INSIGHTS

LETTERS
30 NEXTGEN VOICES

PERSPECTIVES
32 SAFER FUELS BY INTEGRATING POLYMER THEORY INTO DESIGN
Jet fuels are stabilized with polymers assembling in solution
By M. Jaffe and S. Allam
 REPORT P. 72

33 LOCKING DOWN THE CORE OF THE PORE
A highly stable heterotrimeric protein complex lines the central channel of the nuclear pore
By K. S. Ullman and M. A. Powers
 REPORT ARTICLE P. 56; REPORT P. 106

34 THE IPCC AT A CROSSROADS: OPPORTUNITIES FOR REFORM
Increase focus on policy-relevant research
By C. Carraro et al.

36 ADDED VALUE FROM IPCC APPROVAL SESSIONS
Flexible, creative author teams are critical
By C. B. Field and V. R. Barros

37 A TREE OF THE HUMAN BRAIN
Genomes of single neurons trace the developmental and mutational history of the brain
By S. Linnarsson
 REPORT P. 94

38 HOW STABLE ARE FOOD WEBS DURING A MASS EXTINCTION?
Fossil data provide a detailed view of how food webs changed across the Permian-Triassic mass extinction
By C. R. Marshall
 REPORT P. 90

39 EYING UP A JUPITER-LIKE EXOPLANET
Extreme adaptive optics systems enable the direct imaging of exoplanetary systems
By D. Mawet
 REPORT P. 64

NEWS

IN BRIEF
12 Roundup of the week’s news

IN DEPTH
16 NEW PROTEINS MAY EXPAND, IMPROVE GENOME EDITING
Mining bacterial immune systems yields two new editing tools and has the potential to contribute many more
By E. Pennisi

17 TALKING SCIENCE AND GOD WITH THE POPE’S NEW ASTRONOMER
Guy Consolmagno, director of the Vatican Observatory, wants to show the world that religion supports astronomy
By E. Cartlidge

18 EUROPE’S RIfts OVER TRANSGENIC CROPS DEEPEN AT KEY DEADLINE
Policy differences among 28 E.U. member states come into sharper focus in the wake of major reform
By T. Rabesandratana

20 HAVE PHYSICISTS SEEN THE DYING FLASH OF DARK MATTER?
Dark particle decays could explain tantalizing X-ray signal seen in multiple galaxies, including our own Milky Way
By E. Cartlidge

21 HOLLAND’S GIANT WAVEMAKER HAS SPLASHY DEBUT
Delta Flume will allow researchers to study how coastal defenses fare against powerful surf
By M. Enserink

22 THE STORM KING
A mysterious tropical weather pattern called the Madden-Julian oscillation fuels El Niños and triggers rain, heat waves, and hurricanes around the globe
By E. Hand

25 Taking the pulse of the tropics
By E. Hand

26 POOLING RESOURCES
Ecologist Aram Calhoun forges creative alliances in her quest to protect ephemeral vernal pools
By J. U. Adams

29 TAKING THE PULSE OF THE TROPICS
By E. Hand

33 LOCKING DOWN THE CORE OF THE PORE
A highly stable heterotrimeric protein complex lines the central channel of the nuclear pore
By K. S. Ullman and M. A. Powers
 REPORT ARTICLE P. 56; REPORT P. 106

36 ADDED VALUE FROM IPCC APPROVAL SESSIONS
Flexible, creative author teams are critical
By C. B. Field and V. R. Barros

37 A TREE OF THE HUMAN BRAIN
Genomes of single neurons trace the developmental and mutational history of the brain
By S. Linnarsson
 REPORT P. 94

38 HOW STABLE ARE FOOD WEBS DURING A MASS EXTINCTION?
Fossil data provide a detailed view of how food webs changed across the Permian-Triassic mass extinction
By C. R. Marshall
 REPORT P. 90

39 EYING UP A JUPITER-LIKE EXOPLANET
Extreme adaptive optics systems enable the direct imaging of exoplanetary systems
By D. Mawet
 REPORT P. 64

SCIENCE PRIZE ESSAY

46 SLOW OR FAST? A TALE OF SYNAPTIC VESICLE RECYCLING
A new model accounts for synaptic transmission speed By S. Watanabe

BOOKS ET AL.
49 THE GRADUATE SCHOOL MESS
By L. Cassuto, reviewed by J. Gutlerner

50 SECRET
I. Brunswick et al., curators, reviewed by G. Frazzetto

RESEARCH

IN BRIEF
52 From Science and other journals

RESEARCH ARTICLES
55 GUT MICROBIOTA
Genetic determinants of in vivo fitness and diet responsiveness in multiple human gut Bacteroides M. Wu et al.

56 STRUCTURAL BIOLOGY
Architecture of the fungal nuclear pore inner ring complex T. Stuwe et al.

REPORTS

64 PLANETARY SCIENCE
Discovery and spectroscopy of the young jovian planet 51 Eri b with the Gemini Planet Imager B. Macintosh et al.

68 NANOELECTRONICS
End-bonded contacts for carbon nanotube transistors with low, size-independent resistance Q. Cao et al.

72 POLYMER CHEMISTRY
Megasupramolecules for safer, cleaner fuel by end association of long telechelic polymers M.-H. Wei et al.

76 EARTH HISTORY
State shift in Deccan volcanism at the Cretaceous-Paleogene boundary, possibly induced by impact P. R. Renne et al.

78 WATER STRUCTURE
Ultrafast 2D IR spectroscopy of the excess proton in liquid water M. Thämer et al.

82 MEMORY MECHANISMS
Multiple repressive mechanisms in the hippocampus during memory formation J. Cho et al.

87 CLOUDS
Holographic measurements of inhomogeneous cloud mixing at the centimeter scale M. J. Beals et al.

90 PALEOECOLOGY
Community stability and selective extinction during the Permian-Triassic mass extinction P. D. Roopnarine and K. D. Angielczyk

94 NEURODEVELOPMENT
Somatic mutation in single human neurons tracks developmental and transcriptional history M. A. Lodato et al.

98 INJURY RECOVERY
Function of the nucleus accumbens in motor control during recovery after spinal cord injury M. Sawada et al.

102 NEUROTRANSMISSION
Aldehyde dehydrogenase 1a1 mediates a GABA synthesis pathway in midbrain dopaminergic neurons J.-I. Kim et al.

106 STRUCTURAL BIOLOGY
Crystal structure of the metazoan Nup62•Nup58•Nup54 nucleoporin complex H. Chu et al.

DEPARTMENTS

11 EDITORIAL
The promise of neurotechnology By Andrew Schwartz

130 WORKING LIFE
After the bombs By Elisabeth Pain

ON THE COVER
Illustration of projection neurons from the human cerebral cortex, with nuclei colored to reflect distinct sets of somatic DNA mutations. When a mutation occurs in a dividing cell, it marks all of the cell’s descendants. Identification of clones marked by mutation enables reconstruction of human brain development. Because developmental defects lie at the heart of many neurological diseases, understanding development is a primary goal of neuroscience. See pages 37 and 94. Illustration: C. Bickel/Science
