1055 & 1071
Routes to eradicate infection

FEATURES: SCIENCE IN IRAN

1038 UNSANCTIONED SCIENCE
Despite penury and isolation, Iran's scientists have pursued an ambitious agenda. If sanctions end, research will blossom
By R. Stone
▶ PODCAST

1042 AN EYE ON THE SKY
An eye on the sky
By R. Stone

1044 SAVING IRAN'S GREAT SALT LAKE
With ecosystems and agriculture at stake, stopping Lake Urmia from turning to salt desert is the country's top environmental priority
By R. Stone

1046 FRAGILE ECOSYSTEMS UNDER PRESSURE
Fragile ecosystems under pressure
By R. Stone

ON THE COVER
A headlamp casts a glow on salt flats at Iran's Lake Urmia, which has shrunk to around 10% of its original 5200-square-kilometer area because of poor water management. Lake Urmia is the focus of a massive restoration program, one of several ambitious science and technology efforts in Iran that may benefit if the country's isolation ends. See pages 1029 and 1038.

NEWS

IN BRIEF
1030 Roundup of the week's news

IN DEPTH
1032 MANTLE PLUMES SEEN RISING FROM EARTH'S CORE
Fat tubes of hot rock could alter views of how the planet cooled
By E. Hand

1033 OCEAN ROBOTS LISTEN FOR EARTHQUAKE ECHOES
By E. Hand

1034 HOW FARM LIFE PREVENTS ASTHMA
Lung reaction to bacteria may explain protection for farm children, bolstering hygiene hypothesis
By J. Kaiser
▶ REPORT P. 1106

1035 ARTIFICIAL TRACHEA PIONEER CLEARED OF MISCONDUCT CHARGES
Independent investigator had incomplete information, Karolinska Institute says
By G. Vogel

1036 PUBPEER CO-FOUNDER REVEALS IDENTITY—AND NEW PLANS
Neuroscientist Brandon Stell wants to raise funds to expand postpublication critiques
By J. Cousin-Frankel

1037 GLOBAL AGRICULTURAL RESEARCH NETWORK IS OVERHAULED AGAIN
CGIAR looks for antidote to tapering funding and internal woes
By D. Normile

1038 UNSANCTIONED SCIENCE
Despite penury and isolation, Iran's scientists have pursued an ambitious agenda. If sanctions end, research will blossom
By R. Stone

INSIGHTS

PERSPECTIVES

1048 SUSTAINABLE DEVELOPMENT AGENDA: 2030
Building knowledge-based societies is key to transformative technologies
By W. Colglazier

1050 YEAST CELL FACTORIES ON THE HORIZON
Metabolic engineering in yeast gets increasingly more versatile
By J. Nielsen
▶ REPORT P. 1095

1052 LIGHTING THE FUSE ON TOXIC TNT
An enzyme that helps control reactive oxidants sensitizes plants to TNT pollution
By G. Noctor
▶ RESEARCH ARTICLE P. 1072

1053 ENERGY FLOWS IN ECOSYSTEMS
Relationships between predator and prey biomass are remarkably similar in different ecosystems
By J. Cebrian
▶ RESEARCH ARTICLE P. 1070

1055 FRAGMENTED COMMUNICATION BETWEEN IMMUNE CELLS
Neutrophils blaze a trail with migratory cues for T cells to follow to sites of infection
By E. Kiermaier and M. Sixt
▶ RESEARCH ARTICLE P. 1071

1056 FUELING CONNECTIONS BETWEEN CHEMISTRY AND BIOLOGY
Chemical reactions create far-from-equilibrium materials by mastering self-assembly
By D. van der Zwaag and E. W. Meijer
▶ REPORT P. 1075

1058 MICROBIAL GROWTH DYNAMICS AND HUMAN DISEASE
Examining microbial genome replication in tissues may reflect health status
By J. A. Segre
▶ REPORT P. 1101

1059 THE MECHANISM OF CRYSTAL DEFORMATION
Microscopy provides an atomistic view of how crystalline materials deform
By W. Kaplan
▶ REPORT P. 1080

BOOKS ET AL.

1061 NATURAL CAPITAL
By D. Helm, reviewed by D. Capistrano

1062 BIG SCIENCE
By M. Hiltzik, reviewed by A. Wellerstein
