1158 NEWS

IN BRIEF
1146 Roundup of the week’s news

IN DEPTH
1149 NEW HUMAN SPECIES DISCOVERED
Bizarre skeletons emerge from South African cave By A. Gibbons

1150 SPHERICAL NUCLEIC ACIDS START ROLLING
Promise of cancer-seeking nanoparticles wins funding for research center By R. F. Service

1152 A COLD, CREEPING MENACE
In Alaska, frozen debris lobes threaten a key lifeline By E. Kintisch

1153 FLU STUDY RAISES QUESTIONS ABOUT U.S. BAN
A new viral “backbone” could speed up production of influenza vaccines By J. Cohen

FEATURES
1154 GLOBAL PAYER
As head of the $29 billion Wellcome Trust, Jeremy Farrar took the stage during the Ebola epidemic. Now, he wants to make the trust a world leader By K. Kupferschmidt

1158 TAILPIPE TO TANK
Researchers are vying to use renewable energy to suck carbon dioxide out of the air and turn it back into fuel By R. F. Service

1160 Conjuring chemical cornucopias out of thin air
By R. F. Service

1163 HOW SINGLE CELLS WORK TOGETHER
Are single-celled symbioses organelle evolution in action? By J. P. Zehr

1165 AN INCREASING CARBON SINK?
Southern Ocean carbon uptake may have strengthened between 2002 and 2012, slowing climate change By S. E. Mikaloff-Fletcher

REPORT P. 1221

1166 VIRUSES CARRY ANTIVIRAL CARGO
Infected cells generate a factor that is incorporated into viruses and transferred to other cells By J. W. Schoggins

REPORTS PP. 1228 & 1232

1167 FIGHTING CANCER WHILE SAVING THE MAYAPPLE
The genes required for synthesizing a plant-derived anticancer compound are identified By S. E. O’Connor

REPORT P. 1224

1168 INTERFERENCE OF ATOMIC CLOCKS
The time dilation of gravity is mimicked with atomic clocks in magnetic fields By M. Arndt and C. Brand

REPORT P. 1205

1170 WINNING COALITIONS FOR CLIMATE POLICY
Green industrial policy builds support for carbon regulation By J. Meckling et al.

1172 RETHINKING HERITABILITY OF THE MICROBIOME
How should microbiome heritability be measured and interpreted? By E. J. van Opstal and S. R. Bordenstein

PODCAST

DEPARTMENTS
1145 EDITORIAL
Puerto Rico’s future at stake By Jorge Colón

1254 WORKING LIFE
Nice to know you By Malou Henriksen-Lacey and Juan J. Giner-Casares

Global diversity, population stratification, and selection of human copy-number variation P. H. Sudmant et al.

Three-dimensional structure of a yeast spliceosome. (EMDB ID EMD-6413)

Three-dimensional structure of a yeast spliceosome. In eukaryotes, genetic information stored in DNA is transcribed into precursor messenger RNA (pre-mRNA), which contains protein-coding exons interspersed with noncoding introns. The splicing of pre-mRNA, which entails removal of introns and covalent linkage of exons, is mediated by a multicomponent ribonucleoprotein complex—the spliceosome. See pages 1182 and 1191. Illustration: C. Bickel/Science; structure based on the cryo-EM map of a yeast spliceosome (EMDB ID EMD-6413)
Science 349 (6253), 1145-1254.
