Werner Reichardt Centre
FOR INTEGRATIVE NEUROSCIENCE

The Werner Reichardt Centre for Integrative Neuroscience (CIN) in Tübingen offers a

Junior Research Group in Neurotechnology

The Werner Reichardt Centre for Integrative Neuroscience (CIN) is an interdisciplinary institute at the Eberhard Karls University Tübingen funded by the German Excellence Initiative program. The CIN strives to deepen our understanding of how the brain generates function and how brain diseases impair functions. It tries to make use of newly acquired insights to help people with brain disorders and to launch new mind- and brain-inspired applications in many areas of engineering and computer science. Its scientific program is guided by the conviction that progress in the understanding of brain function can only be achieved by an integrative approach spanning multiple levels of organization and pooling the knowledge of researchers from many different fields.

In order to strengthen research on technical applications the CIN offers a junior group leader (JRG) position with tenure track option for up-and-coming young scientists with a promising track record, working in different fields of Neurotechnology. This might include fields such as:

- Brain machine interfaces, brain computer interfaces and neurorobotics
- Technology for sensory or motor neuroprostheses
- Rehabilitation technology
- Brain-inspired user interfaces and computing technology

We welcome additional proposals in other fields of neurotechnology. The CIN strives to increase the number of female scientists. Therefore qualified female candidates are explicitly encouraged to apply.

Framework:
The intended duration of the position is for 5 years with evaluations by external experts at regular intervals. In the event of positive evaluations after 3 years, the JRG will obtain a tenure track option, which may ultimately lead to a professorship at the University of Tübingen. Start-up funds as well as substantial funding for personnel and running costs will be available, but will depend on the applicant’s qualifications and prior experience. Appointees will be full members of and active participants in the CIN, which will also provide laboratory and/or office space. The JRG leader will be provided with opportunities to contribute to research oriented within the framework of the CIN Graduate Training Centre and the faculties involved in the CIN will provide opportunities for the German habilitation according to established rules, if desired. According to German law, severely disabled persons with equal occupational aptitude will be given preferential consideration.

Application:
Applicants should submit a curriculum vitae, pdf files of up to 5 key publications, a statement of research achievements and future directions (not to exceed 3 pages)

Submissions deadline is 15.02.2013.

For further information on the CIN see: http://www.cin.uni-tuebingen.de/.

Werner Reichardt Centre
FOR INTEGRATIVE NEUROSCIENCE

The Werner Reichardt Centre for Integrative Neuroscience (CIN) in Tübingen offers a

Junior Research Group for Neuroscientists

The Werner Reichardt Centre for Integrative Neuroscience (CIN) is an interdisciplinary institute at the Eberhard Karls University Tübingen funded by the German Excellence Initiative program. The CIN strives to deepen our understanding of how the brain generates function and how brain diseases impair functions. It tries to make use of newly acquired insights to help people with brain disorders and to launch new mind- and brain-inspired applications in many areas of engineering and computer science. Its scientific program is guided by the conviction that progress in the understanding of brain function can only be achieved by an integrative approach spanning multiple levels of organization and pooling the knowledge of researchers from many different fields.

The CIN is offering a junior group leader (JRG) position with tenure track option for up-and-coming young scientists with a promising track record in any area of the neurosciences. Since the CIN strives to increase the number of women scientists, topics well represented by qualified female candidates will be preferred. Hence we explicitly encourage female candidates to apply. Submission deadline is February 15th, 2013.

Framework:
The intended duration of the position is for 5 years with evaluations by external experts at regular intervals. In the event of positive evaluations after 3 years, the JRG will obtain a tenure track option, which may ultimately lead to a professorship at the University of Tübingen. Start-up funds as well as substantial funding for personnel and running costs will be available, but will depend on the applicant’s qualifications and prior experience. Appointees will be full members of and active participants in the CIN, which will also provide laboratory and/or office space. According to German law, severely disabled persons with equal occupational aptitude will be given preferential consideration.

