1234 GARY BECKER (1930–2014)
An economist used sociology and economics to examine life and explain human behavior
By E. L. Glaeser and A. Shleifer

BOOKS ET AL.
1234 HOMOLOGY, GENES, AND EVOLUTIONARY INNOVATION
By G. P. Wagner, reviewed by C. Simpson and D. H. Erwin

1235 THE HIDDEN MECHANICS OF EXERCISE
By C. M. Gillen, reviewed by S. D. R. Harridge

LETTERS
1236 MAKING WAVES ABOUT SPREADING WEEDS
By L. A. Meyerson et al.

1236 RESPONSE
By D. S. Johnson

1236 POSTED ONLINE: IMMUNOTHERAPY

DEPARTMENTS
1207 EDITORIAL
Time to speak up for research
By John Edward Porter

1218 MISSION TO MERS
A massive study in camels and people is yielding the best data yet on how a new virus spreads
By M. Enserink

1221 A TOUCH OF THE RANDOM
Some researchers are calling for a fresh, statistics-based approach to climate modeling
By C. Macilwain

1221 A TOUCH OF THE RANDOM
Some researchers are calling for a fresh, statistics-based approach to climate modeling
By C. Macilwain

1224 THE QUANTUM NONDEMOLITION DERBY
Monitored resonators can evade back-action from shot noise in the detection laser
By D. Bouwmeester

1226 MOLECULAR BASIS OF TRANSCRIPTION PAUSING
RNA polymerase progression is regulated by a ubiquitous DNA consensus sequence to mediate RNA utilization
By J. W. Roberts

1228 A SALTY START TO MODERN OCEAN CIRCULATION
Water flow out of the Mediterranean is linked to large-scale ocean circulation patterns
By G. Filippelli

1229 IT HELPS TO BE WELL CONNECTED
Highly connected populations of the weedy plant Plantago are less likely to be colonized by a fungal pathogen
By M. A. Duffy

1230 MEASURING THE PATH TOWARD MALARIA ELIMINATION
Developing new targets and milestones from standard surveillance data
By T. S. Churcher et al.

1314 WORKING LIFE
The fun of science
By Cathy Walker

Science Staff ............................................ 1204
New Products ........................................... 1301
Science Careers ....................................... 1302
1235 From Science and other journals

RESEARCH

IN BRIEF

1250 NEURONAL REPAIR
Asynchronous therapy restores motor control by rewiring of the rat corticospinal tract after stroke A. S. Wahl et al.

RESEARCH ARTICLES

1256 QUANTUM NONLOCALITY
Detecting nonlocality in many-body quantum states J. Tura et al.

1259 QUANTUM GASES
Observation of many-body dynamics in long-range tunneling after a quantum quench F. Meinert et al.

1260 QUANTUM MECHANICS
Mechanically detecting and avoiding the quantum fluctuations of a microwave field J. Sub et al.

1265 EARTH’S INTERIOR
Dehydration melting at the top of the lower mantle B. Schmandt et al.

1267 NONHUMAN GENETICS
Strong male bias drives germline mutation in chimpanzees O. Venn et al.

1268 DINOSAUR PHYSIOLOGY
Evidence for mesothermy in dinosaurs J. M. Grady et al.

1275 NEURAL MIGRATION
Structures of netrin-1 bound to two receptors provide insight into its axon guidance mechanism K. Xu et al.

1280 HUMAN GENETICS
The genetics of Mexico recapitulates Native American substructure and affects biomedical traits A. Moreno-Estrada et al.

ON THE COVER
Immunofluorescence microscopy image of squamous cell carcinoma (SCC). SCCs contain tumor-initiating stem cells and their early progeny, which, like normal cells, reside along the tumor-stroma interface and express high levels of integrins (white) and progenitor keratins (green). Stem cells with high tumor-initiating capacity are shown in red; nuclear DNA is in blue. Average cell size within the tumor, 10 micrometers. See page 1243 and http://dx.doi.org/10.1126/science.1242281.
