Heteroepitaxial Growth of Two-Dimensional Performing Mathematical Operations Giant Spin Oscillations in an Association of the Autoimmune Disease Glacier ice shelf in 2012. the rate of melting under the Pine Island Colder surface ocean waters decreased P. Dutrieux Melting to Climatic Variability with transient water vapor plumes. Hubble Space Telescope images of Jupiter’s moon Europa reveal emission consistent L. Roth et al. Independent allelic transcription generates fluctuations in the single-cell transcriptome. Modular Organization of Axial Microcircuits in Zebrafish M. W. Bagnall and D. L. McLean Larval zebrafish show more refined musculature control than expected. Apical Abscission Alters Cell Polarity and Dismantles the Primary Cilium During Neurogenesis R. M. Das and K. G. Storey During vertebrate neuronal development, the apical membrane is shed, allowing further differentiation. >> Perspective p. 146

171 Transient Water Vapor at Europa’s South Pole L. Roth et al. Hubble Space Telescope images of Jupiter’s moon Europa reveal emission consistent with transient water vapor plumes. >> Perspective p. 148

174 Strong Sensitivity of Pine Island Ice-Shelf Melting to Climatic Variability P. Dutrieux et al. Colder surface ocean waters decreased the rate of melting under the Pine Island Glacier ice shelf in 2012.

178 A Spatial Accommodation by Neighboring Cells Is Required for Organ Initiation in Arabidopsis J. E. M. Vermeer et al. Localized disruption of surrounding plant cell walls paves the way for lateral root development.

183 Bacterial Vesicles in Marine Ecosystems S. J. Biller et al. The abundant marine cyanobacterium Prochlorococcus sheds membrane vesicles that may contribute to carbon budgets. >> Perspective p. 143; Science Podcast

186 Progenitor Outgrowth from the Niche in Drosophila Trachea Is Guided by FGF from Decaying Branches F. Chen and M. A. Krasnow Progenitor cells in flies form new trachea by following an embryonic inducer reactivated in decaying branches. Mutual Analysis Reveals the Origin and Therapy-Driven Evolution of Recurrent Glioma B. E. Johnson et al. Primary brain tumors and their recurrences can exhibit vastly different mutational profiles.

197 Apical Abscission Alters Cell Polarity and Dismantles the Primary Cilium During Neurogenesis R. M. Das and K. G. Storey During vertebrate neuronal development, the apical membrane is shed, allowing further differentiation. >> Perspective p. 146

204 Internalization of Salmonella by Macrophages Induces Formation of Nonreplicating Persisters S. Helaine et al. Upon internalization, intracellular Salmonella choose between replication or a form of quiescence known as persistence.