Application:
Applicants should submit a curriculum vitae, pdf files of up to 5 key publications, a statement of research achievements and future directions (not to exceed 3 pages) as well as the names and addresses of at least three referees. All documents should be submitted electronically to the Chairman of the Werner Reichardt Centre for Integrative Neuroscience Tübingen, Prof. Dr. Peter Thier, at cin@uni-tuebingen.de. For further information on the CIN see: http://www.cin.uni-tuebingen.de/.
The Werner Reichardt Centre for Integrative Neuroscience (CIN) is an interdisciplinary institution at the Eberhard Karls University Tübingen funded by the German Excellence Initiative program. The CIN strives to deepen our understanding of how the brain generates function and how brain diseases impair functions. It tries to make use of newly acquired insights to help people with brain disorders and to launch new mind- and brain-inspired applications in many areas of engineering and computer science.

W3-Professorship ‘Systems Neurobiology’
at the Werner Reichardt Centre for Integrative Neuroscience (CIN) in Tübingen

The new professor is expected to direct innovative research on subcortical systems and cortico-subcortical interactions. Possible, but not exclusive, research areas are the functional role of the basal ganglia, the spinal cord, the vestibular system or the cortico-subcortical underpinnings of motor control. Candidates for professorships should have a long-standing experience in interdisciplinary research in the respective area. The candidate should have a proven track record of international excellence and external grant funding and be willing to contribute to research oriented training in the neurosciences at University of Tübingen. The new CIN professor will be a member of the Faculty of Science (Department of Biology). The position is tenured.

According to German law, disabled persons with equal occupational aptitude will be given preferential consideration. The University of Tübingen and CIN strive to promote equal opportunities in science and is committed to increasing the percentage of female scientists in teaching and research. Qualified female candidates are strongly encouraged to apply.

Applicants should submit a curriculum vitae, pdf files of up to 5 key publications, statements of research achievements and future directions together by February 26th, 2013 to the Dean of the Faculty of Science, Prof. Dr. Wolfgang Rosenstiel, at dekanat@mnf.uni-tuebingen.de.

For further information on the CIN see: http://www.cin.uni-tuebingen.de/

The University of Hong Kong is committed to the highest international standards of excellence in teaching and research. Founded in 1911, The University of Hong Kong is committed to the highest international standards of excellence in teaching and research, and has been at the forefront of academic scholarship for many years. The University has a comprehensive range of study programmes and research disciplines spread across 10 faculties and about 100 sub-divisions of studies and learning. There are over 23,400 undergraduate and postgraduate students coming from 50 countries, and more than 1,000 members of academic and academic-related staff.

Teaching Consultant in Common Core Curriculum

(Ref: 201300007)

Applications are invited for appointment as Teaching Consultant in the Common Core Curriculum in the Faculty of Science, from as soon as possible, on a two-year fixed-term basis, with the possibility of renewal.

The University has established a Common Core Curriculum for all undergraduates since September 2012. The Faculty of Science offers courses in the areas of Scientific and Technology Literacy to students from all ten Faculties. A senior Professor in the Faculty of Science will lead the teaching of these courses and work with the Teaching Consultants in the relevant area who will serve primarily as a tutor for small groups of students from multiple disciplines. The medium of instruction is English. Information about the Common Core Curriculum can be viewed at http://tl.hku.hk/common-core-curriculum.

Applicants should have a Master’s degree, preferably in Physical Sciences and have substantial teaching experience in subjects related to general education of the university level. Those with a Ph.D. degree would have an advantage. The appointee’s duties include conducting small-group tutorials for two courses per semester, marking assignments/examination scripts, preparing teaching materials, supervising student work, developing new courses, and undertaking other tasks related to science education. He/She will meet regularly with the Centre for the Enhancement of Teaching and Learning to reflect on and refine the teaching activities in Common Core courses.

