ON THE WEB THIS WEEK

>> Science Podcast

On this week's show: the genome sequence of the tsetse fly and a roundup of stories from our daily news site.

>> Find More Online

Check out *Science Express*, the weekly podcast, videos, daily news, our research journals, and *Science Careers* at www.sciencemag.org.

COVER

A pregnant female tsetse fly (*Glossina morsitans*), roughly equivalent in size to a housefly. Tsetse flies are the sole carriers of human African trypanosomiasis (sleeping sickness). See pages 349 and 380 for a description of the sequencing and annotation of the tsetse fly genome.

DEPARTMENTS

- 338 This Week in *Science*
- 340 Editors' Choice
- 342 *Science* Staff
- 375 AAAS News & Notes
- 431 New Products
- 432 *Science* Careers

RESEARCH ARTICLES

- 376 **Cryo-EM Study of the Chromatin Fiber Reveals a Double Helix Twisted by Tetranucleosomal Units**
F. Song et al.
The structure of a segment of chromatin reveals the importance of the linker histone in determining its conformation.
>> *Perspective p. 370*
- 380 **Genome Sequence of the Tsetse Fly (*Glossina morsitans*): Vector of African Trypanosomiasis**
International Glossina Genome Initiative
Blood-sucking tsetse flies transmit protozoan parasites, harbor multiple symbionts, reproduce viviparously, and lactate.
>> *News story p. 349*
- 386 **Discovery of Brainwide Neural-Behavioral Maps via Multiscale Unsupervised Structure Learning**
J. T. Vogelstein et al.
An atlas is generated to reveal activation of which specific neurons in a *Drosophila* larva produce specific behaviors.
>> *Perspective p. 372*

REPORTS

- 392 **A Dual-Catalysis Approach to Enantioselective [2 + 2] Photocycloadditions Using Visible Light**
J. Du et al.
A two-catalyst combination offers long-sought selectivity in intermolecular coupling of olefins to form four-membered rings.
>> *Perspective p. 368*
- 396 **Detection of the Gravitational Lens Magnifying a Type Ia Supernova**
R. M. Quimby et al.
An unusually bright supernova faded away to reveal a foreground galaxy responsible for bending and amplifying its light.
- 400 **The Lunar Apatite Paradox**
J. W. Boyce et al.
Hydrogen-rich apatite crystals in lunar volcanic rocks indicate self-inflicted loss of fluorine from basaltic melts.
>> *Perspective p. 365*
- 402 **Preservation of a Preglacial Landscape Under the Center of the Greenland Ice Sheet**
P. R. Bierman et al.
Soil has been frozen to the central part of the bed of the Greenland Ice Sheet for at least 2.7 million years.

- 406 **Organic Matter Stoichiometry, Flux, and Oxygen Control Nitrogen Loss in the Ocean**
A. R. Babbin et al.
The variable ratio of denitrification to anammox in the ocean is due to variations in organic matter quality and quantity.
- 409 **Conversion of Channelrhodopsin into a Light-Gated Chloride Channel**
J. Wietek et al.
A class of directly light-gated anion channels can be used to block neuronal output in a fully reversible fashion.
>> *Perspective p. 369; Report p. 420*
- 413 **High-Resolution Genomic Analysis of Human Mitochondrial RNA Sequence Variation**
A. Hodgkinson et al.
Mitochondrial posttranscriptional variation is common among humans and can be attributed to a nuclear gene.
- 416 **Single-Cell Genomics Reveals Hundreds of Coexisting Subpopulations in Wild *Prochlorococcus***
N. Kashtan et al.
Covariation between the core alleles and flexible gene content of a marine cyanobacterium underpins vast diversity.
>> *Perspective p. 366*
- 420 **Structure-Guided Transformation of Channelrhodopsin into a Light-Activated Chloride Channel**
A. Berndt et al.
A class of directly light-gated anion channels can be used to block neuronal output in a fully reversible fashion.
>> *Perspective p. 369; Report p. 409*
- 424 **Neural Mechanisms of Object-Based Attention**
D. Baldauf and R. Desimone
Brain imaging reveals how the brain can selectively attend to one of two overlapping objects.
- 427 **A Chloroplast Retrograde Signal Regulates Nuclear Alternative Splicing**
E. Pettilo et al.
In plants, light-dependent regulation of nuclear alternative splicing involves a signal generated within the chloroplast.
