SPECIAL SECTION

Grand Challenges in Science Education

INTRODUCTION

290 Plenty of Challenges for All

NEWS

292 Transformation Is Possible if a University Really Cares

REVIEWS

297 The Challenge of Education and Learning in the Developing World
M. Kremer et al.

300 Understanding Neurocognitive Developmental Disorders Can Improve Education For All
B. Butterworth and Y. Kovas

305 Physical and Virtual Laboratories in Science and Engineering Education
T. de Jong et al.

310 Professional Development for Science Teachers
S. M. Wilson

314 Outside the Pipeline: Reimagining Science Education for Nonscientists
N. W. Feinstein et al.

317 Generating Improvement Through Research and Development in Education Systems
M. S. Donovan

320 Proficiency in Science: Assessment Challenges and Opportunities
J. W. Pellegrino

PERSPECTIVES

309 Teacherpreneurs: A Bold Brand of Teacher Leadership for 21st-Century Teaching and Learning
B. Berry

313 A Business View on U.S. Education
R. Stephens and M. Richey

LETTERS

272 Drought and China’s Cave Species
S.-S. Shu et al.

273 Little Emperors Pose Behavioral Challenges
L. Cameron et al.

274 Preventing Prejudice in Genome Profiling
M. Maruthappu and A. E. Finlayson

CORRECTIONS AND CLARIFICATIONS

TECHNICAL COMMENT ABSTRACTS

BOOKS ET AL.

274 The Earthquake Observers
D. R. Coen, reviewed by G. C. Beroza

275 Edinburgh International Science Festival
reviewed by D. Dixon and E. Straughan

EDUCATION FORUMS

276 Opportunities and Challenges in Next Generation Standards
E. K. Stage et al.

278 Driven by Diversity
J. Ferrini-Mundy

PERSPECTIVES

279 3D Mapping in the Brain
C. Barry and C. F. Doeller

280 Climate’s Dark Forcings
M. O. Andreae and V. Ramanathan

Watch a video about improving education in the developing world at www.sciencemag.org/special/education2013.

COVER
The 21st-century scientific workforce needs new skills and knowledge to keep pace with ever-changing technology. Larger, more diverse student populations clamor for access to knowledge. All global citizens, whether in a doctor’s office or polling booth, must be better informed. All of these needs call for expanded, improved science education. In this special issue, we have invited experts to discuss the most important challenges facing science education. See the special section beginning on page 290.

www.sciencemag.org  SCIENCE  VOL 340  19 APRIL 2013  243
Published by AAAS
Global Charcoal Mobilization from Soils via Dissolution and Riverine Transport to the Oceans
R. Jaffé et al.
A larger-than-anticipated fraction of charcoal produced by wildfires leaches out of soils and is transported to the oceans.

>> Perspective p. 287

Resilience and Recovery of Overexploited Marine Populations
P. Neubauer et al.
Current fish harvests and low fish levels make fishery recovery improbable for most of the world’s depleted stocks.

>> Report p. 372

Deviational Decline in Neuronal Regeneration by the Progressive Change of Two Intrinsic Timers
Y. Zou et al.
Reciprocal signals promote axon regeneration in young worms and repress axon regeneration in older worms.

>> Perspective p. 282

A Neural Marker of Perceptual Consciousness in Infants
S. Roudier et al.
The brain mechanisms underlying conscious perception are already present in infancy and improve with age.

REPORTS

282 Heterochronic Genes Turn Back the Clock in Old Neurons
P. Nix and M. Bastiani

283 Polarization Traffic Control for Surface Plasmons
A. E. Miroshnichenko and Y. S. Kivshar

284 Great Apes and Zoonoses
P. M. Sharp et al.

286 Pursuing Near-Zero Response
N. Engheta

287 Fire in the Ocean
C. A. Mastroi and P. Louchouarn

RESEARCH ARTICLE

324 Pervasive Externalities at the Population, Consumption, and Environment Nexus
P. S. Dasgupta and P. R. Ehrlich
Challenges posed by the economic consequences of population growth and consumption require collective action.

328 Near-Field Interference for the Unidirectional Excitation of Electromagnetic Guided Modes
F. J. Rodríguez-Fortuño et al.
Near-field interference can be used to control the directional propagation of electromagnetic excitations.

331 Polarization-Controlled Tunable Directional Coupling of Surface Plasmon Polaritons
J. Lin et al.
Control over the generation and propagation direction of light-induced surface plasmons in a thin metal film is demonstrated.

334 External Quantum Efficiency Above 100% in a Singlet-Exciton-Fission-Based Organic Photovoltaic Cell
D. N. Congreve et al.
Single photons are shown to propel more than one carrier in a carbon-based solar cell.

337 Multicompartment Mesoporous Silica Nanoparticles with Branched Shapes: An Epitaxial Growth Mechanism
T. Suteewong et al.
A one-pot synthesis method furnishes mesoporous silica nanoparticles with both cubic and hexagonally structured compartments.

341 Reorganization of Southern Ocean Plankton Ecosystem at the Onset of Antarctic Glaciation
A. J. P. Houben et al.
The Southern Ocean plankton ecosystem underwent an abrupt and profound reorganization in the earliest Oligocene.

345 Global Charcoal Mobilization from Soils via Dissolution and Riverine Transport to the Oceans
R. Jaffé et al.
A larger-than-anticipated fraction of charcoal produced by wildfires leaches out of soils and is transported to the oceans.

>> Perspective p. 287

347 Resilience and Recovery of Overexploited Marine Populations
P. Neubauer et al.
Current fish harvests and low fish levels make fishery recovery improbable for most of the world’s depleted stocks.

>> Report p. 372

350 A KRAB/KAP1-miRNA Cascade Regulates Erythropoiesis Through Stage-Specific Control of Mitophagy
I. Barde et al.
Protein- and RNA-based transcriptional regulation governs the removal of mitochondria during red blood cell differentiation.

353 The Helicase-Like Domains of Type III Restriction Enzymes Trigger Long-Range Diffusion Along DNA
F. W. Schwarz et al.
A bacterial enzyme that cuts DNA uses a few adenosine triphosphates to allow it to scan across thousands of base pairs.

356 Structural Basis for Kinesin-1:Cargo Recognition
S. Pernigo et al.
The structure of a portion of a molecular motor complexed to a cargo peptide provides a close-up view of the interaction.

359 Actin-Propelled Invasive Membrane Protrusions Promote Fusogenic Protein Engagement During Cell-Cell Fusion
K. Shilagardi et al.
An inducible Drosohila cell-fusion system reveals the interplay between cellular fusion proteins and actin-driven membrane remodeling.

363 Bat and Rat Neurons Differ in Theta-Frequency Resonance Despite Similar Coding of Space
J. G. Heys et al.
Stellate cells in the entorhinal cortex of bats and rats show significant differences in their electrophysiological properties.

367 Representation of Three-Dimensional Space in the Hippocampus of Flying Bats
M. M. Yartsev and N. Ulanovsky
The spatial firing properties of neurons were recorded in bats during flight using a wireless neural-telemetry system.
