### PERSPECTIVES

146 How to Solve Protein Structures with an X-ray Laser
J. R. Helliwell

147 Improving Metabolism by Throwing Out All the JNK
A. W. Ferrante Jr.

### BOOKS ET AL.

142 How Species Interact
R. Arditi and L. R. Ginzburg, reviewed by R. O. Peterson

143 The Nature–Nurture Debates
D. Goldhaber, reviewed by J. J. Bolhuis

### POLICY FORUM

144 Regulation of Online Social Network Studies
R. B. Shapiro and P. N. Ossorio

146 How to Solve Protein Structures with an X-ray Laser
J. R. Helliwell

147 Improving Metabolism by Throwing Out All the JNK
A. W. Ferrante Jr.

### CORRECTIONS AND CLARIFICATIONS

148 When Metabolism and Epigenetics Converge
P. Sassone-Corsi

150 Water-Responsive Polymer Composites on the Move
H. Kim and S. Kwon

151 Specialized But Flexible
M. Knaden and B. S. Hansson

152 Developmental Refining of Neuroglial Signaling?
A. Grosche and A. Reichenbach

### COVERS

A yin-yang symbol superimposed on a scanning electron micrograph of a mouse tissue alveolar macrophage (diameter: ~18 micrometers). Macrophages are immune cells that mediate inflammation, but they often play protective roles as well. Several age-related chronic diseases—such as metabolic syndrome, cardiovascular disease, and neurodegenerative disease—have an inflammatory component. See the special section beginning on page 155.
