356 IRAN NUCLEAR DEAL HOLDS 'GOODIES' FOR SCIENTISTS
Researchers to collaborate at repurposed nuclear facilities
By R. Stone

357 WEB BILLIONAIRE JOINS SEARCH FOR ALIEN SIGNALS
Yuri Milner hopes that $100 million can answer one of humanity's most enduring questions By D. Clery

358 NEW LIFE FOR OLD BONES
After a stormy adolescence, the field of ancient DNA enters its golden era By E. Culotta

359 REVOLUTION IN HUMAN EVOLUTION
As it smashes disciplinary boundaries, ancient DNA is rewriting much of human prehistory By A. Gibbons

360 LOST WORLDS FOUND
Sugar cubes of buried soil reveal how ecosystems warmed after the last ice age By E. Pennisi

361 PROSPECTING FOR GENETIC GOLD
By E. Pennisi

362 NEW MYSTERY FOR NATIVE AMERICAN ORIGINS
Rival papers compete to explain surprising link to Australia and Melanesia By M. Balter

363 BREAKING A TROPICAL TABOO
Most ancient DNA comes from frigid environs. Can new methods sample hot and humid locales? By L. Wade

364 PROTEIN POWER
Paleoproteomics hustles to catch up with its more developed cousin By R. F. Service

365 CHILD FIGHTS HIV TO A DRAW
After 12 years off treatment, a young woman has had remarkable—and unexplained—control of her infection By J. Cohen

366 IRAN NUCLEAR DEAL HOLDS 'GOODIES' FOR SCIENTISTS
Researchers to collaborate at repurposed nuclear facilities
By R. Stone

367 MAKING METHANE DOWN DEEP
Scientists find active life 2.5 km beneath the sea floor By J. A. Huber

368 MOVING CTLA-4 FROM THE TRASH TO RECYCLING
Individuals lacking a protein expressed in T cells have low CTLA-4 and develop autoimmunity By D. M. Sansom

369 CATALYSTS BY PLATONIC DESIGN
Sophisticated shape-controlled design is yielding ever more active nanocatalysts By P. Strasser

370 BREAKERS AND BLOCKERS—miRNAs AT WORK
MicroRNAs mediate silencing through messenger RNA degradation and translation repression By E. Izaurralde

371 STRETCH, WRAP, AND RELAX TO SMARTNESS
Carbon nanotubes wrapped around rubber cores create resilient conducting fibers By T. Ghosh

372 YELLOW LIGHTS FOR EMERGING TECHNOLOGIES
All-or-none regulatory systems are not adequate for revolutionary innovations By R. A. Charo

373 TOWARD AN HIV VACCINE: A SCIENTIFIC JOURNEY
Different strategies are coming together to provide insights for an effective HIV vaccine By A. S. Fauci and H. D. Marston

374 FOUR LEGS TOO MANY?
A long-bodied fossil snake retains fore- and hindlimbs By S. Evans

375 MAKING METHANE DOWN DEEP
Scientists find active life 2.5 km beneath the sea floor By J. A. Huber

376 MOVING CTLA-4 FROM THE TRASH TO RECYCLING
Individuals lacking a protein expressed in T cells have low CTLA-4 and develop autoimmunity By D. M. Sansom

377 CATALYSTS BY PLATONIC DESIGN
Sophisticated shape-controlled design is yielding ever more active nanocatalysts By P. Strasser

378 BREAKERS AND BLOCKERS—miRNAs AT WORK
MicroRNAs mediate silencing through messenger RNA degradation and translation repression By E. Izaurralde

379 STRETCH, WRAP, AND RELAX TO SMARTNESS
Carbon nanotubes wrapped around rubber cores create resilient conducting fibers By T. Ghosh

380 YELLOW LIGHTS FOR EMERGING TECHNOLOGIES
All-or-none regulatory systems are not adequate for revolutionary innovations By R. A. Charo

381 TOWARD AN HIV VACCINE: A SCIENTIFIC JOURNEY
Different strategies are coming together to provide insights for an effective HIV vaccine By A. S. Fauci and H. D. Marston

382 NEW MYSTERY FOR NATIVE AMERICAN ORIGINS
Rival papers compete to explain surprising link to Australia and Melanesia By M. Balter

