Research

150 Catalysis  
Thermally stable single-atom platinum-on-ceria catalysts via atom trapping  
J. Jones et al.

154 Animal Robotics  
Tail use improves performance on soft substrates in models of early vertebrate land locomotors  
B. McInroe et al.

158 Robotics  
Phototactic guidance of a tissue-engineered soft-robotic ray  
S.-J. Park et al.

163 Network Science  
Higher-order organization of complex networks  
A. R. Benson et al.

166 Plant Science  
S-Acylation of the cellulose synthase complex is essential for its plasma membrane localization  
M. Kumar et al.

169 Climate Change  
Climate-driven regime shift of a temperate marine ecosystem  
T. Wernberg et al.

172 Structural Biology  
Structural basis for membrane anchoring of HIV-1 envelope spike  
J. Dev et al.

176 Neurophysiology  
Cilia-based flow network in the brain ventricles  
R. Faubel et al.

179 Immunotherapy  
Reengineering chimeric antigen receptor T cells for targeted therapy of autoimmune disease  
C. T. Ellebrecht et al.

103 Editorial  
The communities of Science  
By Jeremy Berg

190 Working Life  
The questions that opened doors  
By Carlos Aguilarr-Trigueros

On the Cover  
A robotic stingray made up of rat heart cells, gold, and a polymer commonly used in breast implants. The robot ray mimics the form and function of a swimming stingray, but with a twist: Genetically altered rat cells allow the “creature” to sense and swim toward light. See pages 110 and 158. For more on the process behind the cover image, see http://scim.ag/29lfI5O.
