Oceans and climate change

INTRODUCTION
750 Oceans of change

NEWS
752 Ghosts of oceans past By W. Cornwall
756 Breaking the waves By G. Popkin
760 Moveable feast By M. Lavelle

PERSPECTIVES
764 The silent services of the world ocean T. F. Stocker
766 The deep ocean under climate change L. A. Levin and N. Le Bris
769 Warm-water coral reefs and climate change M. D. Spalding and B. E. Brown

REVIEWS
772 Climate change and marine vertebrates W. J. Sydeman et al.
778 Climate change in the oceans: Human impacts and responses E. H. Allison and H. R. Bassett

FOSSILS, CELLS POINT TO EARLY APPEARANCE OF THE BRAIN
Nervous systems were well developed by the Cambrian explosion, having evolved in earlier organisms
By E. Pennisi

CANCER RESEARCH CENTERS POOL TUMOR GENOME DATA
DNA registry could lead to new treatments
By J. Kaiser

BABY'S LEUKEMIA RECEDES AFTER NOVEL CELL THERAPY
Gene editing used to create "off-the-shelf " T cells By J. Cousin-Frankel

NOT GUILTY AS CHARGED
Several cases have unraveled lately against Chinese-born scientists accused of stealing industrial secrets. Critics smell a witch-hunt
By M. Hvistendahl

ONE ERA YOU ARE IN—THE NEXT YOU ARE OUT
Evolutionary trends in body size changed during a past mass extinction event
By P. J. Wagner

MORE EFFICIENT TOGETHER
Hybrid bioinorganic photosynthesis yields a wide range of chemicals
By T. Zhang

FLOW CYTOMETRY STRIKES GOLD
Flow cytometry remains unparalleled as a high-throughput, high-content single-cell analysis technology
By J. P. Robinson and M. Roederer

TO CATCH AND SMASH CHARGE ON THE HOP
High-harmonic spectroscopy can probe charge migration controlled by a laser field
By K. Ueda

FOSSILS, CELLS POINT TO EARLY APPEARANCE OF THE BRAIN
Nervous systems were well developed by the Cambrian explosion, having evolved in earlier organisms
By E. Pennisi

Oceans of change

IN BRIEF
722 Roundup of the week's news

FIRE DOWN BELOW
725 New study shows that Mount St. Helens may share magma with other volcanoes nearby
By E. Hand

THORIUM SEEN AS NUCLEAR'S NEW FRONTIER
Unsung reactor fuel is more abundant than uranium and, proponents say, safer
By P. Bagla

HOW WARMING OCEANS UNLEASHED AN ICE STREAM
Accelerating retreat of a Greenland glacier could raise sea level for decades to come
By C. Gramling

IN DEPTH
755 Ghosts of oceans past
New study shows that Mount St. Helens may share magma with other volcanoes nearby
By E. Hand

THE DEEP OCEAN UNDER CLIMATE CHANGE
L. A. Levin and N. Le Bris

WARM-WATER CORAL REEFS AND CLIMATE CHANGE
M. D. Spalding and B. E. Brown

CLIMATE CHANGE AND MARINE VERTEBRATES
W. J. Sydeman et al.

CLIMATE CHANGE IN THE OCEANS: HUMAN IMPACTS AND RESPONSES
E. H. Allison and H. R. Bassett

IN DEPTH
752 Ghosts of oceans past
New study shows that Mount St. Helens may share magma with other volcanoes nearby
By E. Hand

BREATHING DEEPER
L. A. Levin and N. Le Bris

WARM-WATER CORAL REEFS AND CLIMATE CHANGE
M. D. Spalding and B. E. Brown

CLIMATE CHANGE AND MARINE VERTEBRATES
W. J. Sydeman et al.

CLIMATE CHANGE IN THE OCEANS: HUMAN IMPACTS AND RESPONSES
E. H. Allison and H. R. Bassett

ON THE COVER
Melting water streams from an iceberg in Disko Bay on the western coast of Greenland. The iceberg calved from the Ilulissat Glacier (also known as Sermeq Kujalleq or Jakobshavn Glacier), one of the world’s fastest-moving and most-studied glaciers. Melting polar ice sheets are one consequence of human-induced global warming and could contribute to a substantial increase in global sea levels in the future. See page 750.
