As science grows in China, ethics education aims to keep up

By Brian Lin and Becky Ham

A massive national effort in China to improve scientific integrity has brought the issue to the attention of a staggering number of researchers in that country: In less than 4 years, more than 8 million undergraduate and graduate students have listened to 20,000 lectures on the topic.

But experts at a recent meeting held at AAAS said that ethics education should start even earlier for Chinese and American researchers and that such education faces stiff challenges from a research environment that, in some instances, serves as a breeding ground for authorship disputes and misuse of data, among other problems.

With international scientific collaborations on the rise, the issue of integrity is increasingly important, the meeting’s participants agreed. “The only way the scientific enterprise can contribute to worldwide problems is for...scientists to be willing, able, and enthusiastic about collaborating on a worldwide scale,” said AAAS CEO Alan I. Leshner. “Central to any collaboration are issues like trust, shared values, norms, and standards that drive the practice.”

The China-U.S. Scientific Morality/Integrity Development Seminar was the fourth such meeting convened since the Scientists’ Social and Ethical Responsibilities conference organized by the China Association for Science & Technology (CAST) and AAAS in 2007. Since then, CAST and AAAS have collaborated on several workshops on scientific integrity, and in 2010 established a joint steering committee to coordinate ethics work.

Total research funding for Chinese universities ballooned from US$7.6 billion in 2009 to US$12.7 billion in 2012, said Guangxian Li, the executive vice president of Sichuan University, who spoke at the 8 to 9 October seminar on behalf of Shen Yan, vice chairman of CAST and deputy director of the National Natural Science Foundation of China. Research papers published by Chinese universities saw a 10% increase—to more than 1.1 million—during the same period.

The desire to achieve higher international standings has put enormous pressures on Chinese researchers to publish, said Li. The QS World University Rankings and Times Higher Education World University Rankings, for example, base 60 to 70% of their scores on research and citations.

But a national Chinese survey of more than 30,000 Chinese researchers found 51% of respondents admitted to frequently or occasionally improperly attributing sources, while 42% submitted manuscripts to multiple journals. Another survey of nearly 5500 graduate students from 24 universities, conducted a year later, revealed a similar trend.

An ambitious national campaign launched in 2011 by the Chinese Ministry of Education, Li said, is raising awareness of these issues. Six thousand graduate students from 60 universities have attended annual lectures on research ethics, held at the iconic Great Hall of the People, in Beijing. But education should start even earlier in a student’s career, said Diange Yang, a professor in Tsinghua University’s department of automotive engineering and deputy dean responsible for research work and international cooperation. “Strengthening academic integrity education of graduate students...should be the responsibility of the whole society, and it should be done from childhood,” said Yang.

The United States is unlikely to hold national ethics lectures as has happened in China, but AAAS has joined the National Science Foundation and the Office of Research Integrity in conducting ethics education for scientists, said Mark S. Frankel, director of the AAAS Scientific Responsibility, Human Rights and Law Program. By the end of the year, AAAS will post on its website seven case studies from a 2012 workshop that address issues of authorship, conflict of interest, collaboration, and plagiarism. And Frankel, Leshner, and Yang Wei, director of China’s National Natural Science Foundation, are co-authors of a chapter on Chinese and American research integrity and ethics education that will be published in the “Handbook of Academic Integrity” in 2015.

Though essential, education in responsible research conduct is not enough, said Philip Langlais, professor of psychology and former vice provost of graduate studies and research at Old Dominion University. A 2006 survey he conducted with 222 faculty and 534 graduate students in the United States found that while up to 90% of faculty reported providing training in responsible research conduct, up to 35% of students claimed they received no training. Only 8% of students and faculty reported having discussed and reached consensus on topics such as authorship, ownership, and use of data.

“We’ve been targeting individuals, but not other layers of influence,” Langlais said. “Scientists who have received proper training in responsible conduct of research have violated best practices and principles of scientific integrity as a result of a ‘toxic’ research environment” of higher workloads, shifting university priorities, and increasing competition for funding.

