SPECIAL SECTION
GENERAL RELATIVITY TURNS 100

INTRODUCTION
1082 Einstein’s vision

NEWS
1084 To catch a wave By A. Cho
1089 The dark lab By D. Clery
1094 General Relativity: The comic book
1096 Drop test By A. Cho

REVIEWS
1100 The dark side of cosmology: Dark matter and dark energy By D. N. Spergel
1103 A century of general relativity: Astrophysics and cosmology By R. D. Blandford

ON THE COVER
In 1915, Albert Einstein was a celebrity. His idea of seamlessly interwoven space and time—space-time—had revolutionized physics and dazzled the world. Then he published his masterpiece: a short paper describing how warped spacetime creates gravity. A century later, that “general theory of relativity” remains a pillar of physics and Einstein a peerless scientific icon. See page 1082. NEWS

IN BRIEF
1048 Roundup of the week’s news

IN DEPTH
1051 A PRISTINE AMAZON’S LAST STAND
Laboratory in the sky will sample some of the last unspoiled air on the planet By L. Wade

1052 MUONS PROBE FUKUSHIMA’S RUINS
Unsung imaging technique deployed to find uranium debris in reactors By D. Normile

1054 WHY MANY U.S. BIOLOGY TEACHERS ARE ‘WISHY-WASHY’
Future science teachers lack knowledge and role models By J. Mervis

1055 DOUBTS DISPELLED ABOUT HIV PREVENTION
New studies show remarkable efficacy and versatility of drugs for uninfected By J. Cohen

1056 DEEP ROOTS FOR THE GENUS HOMO
Fossil jawbone pushes back origins of our genus by 400,000 years By A. Gibbons
▶ REPORT BY VILLMOARE ET AL. 10.1126/science.aaa1343; REPORT BY DIMAGGIO ET AL. 10.1126/science.aaa1415

FEATURE
1058 CLEANUP CREW
Unorthodox immune proteins called natural antibodies target pathogens and remove cellular and molecular waste By M. Leslie

INSIGHTS

PERSPECTIVES
1062 A SUSTAINABLE MODEL FOR ANTIBIOTICS
How can we foster the development of novel drugs against resistant bacteria? By M. Perros
▶ PERSPECTIVE P. 1064

1064 A RETURN TO THE PRE-ANTIMICROBIAL ERA?
The effects of antimicrobial resistance will be felt most acutely in lower-income countries By S. Baker
▶ PERSPECTIVE P. 1062; PODCAST

1066 STATISTICS REQUANTITATES THE CENTRAL DOGMA
Transcription, not translation, chiefly determines protein abundance in mammals By J. J. Li and M. D. Biggin
▶ RESEARCH ARTICLE P. 1112

1068 NEW WORLD MONKEY ORIGINS
Fossils in Peru raise questions about the early evolution of monkeys in South America By R. F. Kay

1069 DRUGGING RNAI
RNAi therapeutics are emerging as a major drug discovery engine By D. Haussecker and M. A. Kay

1071 VIRAL CHEMOKINE MIMICRY
How do viruses trick the human immune system? By J. Standfuss
▶ RESEARCH ARTICLES PP. 1113 & 1117

1072 SINGLE PROTEINS UNDER A DIAMOND SPOTLIGHT
A diamond nanomagnetometer is used to probe conformational changes of a single protein By P. Hemmer and C. Gomes
▶ REPORT P. 1135

1073 LOOK BUT DON’T TOUCH THE METALS
Nitrogen-vacancy defects in diamond can probe metallic conductivity at a distance By L. P. McGuinness and F. Jelezko
▶ REPORT P. 1129