A globally competitive remuneration package commensurate with the appointee’s qualifications and experience will be offered. At current rates, salaries and duties do not exceed 15% of gross income. The appointment will attract a contract-end gratuity and University contribution to a retirement benefits scheme, totalling up to 15% of basic salary, as well as leave, and medical benefits. Housing benefits will be provided as applicable. Please note that the University is not able to offer a relocation assistance package (including temporary University housing accommodation and a passage and baggage allowance) to a successful candidate recruited from overseas.

For enquiries about the specific job requirements, please write to Professor Sun Kwok, Dean of Science (e-mail: dean sci@hku.hk). Applicants should send a completed application form, together with an up-to-date C.V. and a statement on teaching philosophy, which includes a portfolio of syllabi and descriptions of courses they have taught or co-taught by e-mail to sciappt@hku.hk. They should also arrange for submission of three references from senior academics who are familiar with their teaching approaches, skills and experience.

The University thanks applicants for their interest, but advises that only shortlisted applicants will be notified of the application result.

The University is an equal opportunity employer and is committed to a No-Smoking Policy.
Opening positions for full-time distinguished professors and lecturers

Shenzhen University (SZU) invites applications for full-time Distinguished Professor and lecturer positions for highly qualified candidates with special expertise in one of the following academic areas.

The University

The university is located in Shenzhen; a big city of over 8 million people in Southern China’s Guangdong Province and directly adjacent to Hong Kong. Shenzhen is China’s first Special Economic Zone, is well known for its economic, scientific and technological innovation, and is one of China’s most advanced and prosperous cities. Shenzhen University was founded in 1983 and has been at the forefront and a central participant in the city’s rapid development.

Shenzhen University consists of twenty-six colleges with a total enrollment over thirty-thousand undergraduate and graduate students. The university is highly committed to quality education and applied research across a number of fields important to the future development. We are aggressively seeking highly qualified international scholars to join us as we continue towards our mission of becoming a top-class research institution in China.

Areas of Interest for distinguished professors and lecturers

Economics, Law, Literature, Science, Engineering, Medicine, Management, Art

A. Distinguished professor

Qualifications

1. Candidates must have an earned doctorate in a closely related discipline with a track record of extraordinary accomplishment in teaching, research/scholarship, and professional service, judged by peers to be outstanding;
2. They should have at least associate-professor or above academic experience in world-renowned universities;
3. They should have been recognized nationally or internationally for the importance of their achievements and are expected to bring distinction to SZU and serve as a key contributor to achieving its strategic goal of becoming a World-Class university.
4. They should have strong research capability and great potential to become academic leader whose vision anticipates the development tendency of their field.
5. They should have a strong organizing and communicating ability to lead their research team to reach world-class level.

Salary/Benefits

Salary and benefits are very competitive; yearly salary starting from 100,000 to 200,000 US dollars and will be commensurate with qualifications and experience.

B. Lecturers (equivalent to the rank of Assistant Professor)

Qualifications

1. Candidates must have an earned doctorate in a closely related discipline;
2. Strong ability to conduct independent research and publish on peer-reviewed professional journals;
3. Fluent in communication with working language (Chinese and/or English) for teaching and research;
4. Satisfy the basic requirement on legal residence and work authorization (by the Chinese government).

Salary/Benefits for Lecturer

Salary and benefits are competitive; and commensurate with qualifications and experience.

To Apply

Interested candidates should submit all application documents to the contacts below or submit all information to http://szuh@szu.edu.cn. For more information please visit http://www.szu.edu.cn/szu2007/index.asp

Contact: Mr. Renqiang (szurse@sina.cn, 0086-755-26535295)
Ms. Yun LI (liyun@szu.edu.cn, 0086-755-26536111)

ETH Zurich invites applications for new professorships.

Conducting research and teaching in an inspiring environment at one of the world’s leading universities

ETH Zurich has come to symbolise excellent education, groundbreaking basic research and applied results that are beneficial for society as a whole. Founded in 1855, ETH Zurich has more than 17,000 students from approximately 80 countries, 3,700 of whom are doctoral candidates. Today, it offers researchers an inspiring environment and students a comprehensive education as one of the world’s leading universities for technology and the natural sciences.