In both China and the United States, “you can’t change climate and culture overnight,” he said. “But, you can make small, incremental changes.”
AAAS members elected as Fellows

In October 2014, the AAAS Council elected 401 members as Fellows of AAAS. These individuals will be recognized for their contributions to science and technology at the Fellows Forum to be held on 14 February 2015 during the AAAS Annual Meeting in San Jose, California. Presented by section affiliation, they are:

**Section on Agriculture, Food, and Renewable Resources**
Andrew F. Bent, Univ. of Wisconsin-Madison
Douglas R. Call, Washington State Univ.
Andrew D. Hanson, Univ. of Florida
Daniel A. Herms, Ohio State Univ.
Ann M. Hirsch, Univ. of California, Los Angeles
Harold Corby Kistler, USDA Agricultural Research Service
Ian H. Mather, Univ. of Maryland
Bruce A. McPheron, Ohio State Univ.
Charles Michael Smith, Kansas State Univ.
Christopher K. Tuggle, Iowa State Univ.
Diane E. Ullman, Univ. of California, Davis
Esther van der Knaap, Ohio State Univ.

**Section on Anthropology**
David G. Anderson, Univ. of Tennessee, Knoxville
Robert L. Anemone, Univ. of North Carolina at Greensboro
Robert G. Franciscus, Univ. of Iowa
Dale L. Hutchinson, Univ. of North Carolina at Chapel Hill
Bertis Britt Little, Tarleton State Univ.
Dwight W. Read, Univ. of California, Los Angeles
Daniel H. Sandweiss, Univ. of Maine
Pauline W. Wiessner, Univ. of Utah

**Section on Astronomy**
Tom Abel, Stanford Univ./Kavli Institute for Particle Astrophysics & Cosmology/SLAC National Accelerator Laboratory
Andreas J. Albrecht, Univ. of California, Davis
Stanislav George Djorgovski, California Institute of Technology
Martin S. Elvis, Harvard-Smithsonian Center for Astrophysics
Paul G. Kalas, Univ. of California, Berkeley/SETI Institute
Margaret Meixner, Space Telescope Science Institute/Johns Hopkins Univ.

**Section on Atmospheric and Hydrospheric Sciences**
William D. Collins, Lawrence Berkeley National Laboratory/Univ. of California, Berkeley
Kelvin K. Droegemeier, Univ. of Oklahoma
Willard S. Moore, Univ. of South Carolina
Drew T. Shindell, Duke Univ.
Frank J. Wentz, Remote Sensing Systems
Diane E. Wickland, NASA

**Section on Biological Sciences**
Alan A. Aderem, Seattle Biomedical Research Institute
Russ B. Altman, Stanford Univ.
Scott Allen Armstrong, Memorial Sloan Kettering Cancer Center
Bernard P. Arulandamud, Univ. of Texas at San Antonio
Alan D. Attie, Univ. of Wisconsin-Madison
David Mansfield Bader, Vanderbilt Univ.
School of Medicine
Gregory F. Ball, Univ. of Maryland, College Park
Marisa Susan Bartolomei, Univ. of Pennsylvania Perelman School of Medicine
Steven A. Benner, Foundation for Applied Molecular Evolution
Christoph Benning, Michigan State Univ.
Aviv Bergman, Albert Einstein College of Medicine
Jeffrey D. Blaustein, Univ. of Massachusetts Amherst
Richard Merrill Breyer, Vanderbilt Univ.
Craig Eugene Cameron, Pennsylvania State Univ.
Lon R. Cardon, GlaxoSmithKline
Douglas R. Cavener, Pennsylvania State Univ.
Aravinda Chakravarti, Johns Hopkins Univ.
School of Medicine
Cheng-Ming Chuong, Univ. of Southern California
Gino A. Cortopassi, Univ. of California, Davis
Robert J. Cousins, Univ. of Florida
Richard D. Cummings, Emory Univ. School of Medicine
Stephen P. Daiger, Univ. of Texas Health Science Center at Houston
Ann Dean, National Institute of Diabetes and Digestive and Kidney Diseases/NIH
Lynn Eleanor DeLisi, VA Boston Healthcare System/Harvard Medical School
Ronald A. DePinho, Univ. of Texas MD Anderson Cancer Center
Burton F. Dickey, Univ. of Texas MD Anderson Cancer Center
Valerian V. Dolja, Oregon State Univ.
David C. Dorman, North Carolina State Univ.
Gregory Roland Dressler, Univ. of Michigan
Daniela Drummond-Barbosa, Johns Hopkins Univ.
José Dupuis, Boston Univ.
School of Public Health
Geoffrey M. Duyk, Texas Pacific Group (TPG)
Irene Anne Eckstrand, National Institute of General Medical Sciences/NIH
Sean R. Eddy, HHMI Janelia Research Campus
Alan N.Engelman, Dana-Farber Cancer Institute
Peter J. Espenshade, Johns Hopkins Univ.
School of Medicine

