ON THE COVER

Artistic rendering of the Philae lander on the surface of comet 67P/Churyumov-Gerasimenko. On 12 November 2014, after descending from the Rosetta orbiter (background),

Philae bounced upon touchdown, eventually coming to rest at the site known as Abydos. A set of eight papers describes the initial scientific results from Philae's approach and first days on the comet. See pages 459 and 493 and news.sciencemag.org/tags/rosetta. Image: © A.
