NEWS

IN BRIEF
488 Roundup of the week’s news

IN DEPTH
490 EUROPE’S MARS ROVER TO TARGET ANCIENT WETLAND
Deep-drilling ExoMars mission will probe long-buried clay formation for signs of life By D. Clery

491 LIFELONG MEMORIES MAY RESIDE IN NETS AROUND BRAIN CELLS
Studies suggest key role for perineuronal networks of proteins and sugars in long-term memory By E. Underwood

492 HOW SOME OF THE WORLD’S BIGGEST DINOSAURS GOT THAT WAY
Fresh data reveal titanosaur growth stages, from egg to adult By M. Balter

493 PROPOSED STUDY WOULD CLOSELY TRACK 10,000 NEW YORKERS
Twenty-year household surveillance project aims to gather data first, produce hypotheses later By K. Servick

FEATURES
496 CRADLE OF LIFE
Did a biblical-scale flood—or the rise of the Andes—give the Amazon its amazing biodiversity? By L. Wade

494 MYSTERIOUS ANTARCTIC LAKE WILL REMAIN OUT OF REACH
Cash-strapped Russian expedition curtails drilling plans as it sets out for the southern continent By C. Gramling

495 CRISIS MANAGER WITH 194 BOSSES
WHO Director-General Margaret Chan wants member countries to put their money where their mouths are By K. Kupferschmidt

490 PINCHED TOPOGRAPHY INITIATES THE CRITICAL ZONE
Geophysical imaging provides a clearer picture of how rock turns into soil By R. S. Anderson

509 RANDOMNESS RULES
Disorder can have dramatic effects on quantum transitions By N. Markovic

510 NEUROTRANSMITTER-TAILORED DENDRITIC TREES
GABA is both transmitter and morphogen, stimulating neuronal branching in the brain By N. C. Spitzer

511 VISUALIZING TRANS-INFECTION
Systemic spread of a virus starts with multiple modes of transmission in the lymph node By T. J. Hope

512 FROM THE LAB TO THE REAL WORLD
Laboratory experiments provide precise quantitative predictions of peer effects in the field By G. Charness and E. Fehr

514 SYNTHETIC IMMUNOBIOLOGY BOOSTS THE IQ OF T CELLS
Engineered chimeric antigen receptors show promise By M. C. Jensen

INSIGHTS

BOOKS ET AL.
502 2014 NEBULA AWARD
504 2015 HUGO AWARD
A WINDOW INTO APE EVOLUTION
A fossil of an ape ancestor helps to explain gibbon evolution
By B. R. Benefit and M. L. McCrossin
> RESEARCH ARTICLE P. 528

ERIC DAVIDSON (1937–2015)
A developmental biologist uncovered the structure and evolution of gene regulatory networks
By D. H. Erwin

零容忍。期。

OUTSIDE THE TOWER: REPAINTING CITIZEN SCIENCE
By M. Bonnefond

OUTSIZED RISK

515 REGULATORY NETWORKS
The structure and evolution of gene code for AAAS to libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that $30.00 per article is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923. The identification code for Science is 0036-8075. Science is indexed in the Reader’s Guide to Periodical Literature and in several specialized indexes.

515 A WINDOW INTO APE EVOLUTION
A fossil of an ape ancestor helps to explain gibbon evolution
By B. R. Benefit and M. L. McCrossin
> RESEARCH ARTICLE P. 528

517 ERIC DAVIDSON (1937–2015)
A developmental biologist uncovered the structure and evolution of gene regulatory networks
By D. H. Erwin

518 HUNTED CARNIVORES AT OUTSIZED RISK
By M. Krofel et al.

518 OUTSIDE THE TOWER: REPAINTING CITIZEN SCIENCE
By M. Bonnefond

519 POLICIES UNDERMINE BRAZIL’S GHG GOALS
By R. Rajão and B. Soares-Filho

519 TECHNICAL COMMENT ABSTRACTS

DEPARTMENTS

EDITORIAL
Zero tolerance. Period.
By Bernard Wood

WORKING LIFE
Going where the science matters
By Stephen T. Jackson

REPORTS

528 PRIMATE EVOLUTION
Miocene small-bodied ape from Eurasia sheds light on hominoid evolution
D. M. Alba et al.
RESEARCH ARTICLE SUMMARY: FOR FULL TEXT:
dx.doi.org/10.1126/science.aab2625
> PERSPECTIVE P. 515

529 STRUCTURAL BIOLOGY
Structure of Tetrahymena telomerase reveals previously unknown subunits, functions, and interactions
J. Jiang et al.
RESEARCH ARTICLE SUMMARY: FOR FULL TEXT:
dx.doi.org/10.1126/science.aab4070

530 BATTERIES
Cycling Li-O2 batteries via LiOH formation and decomposition
T. Liu et al.

534 GEOMORPHOLOGY
Geophysical imaging reveals topographic stress control of bedrock weathering
J. St. Clair et al.
> PERSPECTIVE P. 506

538 MAGNETISM
Mobile metallic domain walls in an all-in-all-out magnetic insulator
E. Ma et al.

542 SUPERCONDUCTIVITY
Quantum Griffiths singularity of superconductor-metal transition in Ga thin films
Y. Xing et al.
> PERSPECTIVE P. 509

545 ECONOMICS
Peer effects on worker output in the laboratory generalize to the field
D. Herbst and A. Mas
> PERSPECTIVE P. 512

ON THE COVER
False-color microscopic view of a reduced graphene oxide electrode (black, center), which hosts the large (on the order of 20 micrometers) lithium hydroxide particles (pink) that form when a lithium-oxygen battery discharges. Lithium iodide aids in the removal of the particles upon charging, resulting in an efficient and highly energy-dense battery with potential applications in portable electronics, transportation, and grid storage. See page 530.

A view of magnetic domain walls

538 A view of magnetic domain walls

550 CHRONIC ITCH
Gate control of mechanical itch by a subpopulation of spinal cord interneurons
S. Bourane et al.

554 BRAIN DEVELOPMENT
A GABAergic projection from the zona incerta to cortex promotes cortical neuron development
J. Chen and A. R. Kriegstein
> PERSPECTIVE P. 510

558 MICROBIOME
Disease tolerance mediated by microbiome
E. coli involves inflammasome and IGF-1 signaling
A. M. Palaferri Schieber et al.

563 VIROLOGY
Retroviruses use CD169-mediated trans-infection of permissive lymphocytes to establish infection
X. Sewald et al.
> PERSPECTIVE P. 511

568 TUMOR VIRUSES
DNA tumor virus onco genes antagonize the eGAS-STING DNA-sensing pathway departments
L. Lau et al.
