Soda bottles for dinner

**CONTENTS**

11 MARCH 2016 • VOLUME 351 • ISSUE 6278

**NEWS**

**IN BRIEF**

1120 News at a glance

**IN DEPTH**

1122 MARS ORBITER TO SNIFF FOR METHANE
Mission aims to settle whether gas exists—and whether it could hint at life
*By E. Hand*

1123 EVIDENCE GROWS FOR ZIKA VIRUS AS PREGNANCY DANGER
Lab experiments and new clinical data suggest that fast-spreading virus attacks developing brain
*By G. Vogel*

1124 IN SEARCH OF SPACETIME MEGAWAVES
Timing in celestial radio beacons could reveal gravitational tsunamis
*By D. Clery*

1126 WHY HIGH ‘GOOD CHOLESTEROL’ CAN BE BAD NEWS
A faulty transport system sometimes causes high HDL
*By J. Couzin-Frankel*

**INSIGHTS**

**PERSPECTIVES**

1148 ENDING HIDE AND SEEK AT SEA
New technologies could revolutionize ocean observation
*By D. J. McCauley et al.*

1150 THE INVISIBLE DIMENSION OF FUNGAL DIVERSITY
Can microbial taxa be defined from environmental molecular sequences?
*By D. Hibbett*

1152 THE TIME IS RIGHT FOR MULTIPHOTON ENTANGLED STATES
A chip-based microresonator enables time-bin entanglement
*By A. C. Peacock and M. J. Steel*

**RESEARCH ARTICLE P. 1166**

1153 UNRAVELING A PATHWAY TO AUTISM
A signaling pathway that controls protein synthesis may be a target for autism therapeutics
*By J. P. H. Burbach*

**REPORT P. 1199; RESEARCH ARTICLE BY F. YI ET AL.**

1154 FEEDING ON PLASTIC
A bacterium completely degrades poly(ethylene terephthalate)
*By U. T. Bornscheuer*

**RESEARCH ARTICLE P. 1196**

**SPECIAL SECTION**

Forensics

**NEWS**

1128 Evidence on trial
*By M. Enserink*

1130 Sizing up the evidence
*By K. Servick*

1133 When DNA is lying
*By D. Starr*

1134 How hair can reveal a history
*By H. Armitage and N. Rogers*

1136 A trail of microbes
*By K. Kupferschmidt*

1138 Who dropped the bomb?
*By R. Stone*

1140 Whose voice is that?
*By N. Rogers*

1141 Clues from the ashes
*By L. Wade*

1143 The microbial death clock
*By K. Kupferschmidt*

1144 The Bitcoin busts
*By J. Bohannon*

▶ PODCAST

**ON THE COVER**

Bullets fired from the same pistol by the Prince George's County Police Department, in Maryland, show similar but not identical markings—an example of the ambiguity that plagues much crime-scene evidence. The bullets were fired as part of a research effort to bring greater rigor to forensic analysis, conducted by the National Institute of Standards and Technology. See page 1128. For more on the process behind the cover image, see http://scim.ag/1LPKy4C.

RARE VARIANT IN SCAVenger RECEPTOR BI RIsES HDL CHOLESTEROL AND INCREASES RISK OF CORONARY HEART DISEASE

By P. Zanoni et al.

PROTEIN MACHINES THAT MOVE BACTERIA

By S. Chen et al.

SCIENCE OF PATENTS

The complete science of patents

By X. Zhang

PHYSICAL REVIEW DIGEST

A guide to ongoing research

By A. Blum

MEDICAL PERSPECTIVES

A look at the medical profession

By T. D. Smith

EDITOR'S NOTE

Meeting of the minds

By R. B. Blumenthal

WEBCHARTS

A visual guide to the news

By J. R. Posselt, reviewed by F. C. Beilock

LETTERS

Letters to the editor

By J. Li et al.
