FRIDAY, NOVEMBER 24, 1911

CONTENTS
University Administration and University Ideals: Dr. Stuart Paton ............... 693
Physiology as a Fundamental in Veterinary Education: Professor Pierre A. Fish ... 700
Additional Facts about the Chestnut Blight: I. C. Williams ...................... 704
The Sarah Berner Fellowship: C. L. F .... 705
A Field School of Geology ................. 706
Wisconsin Geological and Natural History Survey ......................... 706
The Will of Mr. Joseph Pulitzer .......... 707
Scientific Notes and News .................. 708
University and Educational News ........... 712
Discussion and Correspondence:—
The Exiled Naturalists of Portugal: Professor T. D. A. Cockerell. "Domesticated Animals and Plants": Professor E. Davenport ..................... 714
Quotations:—
Pensions and the Learned Professions .... 715
Scientific Books:—
Leonhardi Euleri, Opera Omnia: Professor G. A. Miller. Thompson’s Applied Electrochemistry: Professor Samuel A. Tucker. Lippincott’s New Medical Dictionary: Dr. Felix Neumann .................. 717
The Meeting of the Association of American Universities ................ 720
Special Articles:—
The Rôle of Different Proteins in Nutrition and Growth: Professor Thomas B. Osborne, Professor Lafayette B. Mendel . 722

MSS, intended for publication and books, etc., intended for review should be sent to the Editor of SCIENCE, Garrison-on-Hudson, N. Y.

UNIVERSITY ADMINISTRATION AND UNIVERSITY IDEALS

The development of our American universities is seriously handicapped by the present system of administration. A spirit of chauvinism intolerant of adverse criticism from outsiders, even when directed against obvious defects, is often a prominent factor in determining as well as in limiting the functions of the entire educational system now operative in colleges and universities which remain private corporations. This particular defect is more apparent in our older universities where the bonds of union between alma mater and alumni, which during the early period of development were essential to the life of our colleges, now threaten unless modified and readjusted to impair the growth and vitality of these institutions. Wherever the spirit of progress is felt, the problem of the proper readjustment of the administrative forces of our universities so as to make the most effective use of available resources is, for the moment, a more important question than providing for an increase of revenue. It is not difficult to point out more than one concrete example of the confusion that exists in regard to the relationships of the various departments of administration and the unfortunate state of anarchy sure to arise when a board of trustees whose members are uninformed as to the general progress made in the development of universities suddenly reassumes the powers which through their inertia had temporarily been relegated to president and deans. The results of this unfortunate state of affairs have been that fruitless efforts are made to solve problems requiring the training and special knowledge