ETH Zurich is an equal opportunity and affirmative action employer. In order to increase the number of women in leading academic positions, we specifically encourage women to apply. ETH Zurich is further responsive to the needs of dual career couples and qualifies as a family friendly employer.

www.facultyaffairs.ethz.ch
The Laboratory of Molecular Carcinogenesis of the Division of Intramural Research is seeking a Staff Scientist in the Mammalian Genome Group to join a state-of-the-art molecular genetics research laboratory focused on studying the genetics and epigenetics associated with environmental exposures. The group utilizes next-gen whole-genome experimental approaches, including massively parallel genome/exon sequencing, RNA-seq, and ChIP-seq approaches, to better understand the molecular basis of complex traits.

**Qualifications** of the ideal candidate will include a PhD, MD, MD/PhD or equivalent with at least 5 years of experience (post doctorate) successfully conducting basic research in a cutting-edge molecular genetics laboratory with a demonstrated track record of productivity through publication in the peer-reviewed literature. Promising candidates with less experience will also be considered. The successful candidate will have good personnel management skills and be supportive of collaborative research. Expertise with a broad range of techniques in molecular and stem cell biology would be highly desirable, including massively parallel DNA sequencing, transcriptome analysis, genomic and cDNA molecular cloning and characterization, and culturing/characterization of ES/iPS cells. Specific knowledge and experience with the Collaborative Cross/Diversity Outcross or similar resources would be beneficial.

To apply, submit a Curriculum Vitae, brief statement of research experience and interests, and the names and addresses (including e-mail addresses and phone numbers) of three references to dir-appls@niehs.nih.gov or the below mailing address by March 15, 2013. Review of applications will begin immediately and continue until the position is filled. Salary is commensurate with level of experience. For additional information about this position, contact Dr. Rick Woychik, Deputy Director, NIEHS (rick.woychik@nih.gov).

Ms. Emily Starnes (Vacancy Number DIR 13-02)
Intramural Program Specialist
National Institutes of Health
National Institute of Environmental Health Sciences
P.O. Box 12233, Maildrop A2-06
Research Triangle Park, NC 27709
Email: dir-appls@niehs.nih.gov

NIH and NIEHS are Equal Opportunity Employers

**Prototyping Staff Scientist / Engineer**

As a Staff Scientist in the newly opened Joint Center for Artificial Photosynthesis (JCAP), this position will assume major responsibility for the activities of the Prototyping and Scale-Up Project (Prototyping). JCAP is a Solar Fuels Innovation Hub recently funded by the Department of Energy ($122M, 5 years) with physical locations at Caltech (JCAP-South) and LBNL (JCAP-North). Members of the Prototyping team design, develop, build and test fully integrated macroscale system prototypes that capture all of the critical-length scales and phenomena of importance for device operation, such as fluid flows, feedstock input and output streams, optical input paths, mechanical system properties, and physical form factors. This team also plays a central role in designing and developing highly efficient and durable components. The position offers a unique opportunity for an experienced engineer/researcher to assume a key role in the development and demonstration of a scalable manufacturable solar-fuels generator.

**Position Qualifications:**
- Ph.D. in engineering, physical science or similar experimental field.
- Post-Ph.D. experience in electrochemically or photochemically driven processes; industrial experience a plus.
- Demonstrated record of accomplishment in product development and/or production practice.
- Publications in appropriate scientific/technical journals.
- General knowledge of prototyping methods for electrochemical devices and systems.
- Excellent written and verbal communication skills.
- Demonstrated ability to guide and train technical support staff and work with students and postdoctoral fellows of multiple scientific backgrounds.
- Excellent interpersonal skills.
- Experience in developing strong working relationships and collaborating across an organization.

For a detailed position description and instructions regarding how to apply, please visit [www.lbl.gov](http://www.lbl.gov), access the careers page and reference job number 75472.

