RESEARCH

IN BRIEF

1178 From Science and other journals

RESEARCH ARTICLES

1181 HUMAN GENOMICS
Global diversity, population stratification, and selection of human copy-number variation P. H. Sudmant et al.

RESEARCH ARTICLE SUMMARY; FOR FULL TEXT: dx.doi.org/10.1126/science.aab3761

STRUCTURAL BIOLOGY

1182 Structure of a yeast spliceosome at 3.6-angstrom resolution C. Yan et al.

1191 Structural basis of pre-mRNA splicing J. Hung et al.

REPORTS

1199 MESOSCOPIC PHYSICS
Coherent manipulation of Andreev states in superconducting atomic contacts C. Janvier et al.

1202 CRITICAL PHENOMENA
Critical behavior at a dynamic vortex insulator-to-metal transition N. Poccia et al.

1205 QUANTUM MECHANICS
A self-interfering clock as a “which path” witness Y. Margalit et al.

1208 ELECTROCHEMISTRY
Covalent organic frameworks comprising cobalt porphyrins for catalytic CO2 reduction in water S. Lin et al.

1213 GEOPHYSICS
Stress orientations in subduction zones and the strength of subduction megathrust faults J. L. Hardebeck

1216 NEURONAL IDENTITY
Tuning of fast-splicing interneuron properties by an activity-dependent transcriptional switch N. Dehorter et al.

1221 GLOBAL CARBON CYCLE
The reinvigoration of the Southern Ocean carbon sink P. Landschützer et al.

1224 PLANT SCIENCE
Six enzymes from mayapple that complete the biosynthetic pathway to the etoposide aglycone W. Lau and E. S. Sattely

ANTIVIRAL IMMUNITY

1228 Viruses transfer the antiviral second messenger cGAMP between cells A. Bridgeman et al.

1232 Transmission of innate immune signaling by packaging of cGAMP in viral particles M. Gentili et al.

1237 CHROMOSOMES
The inner centromere–shugoshin network prevents chromosomal instability Y. Tanno et al.

ON THE COVER

Three-dimensional structure of a yeast spliceosome. In eukaryotes, genetic information stored in DNA is transcribed into precursor messenger RNA (pre-mRNA), which contains protein-coding exons interspersed with noncoding introns. The splicing of pre-mRNA, which entails removal of introns and covalent linkage of exons, is mediated by a multicomponent ribonucleoprotein complex—the spliceosome. See pages 1182 and 1191.
