1299 Antibiotic effectiveness: Balancing conservation against innovation R. Laxminarayan
1302 Creating a global observatory for health R&D R. F. Terry et al.

ON THE COVER

A woman cares for her 5-year-old grandson, who has malaria, in a hospital in northwestern Zambia. An upsurge in funding for global health over the past 15 years has brought dramatic declines in deaths and illness from malaria and other diseases of the poor. Countries like Zambia are now trying to preserve those gains while tackling new challenges. See page 1256.