Berkeley Lab is an affirmative action/equal opportunity employer committed to the development of a diverse workforce.

**Center of Macroeconomics, Evolution and Climate**

Natural History Museum of Denmark and Department of Biology
University of Copenhagen

**Faculty Professor and Associate Professor positions** &
**Fixed-term postdoc and Assistant Professor positions**

in
Biogeography, Phylogeography, Macroeconomics, Macroevolution and Community Ecology

We seek international competitive candidates with a strong publication record at the level of position interested in. We expect strong analytical and data handling skills and the ability to communicate within a cross-disciplinary research center. Competitive salaries are offered.

For full description of the individual positions see [www.bio.ku.dk](http://www.bio.ku.dk) or [www.employment.ku.dk](http://www.employment.ku.dk).

Inquiries can be made to Professor Carsten Rahbek, e-mail: crahbek@bio.ku.dk.

The center ([http://macroeconomy.ku.dk/](http://macroeconomy.ku.dk/)) is a long-term funded center of excellence with a cross-disciplinary research program addressing fundamental questions on the origin, maintenance, conservation and future of life and biological diversity on Earth. Researchers at the center currently represent 14 nationalities and the working language is English.
The Neutron Sciences Directorate (NScD) at Oak Ridge National Laboratory (ORNL) invites applications for the position of Deputy Associate Laboratory Director. The NScD at ORNL operates the High Flux Isotope Reactor (HFIR), the United States’ highest flux reactor-based neutron source, and the Spallation Neutron Source (SNS), the world’s most intense pulsed accelerator-based neutron source. Together these facilities operate 24 instruments for neutron scattering research, each year carrying out in excess of 1,000 experiments in the physical, chemical, materials, biological, and medical sciences for more than 3,000 visiting scientists. HFIR also provides unique facilities for isotope production and neutron irradiation. To learn more about Neutron Sciences at ORNL go to: neutrons.ornl.gov.

The Deputy Associate Laboratory Director (ALD) supports the Associate Laboratory Director to develop and direct the scientific user and instrument and neutron source development programs at SNS and HFIR and help set the strategic scientific direction to meet the community needs of the future. The Deputy ALD serves as the acting ALD in the ALD’s absence.

For a complete description and to apply online see jobs.ornl.gov. Applications must be received by March 31st, 2013.

---

**HARVARD**

School of Engineering and Applied Sciences

The Disease Biophysics Group at Harvard University invites applications for a number of Postdoctoral Fellow positions open for projects pertaining to building microscale models of diseased organs. The project requires the assembly of engineered, human microtissues in microfluidic devices that can be interrogated for the genetic, morphological and functional indicators of health, disease, and injury.

The Disease Biophysics Group is a multidisciplinary research group based in the Harvard School of Engineering and Applied Sciences, the Wyss Institute for Biologically-Inspired Engineering, and the Harvard Stem Cell Institute.

Candidates with experience in neuronal cell biology, striated and smooth muscle tissue engineering, the cardiac valves, and experimental models of diabetes are encouraged to apply. Applicants are expected to hold a doctoral degree in engineering, physiology, or cell biology and have a proven record of high quality publications. For further information about The Disease Biophysics Group and its activities, see [http://diseasebiophysics.seas.harvard.edu/](http://diseasebiophysics.seas.harvard.edu/).

**Application Procedure:** The application will be assembled as single pdf file: cover letter describing research interests and goals, CV, research statement, a full list of publications and up to three examples of first author papers, and a list of no less than three references with contact information. Please note that all requirements for the doctoral degree must be completed prior to the start date. The application should be sent to: [dbg-postdoc@seas.harvard.edu](mailto:dbg-postdoc@seas.harvard.edu). Full consideration will be given to all applications received by February 15, 2013; applications received thereafter will be considered until the positions are filled.