Rosann A. Farber, Univ. of North Carolina at Chapel Hill
Joanna Floros, Pennsylvania State Univ.
College of Medicine
Jeffrey M. Friedman, Rockefeller Univ.
Haian Fu, Emory Univ. School of Medicine
David J. Garfinkel, Univ. of Georgia
Deborah E. Goldberg, Univ. of Michigan
Margaret A. Goodell, Baylor College of Medicine
Dan Graur, Univ. of Houston
Marilyn R. Gunner, City College of New York
Marnie E. Halpern, Carnegie Institution for Science
T. Kendall Harden, Univ. of North Carolina at Chapel Hill
A. Wallace Hayes, Harvard Univ.
Chuan He, Univ. of Chicago
John R. Hepler, Emory Univ. School of Medicine
Oliver Hertob, Columbia Univ. Medical Center
Stefan Hohmann, Univ. of Gothenburg (Sweden)
Richard L. Hoover, Vanderbilt Univ. Medical Center
Ya-Ming Hou, Thomas Jefferson Univ.
Elizabeth Ehrhardt Howell, Univ. of Tennessee, Knoxville
Trey Ideker, Univ. of California, San Diego
W. Gray Jerome, Vanderbilt Univ. School of Medicine
Teh-hui Kao, Pennsylvania State Univ.
Jack H. Kaplan, Univ. of Illinois at Chicago
Paul Andrew Karplus, Oregon State Univ.
Tom Klaus William Kerrppola, Univ. of Michigan
Shohei Koide, Univ. of Chicago
Stephen F. Konieczny, Purdue Univ.
Bruce R. Korf, Univ. of Alabama at Birmingham
Robert G. Kranz, Washington Univ. in St. Louis
Lee Kroos, Michigan State Univ.
David Landsman, National Center for Biotechnology Information/NIH
David H. Ledbetter, Geisinger Health System
Brendan Lee, Baylor College of Medicine
Michael J. Leibowitz, Univ. of California, Davis
Norman G. Lewis, Washington State Univ.
Erwin London, Stony Brook Univ.
Maryuan Long, Univ. of Chicago
William L. Lowe Jr., Northwestern Univ.
Feinberg School of Medicine
Bruce J. MacFadden, Florida Museum of Natural History, Univ. of Florida
Nicholas Gordon Martin, Queensland Institute of Medical Research (Australia)
Andrea M. Mastro, Pennsylvania State Univ.
U. Thomas Meier, Albert Einstein College of Medicine
Karen L. Moltke, Univ. of North Carolina at Chapel Hill
Andrew W. Murray, Harvard Univ.

Published by AAAS
Thomas Cronin, U.S. Geological Survey
Rane L. Curl, Univ. of Michigan
Samantha B. Joye, Univ. of Georgia
Michael Keller, USDA Forest Service
Kenneth P. Kodama, Lehigh Univ.
Daniel A. Lashof, Natural Resources Defense Council
David López-Carr, Univ. of California, Santa Barbara
Derek R. Lovley, Univ. of Massachusetts Amherst
Melanie A. Mayes, Oak Ridge National Laboratory
Nora Noffke, Old Dominion Univ.
Harry H. Roberts, Louisiana State Univ.
George D. Stanley Jr., Univ. of Montana
Brian William Stump, Southern Methodist Univ.
Thomas William Swetnam, Univ. of Arizona
James W. C. White, Univ. of Colorado Boulder
Carol M. Wicks, Louisiana State Univ.

