NEWS OF THE WEEK
906  A roundup of the week’s top stories

NEWS & ANALYSIS
908  Report Reignites Battle Over Low-Salt Diets
909  Can Animals Envision the Future? Scientists Spar Over New Data
910  Biology of Genomes Meeting
Long Noncoding RNAs May Alter Chromosome’s 3D Structure
In Latino Genomes, a Rich Source of History
911  NSF Says No to Legislator Seeking Reviewer Comments
913  Two Proofs Spark a Prime Week for Number Theory

NEWS FOCUS
914  Hubs Aim to Reinvent DOE Research Culture
919  Are Isle Royale’s Wolves Chasing Extinction?  
>> Science Podcast

LETTERS
923  Shark Mislabeling Threatens Biodiversity
H. Bornatowski et al.
Pollination Decline in Context
J. Ghazoul
Response
J. M. Sylianakis
924  CORRECTIONS AND CLARIFICATIONS
924  TECHNICAL COMMENT ABSTRACTS

BOOKS ET AL.
926  The Nature and Nurture of Love
M. Vicedo, reviewed by B. Harris

POLICY FORUM
927  Economic Rewards to Motivate Blood Donations
N. Lacetera et al.
>> Science Podcast

PERSPECTIVES
929  Culture, Genes, and the Human Revolution
S. E. Fisher and M. Ridley
930  A Sweet Send-Off
B. Kleizen and I. Braakman
>> Report p. 978
932  One Good Measure
M. R. Schreiber
>> Report p. 950
933  More Power from Below
J. N. Moore and S. F. Simmons
935  All Change for Nanocrystals
M. Ibáñez and A. Cabot
>> Report p. 964
936  Unveiling the Malaria Parasite’s Cloak of Invisibility?
N. Philip and A. P. Waters
>> Report p. 984
937  Antigen Processing Takes a New Direction
N. Goonetilleke and A. J. McMichael
>> Research Article p. 940
939  Retrospective: François Jacob (1920–2013)
L. Shapiro and R. Losick

RESEARCH ARTICLES
940  Cytomegalovirus Vectors Violate CD8+ T Cell Epitope Recognition Paradigms
S. G. Hansen et al.
A vaccine that uses one virus to deliver components of a second virus elicits T cells that recognize noncanonical epitopes.
Research Article; for full text:
http://dx.doi.org/10.1126/science.1237874
>> Perspective p. 937

CONTENTS continued >>
941 Zircon U-Pb Geochronology Links the End-Triassic Extinction with the Central Atlantic Magmatic Province
T. J. Blackburn et al.
Climate change triggered by massive volcanism set the stage for the era of dinosaurs.

945 Annually Resolved Ice Core Records of Tropical Climate Variability over the Past ~1800 Years
L. G. Thompson et al.
A record from the Quelccaya ice cap in Peru shows the variability of climate in the tropical Andes.

REPORTS

950 An Accurate Geometric Distance to the Compact Binary SS Cygni Vindicates Accretion Disc Theory
J. C. A. Miller-Jones et al.
SS Cygni is much closer than previously thought, revealing a major challenge to our understanding of accretion theory.

952 Taxel-Addressable Matrix of Vertical-Nanowire Piezotronic Transistors for Active and Adaptive Tactile Imaging
W. Wu et al.
An active, addressable pressure-sensitive device facilitates high-resolution tactile imaging.

957 Periodic Segregation of Solute Atoms in Fully Coherent Twin Boundaries
J. F. Nie et al.
Thermally driven ordering of solute atoms can lead to an unexpected strengthening of a metal alloy.

960 Separation of Hexane Isomers in a Metal-Organic Framework with Triangular Channels
Z. R. Herm et al.
A porous material shows preliminary promise for enhancing a separations process central to gasoline production.

964 Galvanic Replacement Reactions in Metal Oxide Nanocrystals
M. H. Oh et al.
Hollow mixed-metal oxide nanoparticles can be made by replacing the metal cations through redox reactions in solution.

968 The Cells and Circuitry for Itch Responses in Mice
S. K. Mishra and M. A. Hoon
Natriuretic polypeptide b is the primary neurotransmitter in TRPV1-expressing, itch-sensitive afferent nerve fibers.

972 Changes in Taste Neurons Support the Emergence of an Adaptive Behavior in Cockroaches
A. Wada-Katsumata et al.
Some German cockroaches find glucose both sweet and bitter, which allows them to avoid baited traps.

976 Ribosomal Protein SA Haploinsufficiency in Humans with Isolated Congenital Asplenia
A. Bolze et al.
A rare human disorder, characterized by the absence of a spleen at birth, is associated with mutations in a ribosomal protein.

981 Identification of a Heteromeric Complex That Promotes DNA Replication Origin Firing in Human Cells
D. Boos et al.
A protein implicated in oncogenesis is found to be critical for DNA replication in plants and animals.

984 The Human Malaria Parasite Pf647 Gene Mediates Evasion of the Mosquito Immune System
A. Molina-Cruz et al.
A surface protein of Plasmodium falciparum ookinete allows them to evade the complement-like responses of Anopheles gambiae.

987 Tetrahydrobiopterin Biosynthesis as an Off-Target of Sulfur Drugs
H. Haruki et al.
A structural analysis reveals that a wide range of sulfa drugs inhibit neurotransmitter biosynthesis.

991 Defining Single Molecular Forces Required to Activate Integrin and Notch Signaling
X. Wang and T. Ha.
A piconewton (pN) tension gauge reveals that less than 12 pN suffices to activate Notch.
