EDITORIAL
627 Investing in Distant Rewards
William H. Press

NEWS OF THE WEEK
632 A roundup of the week’s top stories

NEWS & ANALYSIS
635 Chu’s Legacy at DOE: Some Fields Gain, Others Falter
636 BP Research Dollars Yield Signs of Cautious Hope
638 Forecasting Regional Climate Change Flunks Its First Test
639 Supreme Court to Review the Scope of Monsanto’s Seed Patents

POLICY FORUM
650 Is Europe Evolving Toward an Integrated Research Area?
A. Chessa et al.

PERSPECTIVES
652 Shielding Broken DNA for a Quick Fix
J. Lukas and C. Lukas
>> Reports pp. 700 and 711
653 Pollution, Politics, and Vultures
A. Balmford
>> Science Podcast
654 Metamaterials with Quantum Gain
O. Hess and K. L. Tsakmakidis
655 Impact and Extinction
H. Pääkkö
>> Report p. 684
656 Fossils Versus Clocks
A. D. Yoder
>> Research Article p. 662
658 Copying Biology’s Ways with Hydrogen
F. A. Armstrong
>> Report p. 682
659 Jack of All Trades, Master of Flowering
J. A. H. Danielsson and W. B. Frommer
>> Report p. 704
661 Retrospective: Carl R. Woese (1928–2012)
N. Goldenfeld and N. R. Pace

DEPARTMENTS
625 This Week in Science
628 Editors’ Choice
630 Science Staff
716 Information for Authors
718 New Products
719 Science Careers

Explore our rich online offerings, including multimedia, news, Science Careers, and our two research journals—Science Signaling and Science Translational Medicine—at www.sciencemag.org
RESEARCH ARTICLE
662 The Placental Mammal Ancestor and the Post–K-Pg Radiation of Placentals
M. A. O’Leary et al.
Fossil and DNA phylogenies suggest that placental mammals diversified in the Cenozoic and reconstruct the ancestral form.
>> Perspective p. 656

REPORTS
668 Gravity Field of the Moon from the Gravity Recovery and Interior Laboratory (GRAIL) Mission
M. T. Zuber et al.
The Moon’s gravity field reveals that impacts have homogenized the density of the crust and fractured it extensively.
667 The Crust of the Moon as Seen by GRAIL
M. A. Wieczorek et al.
The Moon’s gravity field shows that the lunar crust is less dense and more porous than was thought.
665 Ancient Igneous Intrusions and Early Expansion of the Moon Revealed by GRAIL Gravity Gradiometry
J. C. Andrews-Hanna et al.
The Moon’s gravity map shows that the crust is cut by extensive magmatic dikes, perhaps implying a period of early expansion.
664 Proton Donor Acidity Controls Selectivity in Nonaromatic Nitrogen Heterocycle Synthesis
S. Duttwyler et al.
Acids of different strengths propel a common intermediate to a diverse array of compounds sought in pharmaceutical research.
662 A Functional [NiFe]Hydrogenase Mimic That Catalyzes Electron and Hydride Transfer from H2
S. Ogo et al.
A bimetallic complex mimics a widely studied enzyme class of particular interest in renewable energy research.
>> Perspective p. 658
661 Time Scales of Critical Events Around the Cretaceous-Paleogene Boundary
P. R. Renne et al.
Radiometric dating establishes the mass extinction that killed the dinosaurs as synchronous with a large asteroid impact.
>> Perspective p. 655

667 Stress State in the Largest Displacement Area of the 2011 Tohoku-Oki Earthquake
W. Lin et al.
Borehole stress measurements indicate a nearly total stress drop in the region of largest slip.
660 Paramyxovirus V Proteins Disrupt the Fold of the RNA Sensor MDA5 to Inhibit Antiviral Signaling
C. Motz et al.
The crystal structure of a viral protein core complex reveals how paramyxoviruses inhibit the innate immune response.
658 Structural Basis for Hijacking of Cellular LxxLL Motifs by Papillomavirus E6 Oncoproteins
K. Zanier et al.
Crystal structures show how a key oncoprotein in human papillomaviruses binds host proteins.
655 A Histone Mutant Reproduces the Phenotype Caused by Loss of Histone-Modifying Factor Polycomb
A. R. Pengelly et al.
Histone genetics provides functional evidence for the importance of histone modifications in gene regulation.
652 53BP1 Regulates DSB Repair Using Rif1 to Control 5’ End Resection
M. Zimmermann et al.
In mammalian cells, Rap1-interacting factor 1 protects DNA ends against resection.
>> Perspective p. 652; Report p. 711
651 Regulation of Flowering by Trehalose-6-Phosphate Signaling in Arabidopsis thaliana
V. Wahl et al.
Specific sugar signals integrate carbohydrate status with day length and developmental age to regulate flowering.
>> Perspective p. 659
648 Host-Derived Nitrate Boosts Growth of E. coli in the Inflamed Gut
S. E. Winter et al.
During inflammation, Escherichia coli uses nitrate respiration to gain a growth advantage over other gut bacteria.
Rif1 Prevents Resection of DNA Breaks and Promotes Immunoglobulin Class Switching
M. Di Virgilio et al.
In mammalian cells, Rap1-interacting factor 1 protects DNA ends against resection.
>> Perspective p. 652; Report p. 700

Change of address: Allow 4 weeks, giving old and new addresses and 8-digit account number. Postmaster: Send change of address to AAAS, P.O. Box 96137, Washington, DC 20090-6137. Single-copy sales: $10.00 current issue, $25.00 back issue prepaid includes surface postage; bulk rates on request. Authorization to photocopy material for internal or personal use under circumstances not falling within the fair use provisions of the Copyright Act is granted by AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that $10.00 per article is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. The identification code for Science is 0036-8075. Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes.
