136 9 OCTOBER 2015 • VOL 350 ISSUE 6257

CONTENTS

150 FEELING THE CHILL
The bizarre properties of liquid helium transfixed generations of physicists. But its spell is fading By A. Cho

INSIGHTS

PERSPECTIVES

156 ANOTHER BRICK IN THE WALL
An inducible secondary wall system reveals how most plant biomass is synthesized By R. Schneider and S. Persson

158 THE ODDS OF IMMUNOTHERAPY SUCCESS
Mutation load correlates with the response of melanomas to immunotherapy By M. M. Gubin and R. D. Schreiber

159 BEYOND THE “MENDEL-FISHER CONTROVERSY”
Worries about fraudulent data should give way to broader critiques of Mendel’s legacy By G. Radick

161 FROM TRANSIENT INFECTION TO CHRONIC DISEASE
Can some infections “scar” the immune system? By C. Nathan

162 MEMBRANE TRAFFIC EN ROUTE TO CANCER
The spatial organization of internal membranes influences receptor signaling and disease By S. M. Ferguson

164 THE IMPORTANCE OF BEING TOGETHER
Controlling the coordination of platinum boosts catalytic reaction rates By I. E. L. Stephens et al.

165 DESIGNING A SUSTAINABLE DIET
Sustainability as dietary guidance created political debate By K. Merrigan et al.

148 CAN EPIGENETICS EXPLAIN HOMOSEXUALITY PUZZLE?
Study in twin brothers finds link between DNA methylation and sexual orientation By M. Balter

149 PREHISTORIC EURASIANS STREAMED INTO AFRICA, GENOME SHOWS
First genome of an ancient African suggests widespread mixing with farmers from the Middle East By A. Gibbons

FEATURÉS

150 HOSTILE SHORES
Migratory bird populations in Asia are crashing as Yellow Sea habitat dwindles By C. Larson

140 Roundup of the week’s news

143 IN CANADA, SCIENCE CAMPAIGNS FOR ATTENTION FROM VOTERS
Opponents of Prime Minister Stephen Harper try to make his record on research an issue in election By B. Owens

144 NEGLECTED TROPICAL DISEASES GET THE LIMELIGHT IN STOCKHOLM
Medicine award honors pioneers who developed powerful drugs against malaria and roundworms By E. Stokstad and G. Vogel

145 NEUTRINO OSCILLATIONS HONORED
Observations by Japanese and Canadian teams proved ghostly particles can change identity and have mass By A. Cho

146 HOW CROP-KILLING WITCHWEED SENSES ITS VICTIMS
Pinning down molecules key to finding a host plant paves the way for new controls on the parasite By E. Pennisi

NEWS

PHOTO: (TOP) GERRIT VYN
A red-necked stint lies dead on polluted mudflats in South Korea.

162 & 211 Membrane organization influences signaling
Science 350 (6257), 139-246.
