

The Ohio State University

Assistant Professor of Evolution, Ecology and Organismal Biology

The Ohio State University at Lima seeks candidates for a full-time, tenure-track Assistant Professor position in Evolutionary Biology. A research specialty in Comparative Vertebrate Biology is preferred, but not required.

The appointment will be made in the Department of Evolution, Ecology, and Organismal Biology at The Ohio State University and begin in August 2014. Candidates must have a PhD in hand at the time of appointment; post-graduate teaching experience is preferred. Salary is competitive.

The department seeks an Evolutionary Biologist with a strong commitment to the teaching, research and outreach missions of The Ohio State University. The successful candidate will teach undergraduate surveys and major courses in their area of expertise (likely courses include introductory biology for honors students, vertebrate biology, and comparative vertebrate physiology). In addition, the position will require the candidate to pursue a distinguished record of service and scholarly research.

The Ohio State University at Lima is one of five campuses of The Ohio State University. Current enrollment on the Lima campus is 1,400 students and there are approximately 100 full- and part-time faculty in all academic departments. Ohio State Lima offers the first two years of the Ohio State general education curriculum and ten programs leading to baccalaureate degrees, including one in Biology. Ohio State Lima also offers Master's degree programs in Education and Social Work.

Review of applications will begin on September 16, 2013, and will continue until the position is filled. Please send a cover letter, a current curriculum vita, and three letters of recommendation to:

Dr. Eric Juterbock, Chair, EEOB Search, c/o Whitney Clark, Office of Human Resources, Public Service Bldg. 222, The Ohio State University at Lima, 4240 Campus Drive, Lima, OH 45804.

Questions should be addressed to Dr. Eric Juterbock at Juterbock.1@osu.edu.

To build a diverse workforce Ohio State encourages applications from individuals with disabilities, minorities, veterans, and women. EEO/AA employer. For additional information about the Lima campus please see www.lima.osu.edu

CHEMISTRY
TEXAS A&M UNIVERSITY

Head of Chemistry

Applications and nominations are invited for the position of Head of the Department of Chemistry at Texas A&M University. The ideal candidate should have an internationally recognized research program, a demonstrated commitment to undergraduate and graduate education, and administrative experience.

The Department of Chemistry has 58 full-time faculty members, 270 graduate students, 65 postdoctoral associates and 250 undergraduate majors (www.chem.tamu.edu). The department houses energetic and diverse research programs in all areas of chemistry and has excellent instrument facilities. Texas A&M University, the 5th largest university in the country, has more than 50,000 students and a multi-billion dollar endowment. The College Station/Bryan area is consistently ranked among the best places to live in the country.

Applicants should e-mail a detailed curriculum vitae to: headsearch@chem.tamu.edu. Review of applications will begin **October 1, 2013** and continue until the position is filled.

The Texas A&M University System is an Affirmative Action/Equal Opportunity Employer (www.tamus.edu/offices/eo). The university is dedicated to building a culturally diverse and pluralistic faculty and staff committed to teaching and working in a multicultural environment; applications from women, minorities, individuals with disabilities, and covered veterans are strongly encouraged. Texas A&M University is aware that attracting and retaining exceptional faculty often depends on meeting the needs of two careers and having policies that contribute to work life balance. For more information, visit <http://dof.tamu.edu/content/balancing-work-and-life>. Applicants must have a doctoral degree in chemistry or a related field.

Max Planck Institute of Immunobiology and Epigenetics

Max-Planck-Institut für Immunbiologie und Epigenetik

We are looking for a

Postdoctoral Position in Bioinformatics

The Max Planck Institute of Immunobiology and Epigenetics in Freiburg, Germany is offering a Postdoctoral Position in Bioinformatics in the Laboratory of Chromatin Regulation (Head: Dr. Asifa Akhtar). The position is available for an initial two-year appointment with the possibility of extension.

The MPI in Freiburg is an international research institute at the cross-road of Southern Germany, Switzerland and France. The working language is English. State-of-the-art infrastructure and service units, including transgenesis, mass spectrometry, proteomics, flow cytometry, fly and imaging facilities are available.

Your tasks:

The research focus of the Akhtar laboratory includes mechanisms underlying chromatin and epigenetic regulation. We are particularly interested in X chromosomal regulation using flies and mouse models employing multidisciplinary approaches such as genetics, biochemistry, functional genomics as well as cell biology and structural biology.

We are looking for enthusiastic, highly-motivated, science-driven and experienced postdoctoral fellows to join our team to unravel the molecular mechanisms that regulate gene expression.

Your qualifications: Applicants should have a PhD or equivalent doctoral degree with at least 3 years of proven research experience in bioinformatics and analyses of genome-wide data (ChIPseq, RNA seq). Prior experience working in Drosophila or mammalian models is highly encouraged. Candidates must have a strong publication record. Furthermore, the ability to work in a team, communication skills and experience in the supervision of graduate students are an asset.

Please submit your application, including a statement of research interests, a CV and three references to our homepage:

<http://www.ie-freiburg.mpg.de/jobs>

We offer: Salaries will be according to postdoctoral fellowships of the Max Planck Society or TVöD and will commensurate with experience.

Application deadline: 31.08.2013

Our institute investigates the molecular basis of the immune response and other topics of the developmental biology, such as the origin and differentiation of the immune cells as well as the development of vertebrate embryo. Another main focus of the institute is Epigenetic. This area deals with inheritable traits, which are not caused by changes in the DNA sequence.

Handicapped applicants with equal qualifications will be given preferential treatment. The Max Planck Society seeks to increase the number of women in areas, where they are underrepresented, and therefore explicitly encourages women to apply. A childcare facility is directly attached to the institute.

If you would like to work in a dedicated team, please convince us now by sending us your complete application documents together with your salary expectations and your earliest possible date of joining the institute.

Max Planck Institute of Immunobiology and Epigenetics
Ms. Klank
