SPECIAL SECTION

Natural Systems in Changing Climates

INTRODUCTION
472 Once and Future Climate Change

NEWS
474 How a Fickle Climate Made Us Human
478 Can Coastal Marshes Rise Above It All?
482 Worth a Thousand Words

NEWS & ANALYSIS
486 Changes in Ecologically Critical Terrestrial Climate Conditions
492 Marine Ecosystem Responses to Cenozoic Global Change

REVIEWS
499 Climate Change and the Past, Present, and Future of Biotic Interactions
504 The Future of Species Under Climate Change: Resilience or Decline?
508 Climate Change Impacts on Global Food Security
514 Climate Change and Infectious Diseases: From Evidence to a Predictive Framework
519 Ecological Consequences of Sea-Ice Decline

NEWS FOCUS
450 Venturing Back Into Colombia
454 The Pertussis Paradox

LETTERS
456 National Park Service Needs Proactive Strategy
458 Novel Ecosystems
459 Permanent Present Tense

BOOKS ET AL.
458 Novel Ecosystems

Published by AAAS
RESEARCH ARTICLES

525 A Role for SIRT2-Dependent Histone H3K18 Deacetylation in Bacterial Infection
H. A. Eskandarian et al.
The bacterial pathogen Listeria monocytogenes exploits histone modifications to reprogram its host.
Research Article Summary; for full text: http://dx.doi.org/10.1126/science.1238858

526 The Evolution of Social Monogamy in Mammals
D. Lukas and T. H. Clutton-Brock
Social monogamy developed in mammalian species where males could not defend access to multiple females.
>> Perspective p. 469

REPORTS

530 Hierarchical Porous Polymer Scaffolds from Block Copolymers
H. Sai et al.
Spinodal decomposition of block copolymers and oligomeric additives produces three-dimensional hierarchical porous polymers.

534 Liquid-Mediated Dense Integration of Graphene Materials for Compact Capacitive Energy Storage
X. Yang et al.
Electrochemical capacitors made with compressed gels of chemically converted graphene exhibit high energy density.

537 Detection of a Spinning Object Using Light’s Orbital Angular Momentum
M. P. J. Lavery et al.
Orbital angular momentum modes of light can be used to detect rotation.
>> Perspective p. 464

540 Efficient Generation of H2 by Splitting Water with an Isotothermal Redox Cycle
C. L. Muhich et al.
A thermal process for generating H2 from water uses pressure changes to recycle between catalyst redox states.
>> Perspective p. 470

542 Anthropogenic Seismicity Rates and Operational Parameters at the Salton Sea Geothermal Field
E. E. Brodsky and L. J. Lajoie
The net volume of geothermal fluid extracted is the most direct control on induced seismicity rate.

546 Two Dimensions of Value: Dopamine Neurons Represent Reward But Not Aversiveness
C. D. Fiorillo
Experiments in monkeys suggest that positive and negative expectations are represented by different types of neurons.

549 Functional Lysine Modification by an Intrinsically Reactive Primary Glycolytic Metabolite
R. E. Moellerling and B. F. Cravatt
A reactive intermediate formed during glycolysis reacts nonenzymatically to inhibit glycolytic enzymes.

554 Cytochrome P450 Drives a HIF-Regulated Behavioral Response to Reoxygenation by C. elegans
D. K. Ma et al.
A worm model of ischemia-reperfusion injury reveals protective mechanisms potentially relevant to stroke and heart attack.

558 The Microbial Metabolites, Short-Chain Fatty Acids, Regulate Colonic Treg Cell Homeostasis
P. M. Smith et al.
Bacterial fermentation products regulate the number and function of regulatory T cells in the mouse colon.
>> Perspective p. 463