_Harvard University is an Equal Opportunity Employer. Women and underrepresented minorities are particularly encouraged to apply._

Born in 1564, Galileo Galilei once contemplated a career in the priesthood. It’s perhaps fortunate for science that upon the urging of his father, he instead decided to enroll at the University of Pisa. His career in science began with medicine and from there he subsequently went on to become a philosopher, physicist, mathematician, and astronomer, for which he is perhaps best known. His astronomical observations and subsequent improvements to telescopes built his reputation as a leading scientist of his time, but also led him to probe subject matter counter to prevailing dogma. His expressed views on the Earth’s movement around the sun caused him to be declared suspect of heresy, which for some time led to a ban on the reprinting of his works.

Galileo’s career changed science for all of us and he was without doubt a leading light in the scientific revolution, which is perhaps why Albert Einstein called him the father of modern science.

Want to challenge the status quo and make the Earth move? At Science we are here to help you in your own scientific career with expert career advice, forums, job postings, and more — all for free. For your career in science, there’s only one Science. Visit Science today at ScienceCareers.org.
**ACADEMIC APPOINTMENTS**

New York University Shanghai invites applications for several assistant (tenure-track), associate (tenured), and full professor (tenured) positions from candidates with significant experience and accomplishments in research programs in systems, computational, and cognitive neuroscience. The search is part of a major effort to establish a new Institute of Brain and Behavior at NYU Shanghai, with research areas that include computational modeling of neural circuits, investigations of neural circuit function, and human cognition.

Candidates must have completed a Ph.D. or equivalent by the time of application. The successful candidates will be expected to develop an independent, externally-funded research program, and to teach and otherwise contribute to the educational mission of NYU Shanghai. The search will remain open until the positions are filled, but review of applications is currently underway. The appointment could begin as soon as August 1, 2013, pending administrative and budgetary approval, or could be delayed until August 1, 2014.

NYU Shanghai is the first Sino-US higher education joint venture to grant a degree that is accredited in the US as well as in China. A research university with liberal arts and sciences at its core, it resides in one of the world’s great cities, which is also a vibrant intellectual community (http://shanghai.nyu.edu/). NYU Shanghai will recruit scholars who are committed to our global vision of transformative teaching and innovative research.

New York University has established itself as a Global Network University, with three degree granting campuses - New York, Shanghai, and Abu Dhabi - complemented by 12 additional academic centers across five continents. Faculty and students circulate within the network in pursuit of common research interests and cross-cultural, interdisciplinary endeavors, both local and global.

The terms of employment in NYU Shanghai are comparable to U.S. institutions. Faculty may also spend time at NYU New York and other sites of the global network, engaging in both research and teaching opportunities. Tenure/tenure-track faculty will also be affiliated with the New York University Center for Neural Science, the Neuroscience Institute of the NYU School of Medicine, and/or with other suitable academic units at NYU New York.

Applicants should submit a curriculum vitae, a statement of research and teaching interests, electronic copies of up to five recent relevant publications, and the names and addresses of three or more individuals willing to provide letters of reference. Please visit our website at http://shanghai.nyu.edu/about/open-positions for instructions and other information on how to apply. If you have any questions, please e-mail shanghai.faculty.recruitment@nyu.edu.

NYU Shanghai is an Equal Opportunity/Affirmative Action Employer.

**FACULTY POSITIONS**

NYU Shanghai is an Equal Opportunity/Affirmative Action Employer.
AAAS is here – promoting universal science literacy.

In 1985, AAAS founded Project 2061 with the goal of helping all Americans become literate in science, mathematics, and technology. With its landmark publications Science for All Americans and Benchmarks for Science Literacy, Project 2061 set out recommendations for what all students should know and be able to do in science, mathematics, and technology by the time they graduate from high school. Today, many of the state standards in the United States have drawn their content from Project 2061.

Every day Project 2061 staff use their expertise as teachers, researchers, and scientists to evaluate textbooks and assessments, create conceptual strand maps for educators, produce groundbreaking research and innovative books, CD-ROMs, and professional development workshops for educators, all in the service of achieving our goal of universal science literacy.

