504 Development-Inspired Reprogramming of the Mammalian Central Nervous System
R. Amamoto and P. Arlotta

505 Timing Mechanism Dependent on Cell Division Is Invoked by Polycym Eviction in Plant Stem Cells
B. Sun et al.

506 Exome Sequencing Links Corticospinal Motor Neuron Disease to Common Neurodegenerative Disorders
G. Novarino et al.

507 Ultrafast Long-Range Charge Separation in Organic Semiconductor Photovoltaic Diodes
S. Gélinas et al.

508 Sound Isolation and Giant Linear Nonreciprocity in a Compact Acoustic Circulator
R. Fleury et al.

509 Unlocking the Potential of Cation-Disordered Oxides for Rechargeable Lithium Batteries
J. Lee et al.

510 Low Core–Mantle Boundary Temperature Inferred from the Solidus of Pyrolite
R. Nomura et al.

511 A Mechanosensory Pathway to the Drosophila Circadian Clock
A. Simoni et al.

512 Marine Tubeworm Metamorphosis Induced by Arrays of Bacterial Phage Tail–Like Structures
N. J. Shikuma et al.

513 Reversal of Female Infertility by Chk2 Ablation Reveals the Oocyte DNA DamageCheckpoint Pathway
E. Bolcun-Filas et al.

514 Males Shorten the Life Span of C. elegans Hermaphrodites via Secreted Compounds
T. J. Maures et al.

515 Savanna Vegetation-Fire-Climate Relationships Differ Among Continents
C. E. R. Lehmann et al.

516 Male nematodes produce a soluble signal that shortens the life span of worms of the opposite sex.

517 Drosophila Life Span and Physiology Are Modulated by Sexual Perception and Reward
C. M. Gendron et al.

518 Male nematodes produce a soluble signal that shortens the life span of worms of the opposite sex.

519 Effector Specialization in a Lineage of the Irish Potato Famine Pathogen
S. Dong et al.

520 Savanna Vegetation-Fire-Climate Relationships Differ Among Continents
C. E. R. Lehmann et al.

521 Male nematodes produce a soluble signal that shortens the life span of worms of the opposite sex.

522 Low Core–Mantle Boundary Temperature Inferred from the Solidus of Pyrolite
R. Nomura et al.

523 High-pressure experiments suggest that Earth’s mantle melts at lower temperatures than previously predicted.