383 BREAKING A TROPICAL TABOO
Most ancient DNA comes from frigid environs. Can new methods sample hot and humid locales? By L. Wade

384 PROTEIN POWER
Paleoproteomics hustles to catch up with its more developed cousin By R. F. Service

385 CHILD FIGHTS HIV TO A DRAW
After 12 years off treatment, a young woman has had remarkable—and unexplained—control of her infection By J. Cohen

INSIGHTS

PERSPECTIVES

374 FOUR LEGS TOO MANY?
A long-bodied fossil snake retains fore- and hindlimbs By S. Evans

376 MAKING METHANE DOWN DEEP
Scientists find active life 2.5 km beneath the sea floor By J. A. Huber

377 MOVING CTLA-4 FROM THE TRASH TO RECYCLING
Individuals lacking a protein expressed in T cells have low CTLA-4 and develop autoimmunity By D. M. Sansom

379 CATALYSTS BY PLATONIC DESIGN
Sophisticated shape-controlled design is yielding ever more active nanocatalysts By P. Strasser

380 BREAKERS AND BLOCKERS—miRNAs AT WORK
MicroRNAs mediate silencing through messenger RNA degradation and translation repression By E. Izaurralde

382 STRETCH, WRAP, AND RELAX TO SMARTNESS
Carbon nanotubes wrapped around rubber cores create resilient conducting fibers By T. Ghosh

384 YELLOW LIGHTS FOR EMERGING TECHNOLOGIES
All-or-none regulatory systems are not adequate for revolutionary innovations By R. A. Charo

386 TOWARD AN HIV VACCINE: A SCIENTIFIC JOURNEY
Different strategies are coming together to provide insights for an effective HIV vaccine By A. S. Fauci and H. D. Marston

FEATURES

358 NEW LIFE FOR OLD BONES
After a stormy adolescence, the field of ancient DNA enters its golden era By E. Culotta

359 REVOLUTION IN HUMAN EVOLUTION
As it smashes disciplinary boundaries, ancient DNA is rewriting much of human prehistory By A. Gibbons

360 LOST WORLDS FOUND

NEWS

IN BRIEF

350 Roundup of the week’s news

IN DEPTH

352 SCIENTISTS PONDER AN IMPROBABLY ACTIVE PLUTO
New Horizons delights researchers with stark vistas and perplexing puzzles By E. Hand

354 NEW MYSTERY FOR NATIVE AMERICAN ORIGINS
Rival papers compete to explain surprising link to Australia and Melanesia By M. Balter

355 CHILD FIGHTS HIV TO A DRAW
After 12 years off treatment, a young woman has had remarkable—and unexplained—control of her infection By J. Cohen

356 IRAN NUCLEAR DEAL HOLDS ‘GOODIES’ FOR SCIENTISTS
Researchers to collaborate at repurposed nuclear facilities
By R. Stone

357 WEB BILLIONAIRE JOINS SEARCH FOR ALIEN SIGNALS
Yuri Milner hopes that $100 million can answer one of humanity's most enduring questions By D. Clery

349 EDITORIAL
Rethinking graduate education
By Alan I. Leshner

446 WORKING LIFE
Songwriting and science
By C. Neal Stewart Jr.

ON THE COVER
A researcher drills into ancient bone to extract material for DNA analysis at the Max Planck Institute for Evolutionary Anthropology in Leipzig, Germany. As the newest sequencing methods are applied to ancient samples and spread to many laboratories, ancient DNA is poised to enter its golden age, delivering stunning results ranging from the evolution of humans to that of microbes. See page 358. Photo: © Jörg Singer

428 INTRACELLULAR TRANSPORT
Pt4+/phosphatidylserine countertransport at ORP5- and ORP8-mediated ER–plasma membrane contacts J. Chung et al.

432 Phosphatidylserine transport by ORP/Osh proteins is driven by phosphatidylinositol 4-phosphate J. Moser von Filseck et al.

436 AUTOIMMUNE DISEASE
Patients with LRBA deficiency show CTLA4 loss and immune dysregulation responsive to abatacept therapy B. Lo et al.

392 QUANTUM INFORMATION
Coherent coupling between a ferromagnetic magnon and a superconducting qubit
Y. Tabuchi et al.

408 Coherent coupling of a single spin to microwave cavity photons J. J. Viennot et al.