As a AAAS member, your dues help support Project 2061 as it works to improve science education. If you are not yet a AAAS member, join us. Together we can make a difference.

To learn more, visit aaas.org/plusyou/project2061
AAAS is here – helping scientists achieve career success.

Every month, over 400,000 students and scientists visit ScienceCareers.org in search of the information, advice, and opportunities they need to take the next step in their careers.

A complete career resource, free to the public, Science Careers offers a suite of tools and services developed specifically for scientists. With hundreds of career development articles, webinars and downloadable booklets filled with practical advice, a community forum providing answers to career questions, and thousands of job listings in academia, government, and industry, Science Careers has helped countless individuals prepare themselves for successful careers.

As a AAAS member, your dues help AAAS make this service freely available to the scientific community. If you’re not a member, join us. Together we can make a difference.

To learn more, visit aaas.org/plusyou/sciencecareers
ASSISTANT/ASSOCIATE PROFESSOR
Department of Chemical Sciences
The Department of Chemical Sciences at The University of Michigan invites applications for two tenure-track faculty positions. The department is seeking a candidate with a nationally competitive research program in Chemistry, and a similarly qualified candidate in Biochemistry and/or Immunology. Successful applicants will be provided a competitive nationally funded research program. Appointments will be commensurate with qualifications and experience. Successful applicants will be provided competitive salaries and startup packages. The University of Michigan is one of the nation’s largest universities, with a strong emphasis on research and graduate education. Applicants must have a Ph.D. in Chemistry or Biochemistry and/or Immunology, and a strong record of research productivity and preferably a national or international research program. Appointments will be commensurate with qualifications and experience.

The University of Michigan is an Equal Opportunity/Affirmative Action employer. Women, minorities, persons with disabilities, and individuals with protected medical conditions are strongly encouraged to apply.

Inquiries should be directed to prof. @sciencecareers.org.

www.sciencecareers.org

 ASSISTANT/ASSOCIATE PROFESSOR
Department of Pharmacological Sciences
The College of Pharmacy, Washington State University (WSU) on the Riverpoint campus in Spokane, invites applications for a full-time, tenure-track position at the rank of Assistant or Associate Professor (commensurate with experience) in the Department of Pharmacological Sciences. Applicants must have an advanced degree (M.D., Pharm.D., or Ph.D. in Pharmacology, Pharmacological Sciences, or a related discipline) before date of hire. The Assistant Professor candidate must possess a track record of accomplishment to demonstrate the potential to become an outstanding scholar and educator. Associate Professor candidates must possess the track record of accomplishment as constraining he/she as an outstanding scholar and educator with an active, nationally recognized, extramurally funded, research program. Preference will be given to applicants who have a demonstrated ability to teach pharmacogenetics and genomics at the graduate level. The successful candidate will be expected to maintain a strong, extramurally funded research program in the general area of pharmacogenetics and genomics, to mentor graduate students and fellows, and to teach in the professional and graduate curricula.

Screening of applications will begin January 16, 2013 and will continue until a suitable candidate is identified.

To apply and see complete position description visit website: http://www.wsu.edu.
WSU is an Equal Opportunity/Affirmative Action/ADA Educator and Employer.

ACADEMIC NEUROINTENSIVIS
The Department of Neurology at Columbia University Medical Center seeks a neurologist with specialty training in neurointensive care for a tenure-track faculty position at the ASSISTANT PROFESSOR level. The candidate will join three neurointensivists in the Neurocritical Care Section, and be part of the Neurointensive Care Program, under the leadership of Dr. Stephan Mayer, and be the primary neurologist and medical director of the Neurointensive Care Unit.

RESEARCH GRANTS MANAGER
Applicants are invited for the position of Research Grants Manager. Ph.D. in any Biomedical Sciences or related discipline required. The candidate will be responsible for grant and manuscript writing, progress report preparation, and obtaining approvals from regulatory boards. Submit application to: Office of Research Development, Assistant Professor (museum)
