NEWS

IN BRIEF
950 Roundup of the week's news

IN DEPTH
953 TIANANMEN'S BITTER LEGACY
The bloody crackdown 25 years ago left an indelible mark on China's research culture By M. Hvistendahl
► SCIENCE PODCAST

954 BRAIN PROJECT MEETS PHYSICS
Physicists provide a reality check for brain mappers By E. Underwood

955 PLAN TO INTERNATIONALIZE U.S. PROJECT MAY FACE HEADWIND
Washington may be reluctant to share physics facility on U.S. soil By A. Cho

957 PSYCHOLOGIST'S DEFENSE
CHALLENGED
E-mails counter claimed location, timing of studies By F. van Kolfschooten

959 WHERE'S FRANCE CóRDOVA?
IN THE WASHINGTON HOT SEAT
New NSF director jumps into the frying pan served up by Congress By J. Mervis

FEATURES

963 LOST AT SEA
As the hunt for the missing Malaysian jet grows more challenging, authorities are pondering how to avert future aviation vanishing acts By D. Normile
► EDITORIAL P. 947

INSIGHTS

967 TARGET SMALL FIRMS FOR ANTIBIOTIC INNOVATION
Once in clinical trials, antibiotics are more likely to survive than drugs in other classes By T. J. Huang et al.

969 MAPPING BOND ORIENTATIONS WITH POLARIZED X-RAYS
Regions of bond order and disorder are revealed By S. Lidin
► REPORT P. 1013

970 CLUES FROM THE RESILIENT
Genetic information from individuals who do not succumb to disease may point to new therapies and ideas about wellness By S. H. Friend and E. E. Schadt

972 A BACTERIAL SEEK-AND-DESTROY SYSTEM FOR FOREIGN DNA
Bacterial argonaute proteins defend the cell against exogenous DNA By J. Vogel

974 HOW SULFUR BEATS IRON
Iron-reducing bacteria switch to sulfur reduction as their main energy source in alkaline environments By M. W. Friedrich and K. W. Finster
► REPORT P. 1039

975 MANAGING THE SIDE EFFECTS OF INVASION CONTROL
Efforts to control invasive species must be adapted to avoid unintended damage to native species and ecosystems By Y. M. Buckley and Y. Han
► REPORT P. 1028

976 HITTING THE LIMIT OF MAGNETIC ANISOTROPY
Enhancing the magnetic properties of adatoms provides a route toward atom-scale memory By A. A. Khajetoorians and J. Wiebe
► RESEARCH ARTICLE P. 988

BOOKS ET AL.
978 FOUR FIELDS
By T. Dee, reviewed by S. Knapp

LETTERS
981 RETRACTION
By M. McNutt

981 CKD IN SRI LANKA
By M. C. M. Iqbal and C. B. Dissanayake

981 FEAR BEYOND PREDATORS
By K. J. Hockings et al.

981 TECHNICAL COMMENT ABSTRACTS

DEPARTMENTS
947 EDITORIAL
The hunt for MH370 By Marcia McNutt
► NEWS STORY P. 963

1054 WORKING LIFE
Winter is coming By Christina Reed

1054 & 963

ILLUSTRATION: (BOTTOM RIGHT) MARC ROSENTHAL

Published by AAAS
9001 SOLAR CELLS
Coherent ultrafast charge transfer in an organic photovoltaic blend
S. M. Fülle et al.

9005 WATER SPLITTING
Amorphous TiO₂ coatings stabilize Si, GaAs, and GaP photoanodes for efficient water oxidation
S. Hu et al.

9009 WATER STRUCTURE
Vibrational spectral signature of the proton defect in the three-dimensional H⁺(H₂O)₃₂ cluster
J. A. Fournier et al.

9103 IMAGING TECHNIQUES
X-ray birefringence imaging
B. A. Palmer et al.
▶ PERSPECTIVE P. 969

9116 MARINE BIOGEOGRAPHY
Quaternary coral reef refugia preserved fish diversity
L. Pellissier et al.

9120 NEURAL DEVELOPMENT
Retrograde semaphorin signaling regulates synapse elimination in the developing mouse brain
N. Uesaka et al.

9123 SYNAPSES
Composition of isolated synaptic boutons reveals the amounts of vesicle trafficking proteins
B. G. Wilhelm et al.

9200 CONSERVATION ECOLOGY
Optimal approaches for balancing invasive species eradication and endangered species management
A. Lampert et al.
▶ PERSPECTIVE P. 975

9203 STRUCTURAL BIOLOGY
Structures of PI4KIIIβ complexes show simultaneous recruitment of Rab11 and its effectors
J. E. Burke et al.

9209 SUBSURFACE MICROBES
Sulfur-mediated electron shuttling during bacterial iron reduction
T. M. Flynn et al.
▶ PERSPECTIVE P. 974

9242 TRANSCRIPTION
A pause sequence enriched at translation start sites drives transcription dynamics in vivo
M. H. Larson et al.

ON THE COVER
A realistic, molecular-scale view of a synapse, showing a few hundred thousand proteins. The synapse organization was measured by a combination of electron microscopy, quantitative biochemistry, and super-resolution microscopy. This three-dimensional computational model now enables a quantitative understanding of synaptic processes. See page 1023. Image: Burkhard Rammner/Rizzoli Laboratory, University of Göttingen Medical Center
Science 344 (6187), 947-1054.
