AMERICAN VETERINARY EDUCATION AND ITS PROBLEMS

In analyzing the subject assigned as my part of the committee’s report, I became deeply impressed with the responsibility that rests upon those who are in a measure charged with the difficult task of molding a system of education for these great countries that will yield efficient veterinary service. The first generation of veterinary educators in America is rapidly passing away. Its efforts were spent in meeting the demands and grappling with the conditions of a new country and there was little time for it to reckon with the educational methods as they had developed in more mature and cultured Europe. While this first generation manfully battled against the onslaught of disease in the rapidly increasing animal population, discoveries were being made, and methods tested and put into operation, pertaining to veterinary education and practise, of which these new countries were unmindful. At no time in the history of man has a generation witnessed greater revolutions in the theories, facts and methods of a profession than those which occurred in rapid succession in the active lifetime of Alexander Liautard, Andrew Smith, Duncan McEachran and James Law, three of whom still remain as wise counselors among us. These distinguished men have witnessed all that has been accomplished in the acquisition of definite knowledge of specific diseases, sanitary science, the introduction of the newer

1 A paper presented by the chairman of the Committee on Intelligence and Education of the American Veterinary Medical Association, at its annual meeting, Toronto, August, 1911.
