**ENDING HIDE AND SEEK AT SEA**
New technologies could revolutionize ocean observation By D. J. McCauley et al.

**THE INVISIBLE DIMENSION OF FUNGAL DIVERSITY**
Can microbial taxa be defined from environmental molecular sequences? By D. Hibbett

**THE TIME IS RIGHT FOR MULTIPHOTON ENTANGLED STATES**
A chip-based microresonator enables time-bin entanglement By A. C. Peacock and M. J. Steel

**UNRAVELING A PATHWAY TO AUTISM**
A signaling pathway that controls protein synthesis may be a target for autism therapeutics By J. P. H. Burbach

**FEEDING ON PLASTIC**
A bacterium completely degrades poly(ethylene terephthalate) By U. T. Bornscheuer

**ON THE COVER**

Bullets fired from the same pistol by the Prince George's County Police Department, in Maryland, show similar but not identical markings—an example of the ambiguity that plagues much crime-scene evidence. The bullets were fired as part of a research effort to bring greater rigor to forensic analysis, conducted by the National Institute of Standards and Technology. See page 1128. For more on the process behind the cover image, see http://scim.ag/1LPKy4C.

RESEARCH

IN BRIEF
1162 From Science and other journals

RESEARCH ARTICLES
1165 BACTERIAL PILI
Architecture of the type IVa pilus machine Y.-W. Chang et al.
RESEARCH ARTICLE SUMMARY; FOR FULL TEXT: dx.doi.org/10.1126/science.aad2001

1166 HEART DISEASE
Rare variant in scavenger receptor BI raises HDL cholesterol and increases risk of coronary heart disease P. Zanoni et al.
▶ NEWS STORY P. 1126

1171 CHEMICAL PHYSICS
Wavelike charge density fluctuations and van der Waals interactions at the nanoscale A. Ambrosetti et al.

REPORTS
1176 QUANTUM OPTICS
Generation of multiphoton entangled quantum states by means of integrated frequency combs C. Reimer et al.
▶ PERSPECTIVE P. 1152

1180 SPIN MODELS
Simple universal models capture all classical spin physics G. De las Cuevas and T. S. Cubitt
▶ PERSPECTIVE P. 1156

1184 TOPOLOGICAL MATTER
Quasiparticle interference of the Fermi arcs and surface-bulk connectivity of a Weyl semimetal H. Inoue et al.

1188 ZEOLITES
Accelerated crystallization of zeolites via hydroxyl free radicals G. Feng et al.

1192 FUNGAL ENZYMES
Early-branching gut fungi possess a large, comprehensive array of biomass-degrading enzymes K. V. Solomon et al.

1196 BIODEGRADATION
A bacterium that degrades and assimilates poly(ethylene terephthalate) S. Yoshida et al.
▶ PERSPECTIVE P. 1154

1199 NEURODEVELOPMENT
CLK2 inhibition ameliorates autistic features associated with SHANK3 deficiency M. Bidinosti et al.
▶ PERSPECTIVE P. 1153; RESEARCH ARTICLE BY F. Y. Yi ET AL. 10.1126/science.aaf2669

1204 CANCER BIOLOGY
Schedule-dependent interaction between anticancer treatments S. Chen et al.

CANCER THERAPY
1208 Disordered methionine metabolism in MTAP/CDKN2A-deleted cancers leads to dependence on PRMT5 K. J. Mavrakis et al.

1214 MTAP deletion confers enhanced dependency on the PRMT5 arginine methyltransferase in cancer cells G. V. Kryukov et al.

1218 TRANSCRIPTION
Measurement of gene regulation in individual cells reveals rapid switching between promoter states L. A. Sepúlveda et al.
