**Contents Continued >>**
RESEARCH ARTICLE
928  Electrically, Chemically, and Photonically Powered Torsional and Tensile Actuation of Hybrid Carbon Nanotube Yarn Muscles
M. D. Lima et al.
Thermally driven actuators use a guest material within carbon nanotube yarns to generate fast torsional and tensile motions.
>> Perspective p. 893

REPORTS
932  Synthetic Lipid Membrane Channels Formed by Designed DNA Nanostructures
M. Langacker et al.
DNA-based transmembrane channels exhibit gating responses and can be used for single-molecule detection.
>> Perspective p. 890
936  Coherent Phonon Heat Conduction in Superlattices
M. N. Luckyanova et al.
Coherent phonon transport is evidenced by linear increases of thermal conductivity with total superlattice thickness.
939  Evidence for a Dynamo in the Main Group Pallasite Parent Body
J. A. Tarduno et al.
Some pallasite meteorites might have formed when liquid FeNi from an impactor was injected into their parent body’s mantle.
>> Perspective p. 897
942  Evidence for Early Hafted Hunting Technology
J. Wilkins et al.
Damage on 500,000-year-old stone points implies their use on spears, perhaps by the ancestor of Neandertals and Homo sapiens.
>> Science Podcast
946  Financial Costs of Meeting Global Biodiversity Conservation Targets: Current Spending and Unmet Needs
D. P. McCarthy et al.
Data for birds and protected area requirements yield estimated costs for maintaining worldwide diversity targets.
949  Pathological α-Synuclein Transmission Initiates Parkinson-like Neurodegeneration in Nontransgenic Mice
K. C. Luk et al.
Intracerebral inoculation of synthetic misfolded α-synuclein mimics Parkinson’s disease in wild-type mice.
953  Orbitofrontal Cortex Supports Behavior and Learning Using Inferred But Not Cached Values
J. L. Jones et al.
Inferred value can be used to both guide behavior and modulate learning in rats.
956  Akt-Mediated Regulation of Autophagy and Tumorigenesis Through Beclin 1 Phosphorylation
R. C. Wang et al.
A direct link between a cancer-promoting protein kinase and the control of autophagy is presented.
>> Perspective p. 889
960  A Rab32-Dependent Pathway Contributes to Salmonella Typhi Host Restriction
S. Spanò and J. E. Galán
Expression of a single effector protein allows a human-specific pathogen to replicate within normally nonpermissive mice.
963  Salmonella Inhibits Retrograde Trafficking of Mannose-6-Phosphate Receptors and Lysosome Function
K. McGourty et al.
A bacterial pathogen interferes with intracellular trafficking of receptors needed for host cell lysosomal-enzyme targeting.
968  Convergent Evolution Between Insect and Mammalian Audition
F. Montealegre-Z. et al.
In an example of convergent evolution, rainforest katydids hear using similar mechanisms to those found in mammalian ears.
>> Perspective p. 894
971  Offspring from Oocytes Derived from in Vitro Primordial Germ Cell–like Cells in Mice
K. Hayashi et al.
Mature, fully functional female gametes can be generated from mouse pluripotent stem cells.
975  A Genomic Regulatory Element That Directs Assembly and Function of Immune-Specific AP–1–IRF Complexes
E. Glasmacher et al.
Cooperative binding of transcription factors to composite genomic elements regulates T helper 17 cell differentiation.
>> Perspective p. 891

had potential as an intercellular form of tumor suppression.

**PERSPECTIVE: PTEN—An Intercellular Peacekeeper?**

Transfer of PTEN between cells has potential as an intercellular form of tumor suppression.

**ST NETWATCH: The EMBO Meeting YouTube Channel**

Eminent scientists discuss their work and share their perspectives on careers in research.

**ST NETWATCH: Protein Structure and Structural Bioinformatics**

An online guide highlights the principles of protein structure.

**SCIENCE TRANSLATIONAL MEDICINE**

Integrating Medicine and Science

**14 November issue:** http://scim.ag/stm111412

**EDITORIAL: Regenerative Engineering**

C. T. Laurencin and Y. Khan

The future of tissue regeneration lies in "regenerative engineering," with biomaterials playing a key role.

**COMMENTARY: What is the Greatest Regulatory Challenge in the Translation of Biomaterials to the Clinic?**

G. D. Prestwich et al.

Leaders in the field list the greatest barriers to biomaterials translation.

**PERSPECTIVE: Building Vascular Networks**

H. Bae et al.

Advances in generating vascular networks in biomaterials may aid translation of tissue engineering technologies.

**PERSPECTIVE: Dynamic Environments—The Fourth Dimension**

M. W. Tibbett and K. S. Anseth

Four-dimensional cell matrices will aid in the translation of cell-based therapies.

**REVIEW: Engineering Complex Tissues**

A. Atala et al.

Advances in tissue engineering technologies will enable regeneration of complex tissues and organs.

**REVIEW: Designing Regenerative Biomaterial Therapies for the Clinic**

E. T. Pashuck and M. M. Stevens

Research, regulatory, and clinical aspects are considered for biomaterial translation.
