Archaeologists are rediscovering the ancient Maritime Silk Road, which once powered more commerce than the famed Central Asian land route By A. Lawler

INSIGHTS

PERSPECTIVES
1446 EXPLOITING AND EXPLORING THE OPTIONS
How does the human brain reason when to change strategies? By T. Hare

1448 PREDICTING MICROBIAL GROWTH
Integration of a plethora of genomic and biochemical data enables large-scale prediction of cellular functions By J. Monk and B. O. Palsson

1449 TARGETING VASCULAR SPROUTS
Manipulating metabolism could control angiogenesis By L. B. Rivera and G. Bergers

1451 PHASE-TRANSFORMING ELECTRODES
Structural studies suggest a route to improve the performance of rechargeable batteries By J. Owen and A. Hector

1452 ANTICIPATING THE NEXT CENTURY OF WASTEWATER TREATMENT
Advances in activated sludge sewage treatment can improve its energy use and resource recovery By M. C. M. van Loosdrecht and D. Brdjanovic

1454 FOLLOW THE ODOR
How do moths and other insects find their way to food sources in the presence of other odors? By P. Szyszka

1455 HARNESSING DNA TO IMPROVE ENVIRONMENTAL MANAGEMENT
Genetic monitoring can help public agencies implement environmental laws By R. P. Kelly et al.

1474 The bond breaker
By R. Service

ON THE COVER
Natural gas extracted from a deep shale formation by hydraulic fracturing (“fracking”) technology burns at a well in Bradford County, Pennsylvania. Fracking is enabling a shale gas production boom, remaking energy markets, and stoking environmental concerns. See page 1464. Photo: © Les Stone/Corbis
