SPECIAL SECTION

Australopithecus sediba

INTRODUCTION

163 The Mosaic Nature of Australopithecus sediba
   L. R. Berger

ABSTRACTS

REPORTS

164 Dental Morphology and the Phylogenetic “Place” of Australopithecus sediba
   J. D. Irish et al.

Mandibular Remains Support Taxonomic Validity of Australopithecus sediba
   D. J. de Ruiter et al.

RESEARCH ARTICLES

164 The Upper Limb of Australopithecus sediba
   S. E. Churchill et al.

Mosaic Morphology in the Thorax of Australopithecus sediba
   P. Schmid et al.

The Vertebral Column of Australopithecus sediba
   S. A. Williams et al.

The Lower Limb and Mechanics of Walking in Australopithecus sediba
   J. M. DeSilva et al.

CORRECTIONS AND CLARIFICATIONS

TECHNICAL COMMENT ABSTRACTS

BOOKS ET AL.

145 Nature’s Oracle
   U. Segerstrale, reviewed by J. J. Boomsma

146 Studying Human Behavior
   H. E. Longino, reviewed by E. L. Milam

POLICY FORUMS

147 Right-Sizing Stem-Rust Research
   P. G. Pardey et al.

149 Latin America’s Nitrogen Challenge
   A. T. Austin et al.

PERSPECTIVES

150 Self-Medication in Animals
   J. C. de Roode et al.

152 Pactamycin Made Easy
   J. A. Cadelli and S. E. Reisman

153 The Complete Quantum Hall Trio
   S. Oh

154 Lifting the Veil on an Old Mystery
   L. Vereecken

155 An Interferon Paradox
   P. M. Odorizzi and E. J. Wherry

CONTENTS continued >>

ON THE WEB THIS WEEK

>> Science Express
   Read Reports on self-assembling peptide cages, explaining a missing spleen, and more.

COVER

Reconstruction of a ~2-million-year-old Australopithecus sediba skeleton (height: ~1.3 meters) based on fossils from the Malapa Hominin 1 (MH1), MH2, and MH4 specimens from Malapa, Gauteng, South Africa. Brown indicates discovered fossils. Au. sediba exhibits a mosaic morphology distinct from that of other australopiths and early Homo. See pages 132 and 163, as well as www.sciencemag.org/extra/sediba.

Reconstruction: Peter Schmid and casting technicians at the University of the Witwatersrand’s Evolutionary Studies Institute; Photo: Brett Eloff, courtesy of Lee R. Berger and the University of the Witwatersrand

DEPARTMENTS

117 This Week in Science

121 Editors’ Choice

124 Science Staff

223 New Products

224 Science Careers
186 A Long-Lived Relativistic Electron Storage Ring Embedded in Earth’s Outer Van Allen Belt
D. N. Baker et al.
NASA’s Van Allen Probes revealed an additional, dynamic belt of relativistic particles surrounding Earth.

190 A Guanosine-Centric Mechanism for RNA Chaperone Function
J. K. Grafman et al.
RNA chaperones promote assembly of complex RNA structures by binding to and “neutralizing” guanosine bases.

195 A Histone Acetylation Switch Regulates H2A.Z Deposition by the SWR-C Remodeling Enzyme
S. Watanebe et al.
A modification on histone H3 in a nucleosome favors the swapping out of one type of H2A histone for another.

202 Blockade of Chronic Type I Interferon Signaling to Control Persistent LCMV Infection
J. R. Teijaro et al.
A virally encoded protein eliminates a cell surface drug transporter, promoting latent human cytomegalovirus infection.

207 Persistent LCMV Infection Is Controlled by Blockade of Type I Interferon Signaling
E. B. Wilson et al.
Blockade of type I interferons leads to better control of persistent lymphocytic choriomeningitis virus infection.

211 Injectable, Cellular-Scale Optoelectronics with Applications for Wireless Optogenetics
T. Kim et al.
Miniaturized and implantable light-emitting diodes offer precise and flexible control of neurons, when used in combination with optogenetics.

216 Interactions Between the Nucleus Accumbens and Auditory Cortices
V. N. Salimpoor et al.
Activity in the mesolimbic striatum and its interaction with the auditory cortices determines the hedonic response to new music.
Science 340 (6129), 117-223.