Section on History and Philosophy of Science
Cathryn Carson, Univ. of California, Berkeley
Robert J. Malone, History of Science Society/Univ. of Notre Dame
Joseph C. Pitt, Virginia Tech
C. Kenneth Waters, Univ. of Minnesota

Section on Industrial Science and Technology
Cammy R. Abernathy, Univ. of Florida
Liyuan Liang, Oak Ridge National Laboratory
J. Stephen Rottler, Sandia National Laboratories
Justin Schwartz, North Carolina State Univ.

Section on Information, Computing, and Communication
Francine Berman, Rensselaer Polytechnic Institute
Ahmed K. Elmagarmid, Qatar Computing Research Institute, Qatar Foundation
Thomas D. Garvey, SRI International
Peter D. Karp, SRI International
Madhav V. Marathe, Virginia Tech
Eric Mjolsness, Univ. of California, Irvine
Dan Roth, Univ. of Illinois at Urbana-Champaign
William H. Sanders, Univ. of Illinois at Urbana-Champaign
Thomas L. Sterling, Indiana Univ.

Section on Linguistics and Language Sciences
Ralph W. Fasold, Georgetown Univ.
Lise Menn, Univ. of Colorado Boulder
Pamela Munro, Univ. of California, Los Angeles

Section on Mathematics
James M. Crowley, Society for Industrial and Applied Mathematics
Charles L. Epstein, Univ. of Pennsylvania
Nataša Jonoska, Univ. of South Florida
Kirk E. Jordan, IBM Research Division

Yuri Tschinkel, New York Univ.
Howard (Howie) Weiss, Georgia Institute of Technology

Section on Medical Sciences
Lynne V. Abruzzo, Ohio State Univ.
Naji N. Abumrad, Vanderbilt Univ. School of Medicine
Rexford S. Ahima, Univ. of Pennsylvania Perelman School of Medicine
Andrew Arnold, Univ. of Connecticut School of Medicine
Linda Gwen Baum, Univ. of California, Los Angeles Geffen School of Medicine
Jeremy M. Boss, Emory Univ. School of Medicine
Myles A. Brown, Dana-Farber Cancer Institute
David Michael Center, Boston Univ. Medical Center
Jeffrey S. Chamberlain, Univ. of Washington School of Medicine
Bandana Chatterjee, Univ. of Texas Health Science Center at San Antonio

Ronald William Oppenheim, Wake Forest Univ. School of Medicine
Marina R. Picciotto, Yale Univ. School of Medicine
Jeffrey D. Schall, Vanderbilt Univ.
Masatoshi Takeichi, RIKEN (Japan)
Stephen Francis Traynelis, Emory Univ. School of Medicine
Fan Wang, Duke Univ. Medical Center
George D. Yancopoulos, Regeneron Pharmaceuticals, Inc.
Charles Zuker, Columbia Univ.
AAAS Kavli Science Journalism Award winners named

By Earl Lane

Stories exploring human biology, including our interactions with the trillions of microbes we all harbor, the influences of our fishy evolutionary forebears on how we look, and the enduring challenge of understanding cancer, are among the winners of the 2014 AAAS Kavli Science Journalism Awards.

Small Newspaper—Circulation less than 100,000: Matthew LaPlante and Paul Christiansen, Salt Lake City Weekly, for “Devastated: The World’s Largest Organism is in Utah—and It’s Dying,” 21 November 2013.

Television—Spot News/Feature Reporting (20 minutes or less): Michael Werner, KCTS 9/QUEST, for “The Ecology of Fear,” 6 March 2014.

Television—In Depth Reporting (more than 20 minutes): Michael Rosenfeld, David Dugan, and Neil Shubin, Tangled Bank Studios/Windfall Films for PBS, for “Your Inner Fish,” 9 April, 16 April, & 23 April 2014.

The awards, administered by AAAS since their inception in 1945, go to professional journalists for distinguished reporting for a general audience. The Kavli Foundation provided a generous endowment in 2009 that ensures the future of the program.

Independent panels of science journalists pick the winners, who will receive $3000 and a plaque at the 2015 AAAS Annual Meeting in San Jose, California, in February. Learn more at www.aaas.org/sja2014.
