Mosaic of the CMS and ATLAS detectors (as in 2007), part of the Large Hadron Collider at CERN. In 2012, research teams used these detectors to fingerprint decay products from the long-sought Higgs boson and determine its mass, successfully testing a key prediction of the standard model of particle physics. See the Breakthrough of the Year special section beginning on page 1524, three Articles beginning on page 1558, and www.sciencemag.org/special/btoy2012.

R. M. Price

### ARTICLES

1558 The Higgs Boson  
Glossary

1560 Journey in the Search for the Higgs Boson: The ATLAS and CMS Experiments at the Large Hadron Collider  
M. Della Negra et al.

1569 A New Boson with a Mass of 125 GeV Observed with the CMS Experiment at the Large Hadron Collider  
The CMS Collaboration

1576 A Particle Consistent with the Higgs Boson Observed with the ATLAS Detector at the Large Hadron Collider  
The ATLAS Collaboration

### RESEARCH ARTICLES

1583 Radar-Enabled Recovery of the Sutter’s Mill Meteorite, a Carbonaceous Chondrite Regolith Breccia  
P. Jenniskens et al.
Analysis of this rare meteorite implies that the surfaces of C-class asteroids can be more complex than previously assumed.

1587 The Evolutionary Landscape of Alternative Splicing in Vertebrate Species  
N. L. Barbosa-Morais et al.
The patterns and complexity of messenger RNA splicing across vertebrates cluster by species rather than by organ.

1593 Evolutionary Dynamics of Gene and Isoform Regulation in Mammalian Tissues  
J. Merkin et al.
Messenger RNA alternative splicing is highly variable among vertebrates and links to kinase signaling pathways.

1599 C/EBP Transcription Factors Mediate Epicardial Activation During Heart Development and Injury  
G. N. Huang et al.
Transcriptional mechanisms controlling gene expression in the heart’s outer layer are exploited for cardiac repair.

### REPORTS

1604 Symmetry-Protected Topological Orders in Interacting Bosonic Systems  
X. Chen et al.
Counterparts of topological insulators are predicted to exist in interacting bosonic systems.

1606 Sign-Problem–Free Quantum Monte Carlo of the Onset of Antiferromagnetism in Metals  
E. Berg et al.
An effective lattice theory enables an efficient computational solution to an otherwise intractable problem.

1609 Optomechanical Dark Mode  
C. Dong et al.
The formation of a mechanical dark mode can be used to isolate an optomechanical system from thermal noise.

1613 Porphyry-Copper Ore Shells Form at Stable Pressure-Temperature Fronts Within Dynamic Fluid Plumes  
P. Weis et al.
A numerical model attributes ore metal accumulation in porphyry deposits to fluid plumes draining from large magma chambers.

1616 Apatite 4He/3He and (U-Th)/He Evidence for an Ancient Grand Canyon  
R. M. Flowers and K. A. Farley
The Colorado River carved the Grand Canyon to nearly its modern depth 60 million years earlier than was generally believed.

1619 Multiplex Targeted Sequencing Identifies Recurrently Mutated Genes in Autism Spectrum Disorders  
B. J. O’Roak et al.
Large-scale human autism candidate gene resequencing implicates de novo mutations in six genes in ~1% of sporadic cases.

1622 Genome-Wide Detection of Single-Nucleotide and Copy-Number Variations of a Single Human Cell  
C. Zong et al.
A whole-genome amplification method with reduced bias compares a single cell with its descendants.

1627 Probing Meiotic Recombination and Aneuploidy of Single Sperm Cells by Whole-Genome Sequencing  
S. Lu et al.
A whole-genome amplification method with reduced bias yields a personal meiotic recombination map.

### REPORTS continued

1631 Organization of the Influenza Virus Replication Machinery  
A. Moeller et al.
Electron microscopic analysis of a reconstituted RNA-protein complex outlines pathways of transcription.

1634 The Structure of Native Influenza Virion Ribonucleoproteins  
R. Arranz et al.
Electron microscopic analysis of a purified RNA-protein complex links its structure to the influenza life cycle.
