An inside look at battery operation

FEATURES

117 SALVAGING SCIENCE
Underwater archaeologist Charles Beeker works to preserve famous wrecks as museums By M. Bawaya

120 ON THE TRAIL OF CONTAGION
One team’s quest to find a potential Ebola case in Liberia reveals how difficult it will be to end the epidemic By K. Kupferschmidt

122 SOLVING IMPERFECT-INFORMATION GAMES
The smallest common poker game, two-player limit Texas Hold’em, is essentially solved By T. Sandholm

124 PRESCRIBING SPlicing
A model predicts the impact of variations in the human genome on RNA splicing and disease By R. Guigó and J. Valcárcel

125 COPING WITH OXIDATIVE STRESS
A crystal structure helps to explain how cells detoxify By U. Krengel and S. Törnroth-Horsefield

127 DYNAMICS OF A COLD QUANTUM GAS
A cloud of cold atoms provides a route to understanding complex phase transitions By G. Ferrari

128 MAKING SENSE OF AMINO ACID SENSING
Biochemically and spatially diverse intracellular mechanisms couple the activity of a cell growth regulatory complex to the availability of amino acids By R. T. Abraham

130 DESIGNING TWO-DIMENSIONAL MATERIALS THAT SPRING RAPIDLY INTO THREE-DIMENSIONAL SHAPES
Buckling of sheets can be engineered to rapidly create complex shapes By C. Ye and V. V. Tsukruk

131 USING ALL ENERGY IN A BATTERY
Controlled electrode structure improves energy utilization By N. J. Dudney and J. Li

133 CHINA’S AQUACULTURE AND THE WORLD’S WILD FISHERIES
Curbing demand for wild fish in aquafeeds is critical By L. Cao et al.

BOOKS ET AL.

136 CHRONIC DISEASE IN THE TWENTIETH CENTURY
By G. Weisz, reviewed by P. Weindling

137 THE MEANING OF HUMAN EXISTENCE
By E. O. Wilson, reviewed by S. R. Wolf

138 THE PERIPHERAL
By W. Gibson, reviewed by G. Riddihough

LETTERS

139 RETRACTION
By M. Loretz et al.

139 PROTECTING COFFEE FROM INTENSIFICATION
By R. Aerts et al.

Downloaded from http://science.sciencemag.org/ on May 14, 2017
124 & 144
Mutations that misregulate splicing cause disease

139 MEASURING MERIT: TAKE THE RISK
By K. Selvarajoo

140 MOVING TOWARD DATA ON SOIL CHANGE
By D. A. Robinson

122 & 145

IN BRIEF
141 From Science and other journals

RESEARCH ARTICLES
144 RNA SPlicing
The human splicing code reveals new insights into the genetic determinants of disease H. Y. Xiong et al.

RESEARCH ARTICLE SUMMARY; FOR FULL TEXT: dx.doi.org/10.1126/science.1254806

145 COMPUTER SCIENCE
Heads-up limit hold’em poker is solved M. Bowling et al.

154 MATERIALS SCIENCE
Assembly of micro/nanomaterials into complex, three-dimensional architectures by compressive buckling S. Xu et al.

159 BIOMATERIALS
Electronic dura mater for long-term multimodal neural interfaces I. R. Minev et al.

164 ULTRAFAST DYNAMICS
Four-dimensional imaging of carrier interface dynamics in p-n junctions E. Najafi et al.

167 QUANTUM GASES
Critical dynamics of spontaneous symmetry breaking in a homogeneous Bose gas N. Navon et al.

170 GUT MICROBIOTA
Antimicrobial peptide resistance mediates resilience of prominent gut commensals during inflammation T. W. Cullen et al.

175 EPIDEMIOLOGY
Opposite effects of anthelmintic treatment on microbial infection at individual versus population scales V. O. Esenwa and A. E. Jolles

178 STRUCTURAL BIOLOGY
Division of labor in transhydrogenase by alternating proton translocation and hydride transfer J. H. Leang et al.

182 EARTH HISTORY
U-Pb geochronology of the Deccan Traps and relation to the end-Cretaceous mass extinction B. Schoene et al.

185 DNA REPAIR
PAXX, a paralog of XRCC4 and XLF, interacts with Ku to promote DNA double-strand break repair T. Ochi et al.

METABOLISM
188 Lysosomal amino acid transporter SLC38A9 signals arginine sufficiency to mTORC1 S. Wang et al.

194 Differential regulation of mTORC1 by leucine and glutamine J. L. Jewell et al.

DEPARTMENTS
107 EDITORIAL
Judging synthetic biology risks By Rainer Breitling et al.

206 WORKING LIFE
My metamorphosis By Elizabeth A. Marchio

ON THE COVER
Computational results for the dynamic transformation of a planar, two-dimensional structure into an extended, three-dimensional open framework. Controlled buckling follows from compressive forces that act at precise locations across the structure upon release of prestrain in an elastomeric substrate. This example uses microscale ribbons of silicon, with potential applications in electronic circuits, battery anodes, photodetectors, and other semiconductor devices. See pages 130 and 154 and see scim.ag/6218_vid for a related video. Illustration: John Rogers, Yihui Zhang, and C. Bickel/Science
