The theme of the 2013 AAAS Annual Meeting, 14 to 18 February in Boston, Massachusetts, is The Beauty and Benefits of Science. This theme highlights the “unreasonable effectiveness” of the scientific enterprise in creating economic growth, solving societal problems, and satisfying the essential human drive to understand the world in which we live. The preliminary program begins on page 688.

REVIEW
628 Marine Microbes See a Sea of Gradients
R. Stocker
>> Report p. 675

REPORTS
634 A Quantum Delayed-Choice Experiment
A. Peruzzo et al.
>> Science Podcast
637 Entanglement-Enabled Delayed-Choice Experiment
F. Kaiser et al.
Quantum entanglement is used to probe the nature of the photon.
>> Perspective p. 621
640 Quantum Entanglement of High Angular Momenta
R. Fickler et al.
A method to entangle photons with very-high–orbital angular momentum quantum numbers advances quantum information science.
>> Perspective p. 625
643 Efficient Hybrid Solar Cells Based on Meso-Superstructured Organometal Halide Perovskites
M. M. Lee et al.
Mesostructured alumina acts as an insulating scaffold for the assembly of very thin films of n- and p-type semiconductors.
>> Perspective p. 625
647 Photoinduced Ullmann C–N Coupling: Demonstrating the Viability of a Radical Pathway
S. E. Creutz et al.
A century-old carbon–nitrogen coupling method can be accelerated by light.
>> Perspective p. 625
651 The Absolute Chronology and Thermal Processing of Solids in the Solar Protoplanetary Disk
J. N. Connelly et al.
Isotopic dating implies that, contrary to previous results, two types of primitive solar system solids formed coevally.
>> Perspective p. 625
655 Chloroplast Biogenesis Is Regulated by Direct Action of the Ubiquitin-Proteasome System
Q. Ling et al.
Protein degradation helps to coordinate the growth of chloroplasts with that of the whole plant.
>> Perspective p. 625
659 Tricking the Guard: Exploiting Plant Defense for Disease Susceptibility
J. Lorang et al.
*Cochliobolus victoriae*, a necrotrophic fungal pathogen with devastating effects on oat crops reveals its strategies.
>> Report p. 675
662 Tug-of-War in Motor Protein Ensembles Revealed with a Programmable DNA Origami Scaffold
N. D. Derr et al.
Two microtubule motors attached to the same cargo cooperate or compete, depending on relative directionality.
>> Perspective p. 626
666 Synchronizing Nuclear Import of Ribosomal Proteins with Ribosome Assembly
D. Kressler et al.
The transport adaptor symportin mediates stoichiometric import of a pair of ribosomal proteins.
>> Perspective p. 626
671 Gene Loops Enhance Transcriptional Directionality
S. M. Tan-Wong et al.
A protein constrains double-helical DNA physically, thereby pointing RNA polymerases in the right direction.
>> Perspective p. 625
675 Trade-Offs of Chemotactic Foraging in Turbulent Water
J. R. Taylor and R. Stocker
In their quest for dissolved organic matter, marine bacteria overcome the effects of turbulence by swimming efficiently.
>> Report p. 628
679 Asymmetric Division of Drosophila Male Germline Stem Cell Shows Asymmetric Histone Distribution
V. Tran et al.
The allocation of newly made histones to the daughter cell may explain how stem cells retain their epigenetic footprint.
>> Perspective p. 627; Science Podcast
682 Some Consequences of Having Too Little
A. K. Shah et al.
Being poor means that resources such as time and money are scarce, and this changes how people who are poor behave.
>> Perspective p. 617; Science Podcast

Highlights From Our Daily News Coverage

Using Gut Bacteria to Fight Diarrhea
Mice show a treatment for chronic infection.

Dinosaurs Sprouted Wings Earlier Than Previously Thought
However, these wings were probably used for courtship or brooding rather than flight.

Oceans Getting Too Hot to Handle?
Tropical marine organisms are shifting northward as temperatures rise.

RESEARCH ARTICLE: Mice Lacking the ITIM-Containing Receptor G6b-B Exhibit Macrophagocytopenia and Ablerrant Platelet Function
A. Mathurani et al.

PODCAST
Y. A. Senis and A. M. VanHook
An inhibitory receptor ensures that megakaryocytes produce proper numbers of functional platelets.

MEETING REPORT: Stress Response and Child Health
E. Charmandari et al.
Endocrine and inflammatory responses to stress affect many aspects of development, physiology, and cognition.

PRESENTATION: Prenatal Stress, Telomere Biology, and Fetal Programming of Health and Disease Risk
S. Entinger et al.
Telomere biology may link intrauterine stress to newborn, child, and adult health and disease risk.

PRESENTATION: Protein Complexes and Target Genes Identification by in Vivo Biotinylation—TheSTATS Paradigm
E. Katsanini
A transcription factor's interacting partners and target genes can reveal context-specific signaling and transcriptional outputs.
