FEATURES: SCIENCE IN IRAN

1038 UNSANCTIONED SCIENCE
Despite penury and isolation, Iran’s scientists have pursued an ambitious agenda. If sanctions end, research will blossom By R. Stone

1042 An eye on the sky By R. Stone

PODCAST

1044 SAVING IRAN’S GREAT SALT LAKE
With ecosystems and agriculture at stake, stopping Lake Urmia from turning to salt desert is the country’s top environmental priority By R. Stone

1046 Fragile ecosystems under pressure By R. Stone

ON THE COVER
A headlamp casts a glow on salt flats at Iran’s Lake Urmia, which has shrunk to around 10% of its original 5200-square-kilometer area because of poor water management. Lake Urmia is the focus of a massive restoration program, one of several ambitious science and technology efforts in Iran that may benefit if the country’s isolation ends. See pages 1029 and 1038.
