1590 Ultrascan Tryptophan-to-Heme Electron Transfer May Limit the Generality of Ionization Formed and Evolved

1604 The Structural Basis of ZMPSTE24-Dependent Laminopathies A. Quigley et al. Structures of two transmembrane zinc proteases reveal a barrel of seven helices surrounding a large cavity.

1608 Wild Pollinators Enhance Fruit Set of Crops Regardless of Honey Bee Abundance L. A. Garibaldi et al. Flower visits by wild insects enhanced fruit production in crops worldwide, well beyond the effect of bees.

1615 Roots and Associated Fungi Drive Long-Term Carbon Sequestration in Boreal Forest K. E. Clemmensen et al. Reservoirs of carbon in boreal forest soils are revisited in an island chronosequence, using modeling and molecular approaches.

1618 The Biological Underpinnings of Namib Desert Fairy Circles A. L. Juergens et al. Termite alters a small scale conditions to facilitate the growth of grasses, generating patterns in the desert.

1593 Photoredox Activation for the Direct β-Arylation of Ketones and Aldehydes A. T. Pirnot et al. Two catalysts working in tandem form carbon-carbon bonds at a conventionally unreactive site.

1586 Ultrafast Tryptophan-to-Heme Electron Transfer as Revealed by UV 2D Spectroscopy C. Consani et al. Relaxation in a photoexcited protein by electron transfer may limit the generality of a common energy transfer–based probe.

1582 Topology-Driven Magnetic Quantum Phase Transition in Topological Insulators J. Zhang et al. Simultaneous topological and magnetic quantum phase transitions are observed in thin films of Bi$_2$(Se$_{1-x}$Te$_x$)$_3$ doped with chromium.

1578 Multiple Instances of Ancient Balancing Selection Shared Between Humans and Chimpanzees E. M. Leffler et al. Genome-wide shared genetic polymorphisms between humans and chimp mostly affect host-pathogen interactions.

1584 Dust and Biological Aerosols from the Sahara and Asia Influence Precipitation in the Western U.S. J. M. Cressman et al. Dust and biological aerosols from the Sahara and Asia can act as ice nuclei for precipitation in California’s Sierra Nevada.

1580 Ultrafast Tryptophan-to-Heme Electron Transfer Mediated by Plasmon Excitation of Cu Oxidation State A. Marimuthu et al. In situ visible light irradiation reverses the oxidative degradation of a copper catalyst, thereby enhancing its viability.
