1165 Protein machines that move bacteria

1166 HEART DISEASE
Rare variant in scavenger receptor BI raises HDL cholesterol and increases risk of coronary heart disease P. Zanoni et al.

1171 CHEMICAL PHYSICS
Wavelike charge density fluctuations and van der Waals interactions at the nanoscale A. Ambrosetti et al.

REPORTS

1176 QUANTUM OPTICS
Generation of multiphoton entangled quantum states by means of integrated frequency combs C. Reimer et al.

1180 SPIN MODELS
Simple universal models capture all classical spin physics G. De las Cuevas and T. S. Cubitt

1184 TOPOLOGICAL MATTER
Quasiparticle interference of the Fermi arcs and surface-bulk connectivity of a Weyl semimetal H. Inoue et al.

1188 ZEOLITES
Accelerated crystallization of zeolites via hydroxyl free radicals G. Feng et al.

1192 FUNGAL ENZYMES
Early-branching gut fungi possess a large, comprehensive array of biomass-degrading enzymes K. V. Solomon et al.

1196 BIODEGRADATION
A bacterium that degrades and assimilates poly(ethylene terephthalate) S. Yoshida et al.

1976 QUANTUM OPTICS
Generation of multiphoton entangled quantum states by means of integrated frequency combs C. Reimer et al.

1180 SPIN MODELS
Simple universal models capture all classical spin physics G. De las Cuevas and T. S. Cubitt

1184 TOPOLOGICAL MATTER
Quasiparticle interference of the Fermi arcs and surface-bulk connectivity of a Weyl semimetal H. Inoue et al.

1188 ZEOLITES
Accelerated crystallization of zeolites via hydroxyl free radicals G. Feng et al.

1192 FUNGAL ENZYMES
Early-branching gut fungi possess a large, comprehensive array of biomass-degrading enzymes K. V. Solomon et al.

1196 BIODEGRADATION
A bacterium that degrades and assimilates poly(ethylene terephthalate) S. Yoshida et al.

1192 FUNGAL ENZYMES
Early-branching gut fungi possess a large, comprehensive array of biomass-degrading enzymes K. V. Solomon et al.

1204 CANCER BIOLOGY
Schedule-dependent interaction between anticancer treatments S. Chen et al.

1208 Disordered methionine metabolism in MTAP/CDKN2A-deleted cancers leads to dependence on PRMT5 K. J. Mavrakis et al.

1214 MTAP deletion confers enhanced dependency on the PRMT5 arginine methyltransferase in cancer cells G. V. Kryukov et al.

1218 TRANSCRIPTION
Measurement of gene regulation in individual cells reveals rapid switching between promoter states L. A. Sepúlveda et al.

1117 EDITORIAL
Tackling toxics
By Arlene Blum

1199 NEURODEVELOPMENT
CLK2 inhibition ameliorates autistic features associated with SHANK3 deficiency M. Bidinosti et al.

1196 BIODEGRADATION
A bacterium that degrades and assimilates poly(ethylene terephthalate) S. Yoshida et al.

1204 CANCER BIOLOGY
Schedule-dependent interaction between anticancer treatments S. Chen et al.
