NEWS

IN BRIEF
930 Roundup of the week’s news

IN DEPTH
932 PLUMES ON EUROPA TEASE NASA MISSION PLANNERS
Astrobiologists covet chance to sample subterranean ocean, but plumes may come and go By E. Hand

933 NEW JITTERS OVER MEGAQUAKES IN HIMALAYAS
Large earthquakes in teeming region could strike anywhere, anytime By P. Pulla

934 AS NEW BOTULISM THREAT IMPLODES, MORE QUESTIONS
Secrecy around “toxin H” hampered research, government scientists say By M. Enserink

936 RESEARCH AT KEW OVERHAULED FOR LEANER TIMES
World-leading collection focuses on its strengths following critical reviews and budget cuts By E. Stokstad

937 JAPAN LOOKS TO INSTILL GLOBAL MINDSET IN GRADS
New program to internationalize universities hopes to put nation on more competitive footing By D. Normile

FEATURES
938 LINE OF ATTACK
Christopher Korch is adding up the costs of contaminated cell lines By J. Neimark

941 WHAT’S IN A NAME?
Naming research animals may improve their well-being—or bias experiments
By M. Erard
▶ QUIZ; SURVEY

INSIGHTS

PERSPECTIVES
944 UNDERSTANDING PARTICLE ACCELERATION IN ASTROPHYSICAL PLASMAS
Simulations reveal new scenarios to accelerate electrons to extremely high energies By H. Ji and E. Zweibel
▶ REPORT P. 974

945 HOW WHEAT CAME TO BRITAIN
Wheat reached Britain from the Near East at least 2000 years before the arrival of wheat farming By G. Larson
▶ REPORT P. 998

947 DELINEATING EBOLA ENTRY
A specific calcium channel is required for Ebola virus to infect a cell
By D. Falsarano and H. Feldmann
▶ REPORT P. 995

948 AN UNEXPECTED COST OF SEX
Coevolution of male and female mosquitoes influences whether mosquitoes transmit human malaria
By S. H. Alonzo
▶ REPORT P. 985

949 SHAPE-SHIFTING LIQUID CRYSTALS
A new approach to photopatterning liquid crystals produces programmable, shape-shifting soft solids
By R. Verduzco
▶ REPORT P. 982

950 INSECTICIDAL RNA, THE LONG AND SHORT OF IT
Transgenic plants that express insect-specific RNA in chloroplasts kill pests through RNA interference
By S. Whyard
▶ REPORT P. 991

952 WHY THE PACIFIC IS COOL
Natural ocean variability modulates global warming
By B. B. Booth
▶ REPORT P. 988

953 PREDICTION, PRECAUTION, AND POLICY UNDER GLOBAL CHANGE
Emphasize robustness, monitoring, and flexibility
By D. E. Schindler and R. Hilborn

BOOKS ET AL.
955 ADVENTURES IN THE ANTHROPOCENE
By G. Vince, reviewed by H. Young

956 THE INNOVATORS
By W. Isaacson, reviewed by D. Greenbaum and M. Gerstein

LETTERS
957 REINDEER EWENKI’S FADING CULTURE
By J. Wang et al.

945 & 998
How wheat got to Britain

Published by AAAS
**DEPARTMENTS**

**929 EDITORIAL**
Wider attention for GOF science
By Harvey V. Fineberg

**1038 WORKING LIFE**
Follow your star
By Elisabeth Pain

**RESEARCH**

**IN BRIEF**
960 From *Science* and other journals

**REVIEW**
963 SUSTAINABILITY
Systems integration for global sustainability
J. Liu et al.

**REPORTS**
964 OPTICS
Observation of optical polarization
Möbius strips
T. Bauer et al.

**967 SOLAR CELLS**
Electron-hole diffusion lengths > 175 μm in solution-grown CH3NH3PbI3 single crystals
Q. Dong et al.

**970 WATER SPLITTING**
Metal-free efficient photocatalyst for stable visible water splitting via a two-electron pathway
J. Liu et al.

**974 PLASMA PHYSICS**
Stochastic electron acceleration during spontaneous turbulent reconnection in a strong shock wave
Y. Matsumoto et al.

**978 SURFACE CHEMISTRY**
Probing the transition state region in catalytic CO oxidation on Ru
H. Öström et al.

**982 ACTUATING MATERIALS**
Voxelated liquid crystal elastomers
T. H. Warre et al.

**985 MOSQUITO BIOLOGY**
Evolution of sexual traits influencing vectorial capacity in anopheline mosquitoes
S. N. Mitchell et al.

**988 CLIMATE CHANGE**
Atlantic and Pacific multidecadal oscillations and Northern Hemisphere temperatures
B. A. Steinman et al.

**991 PEST CONTROL**
Full crop protection from an insect pest by expression of long double-stranded RNAs in plastids
J. Zhang et al.

**993 EBOLA VIRUS**
Two-pore channels control Ebola virus host cell entry and are drug targets for disease treatment
Y. Sakurai et al.

**998 ARCHAEOLOGY**
Sedimentary DNA from a submerged site reveals wheat in the British Isles 8000 years ago
O. Smith et al.

**1002 STEM CELLS**
m′A mRNA methylation facilitates resolution of naïve pluripotency toward differentiation
S. Geula et al.

**1006 CANCER**
*TER* promoter mutations and telomerase reactivation in urothelial cancer
S. Borah et al.

**1010 GENE REGULATION**
Transcribed enhancers lead waves of coordinated transcription in transitioning mammalian cells
E. Arner et al.

**1014 EVOLUTION**
Evolutionary resurrection of flagellar motility via rewiring of the nitrogen regulation system
T. B. Taylor et al.

**1017 TRANSCRIPTION**
CTCF establishes discrete functional chromatin domains at the *Hox* clusters during differentiation
V. Narendra et al.

**ON THE COVER**
Ebola virus enters cells in small vesicles called endosomes. Virus eventually moves into endosomes that have both NPC1 (dark blue rods) and TPC2 (yellow spikes) proteins on their membranes and then into vesicles with TPC2 only. By disrupting the function of TPC2 with drugs, the virus is locked into the endosome, unable to be released to infect the cell. See pages 947 and 995. *Illustration: Valerie Altonnian/Science*
