates Excitability in Suprachiasmatic Nucleus Neurons

T. A. Wang et al.

Diurnal metabolic changes in circadian clock neurons are coupled to changes in potassium channel activity.

Multicolor reporter genes signal the fate of these cells in vivo.

Neurexin and Neuroligin Mediate Retrograde Synaptic Inhibition in C. elegans

Z. Hu et al.

Two synaptic adhesion molecules that have been implicated in psychiatric diseases affect the kinetics of synaptic events.

Circadian Rhythm of Redox State Regulates Excitability in Suprachiasmatic Nucleus Neurons

T. A. Wang et al.
