NEWS OF THE WEEK
868  A roundup of the week’s top stories

NEWS & ANALYSIS
871  Disappointing Results Blunt Hopes for Malaria Vaccine
872  Researchers Lobby to Spare Science From E.U. Budget Cuts
873  Billionaire Restores Funding for Novel Biomedical Network
874  Old Challenges, New Faces Await Science Community in 2013

NEWS FOCUS
876  Nearly Buried, Mussels Get a Helping Hand
The Evolutionary Allure of Mussels
>> Science Podcast
879  Winds of Change
Slip Sliding Away

LETTERS
882  Small Science: Radical Innovation
E. Berlekamp
Small Science: View from Developing Nations
B. Slippers
Small Science: Big Science Will Prevail
L. Siminovitch
Small Science: High Stakes
E. R. Gamazon
Disease Prevention: Experiments in Nature
L. A. Cohen
Disease Prevention: Vitamin D Trials
S. Pilz et al.

BOOKS ET AL.
884  Women Scientists in America
M. W. Rossiter, reviewed by G. M. Montgomery
885  The Structure of Scientific Revolutions
T. S. Kuhn, reviewed by D. Lehoux and J. Foster

POLICY FORUM
887  The Green Economy Post Rio+20
E. B. Barbier

PERSPECTIVES
889  Promoting Tumorigenesis by Suppressing Autophagy
I. Koren and A. Kimchi
>> Report p. 956
890  Functional DNA Origami Devices
M. S. Strano
>> Report p. 932
891  Cooperative Transcription Factor Complexes in Control
G. J. Martinez and A. Rao
>> Report p. 975
893  Speeding Up Artificial Muscles
M. Schulz
>> Research Article p. 928
894  Convergent Evolution of Hearing
R. R. Hoy
>> Report p. 968
895  Mediterranean Island Voyages
A. Simmons
897  A Vitrage of Asteroid Magnetism
B. P. Weiss
>> Report p. 939

CONTENTS continued >>
RESEARCH ARTICLE
928 Electrically, Chemically, and Photonically Powered Torsional and Tensile Actuation of Hybrid Carbon Nanotube Yarn Muscles
M. D. Lima et al.
Thermally driven actuators use a guest material within carbon nanotube yarns to generate fast torsional and tensile motions.
>> Perspective p. 893

REPORTS
932 Synthetic Lipid Membrane Channels Formed by Designed DNA Nanostructures
M. Langecker et al.
DNA-based transmembrane channels exhibit gating responses and can be used for single-molecule detection.
>> Perspective p. 890
936 Coherent Phonon Heat Conduction in Superlattices
M. N. Luckyanova et al.
Coherent phonon transport is evidenced by linear increases of thermal conductivity with total superlattice thickness.
939 Evidence for a Dynamo in the Main Group Pallasite Parent Body
J. A. Tarduno et al.
Some pallasite meteorites might have formed when liquid FeNi from an impactor was injected into their parent body’s mantle.
>> Perspective p. 897
942 Evidence for Early Hafted Hunting Technology
J. Wilkins et al.
Damage on 500,000-year-old stone points implies their use on spears, perhaps by the ancestor of Neandertals and Homo sapiens.
>> Science Podcast
946 Financial Costs of Meeting Global Biodiversity Conservation Targets: Current Spending and Unmet Needs
D. P. McCarthy et al.
Data for birds and protected area requirements yield estimated costs for maintaining worldwide diversity targets.
949 Pathological α-Synuclein Transmission Initiates Parkinson-like Neurodegeneration in Nontransgenic Mice
K. C. Luk et al.
Intracerebral inoculation of synthetic misfolded α-synuclein mimics Parkinson’s disease in wild-type mice.
953 Orbitofrontal Cortex Supports Behavior and Learning Using Inferred But Not Cached Values
J. L. Jones et al.
Inferred value can be used to both guide behavior and modulate learning in rats.
956 Akt-Mediated Regulation of Autophagy and Tumorigenesis Through Beclin 1 Phosphorylation
R. C. Wang et al.
A direct link between a cancer-promoting protein kinase and the control of autophagy is presented.
>> Perspective p. 889
960 A Rab32-Dependent Pathway Contributes to Salmonella Typhi Host Restriction
S. Spanò and J. E. Galán
Expression of a single effector protein allows a human-specific pathogen to replicate within normally nonpermissive mice.
963 Salmonella Inhibits Retrograde Trafficking of Mannose-6-Phosphate Receptors and Lysosome Function
K. McGourty et al.
A bacterial pathogen interferes with intracellular trafficking of receptors needed for host cell lysosomal-enzyme targeting.
968 Convergent Evolution Between Insect and Mammalian Audition
F. Montealegre-Z. et al.
In an example of convergent evolution, rainforest katydids hear using similar mechanisms to those found in mammalian ears.
>> Perspective p. 894
971 Offspring from Oocytes Derived from in Vitro Primordial Germ Cell–like Cells in Mice
K. Hayashi et al.
Mature, fully functional female gametes can be generated from mouse pluripotent stem cells.
975 A Genomic Regulatory Element That Directs Assembly and Function of Immune-Specific AP–1IRF Complexes
E. Glasmacher et al.
Cooperative binding of transcription factors to composite genomic elements regulates T helper 17 cell differentiation.
>> Perspective p. 891
Show How Molecules Move

Fossil teeth suggest that early hominins prefer harmonic sounds.

A new study shows that the ear and brain are wired for harmony?

www.sciencenow.org

Wired for Harmony?

Alignment of Magnetized Accretion Disks and Relativistic Jets with Spinning Black Holes

Porphyry-Copper Ore Shells Form at Stable Pressure-Temperature Fronts Within Dynamic Fluid Plumes

Optomechanical Dark Mode

Human Ancestors Were Grass Gourmands

H. Bae et al.

Advances in generating vascular networks in biomaterials may aid translation of tissue engineering technologies.

PERSPECTIVE: Dynamic Environments—The Fourth Dimension

M. W. Tibbet and K. S. Anseth

Four-dimensional cell matrices will aid in the translation of cell-based therapies.

Review: Engineering Complex Tissues

A. Atala et al.

Advances in tissue engineering technologies will enable regeneration of complex tissues and organs.

Review: Designing Regenerative Biomaterial Therapies for the Clinic

E. T. Pashuck and M. M. Stevens

Research, regulatory, and clinical aspects are considered for biomaterial translation.
