Institut de Recherches Servier

**Join us!**

We are looking for an experienced, entrepreneurial and passionate scientific leader to join our Neuropsychiatry department as the:

**NEUROPSYCHIATRY PROGRAM DIRECTOR**

This role is truly essential to lead and coordinate, with a clear industrial vision, our Research activities from the conception of promising new targets through the drug discovery phase to early clinical development.

Reporting directly to the Head of Neuropsychiatry R&D, you will be responsible for orchestrating our Proteinopathy programs for the treatment of neurodegenerative disorders.

Responsible for the strategic progression of the Research Projects Portfolio, you will offer your scientific insight both into in-house projects and into potential licensing-in opportunities.

“Collective Intelligence” is a critical pillar of future progress and, as Program Director, you will help build our future success by facilitating and structuring exchanges between the highly-engaged Project Directors, translational and clinical teams, experimental platforms and external collaborators.

**Major requirements:**
- Ph.D. in neuroscience
- 10 years research in an academic environment
- Previous experience in a pharmaceutical firm and/or in drug discovery
- Established reputation in the field of neurodegenerative disorders
- Specialist in the domain of Proteinopathies
- Collaboration-based mindset and excellent interpersonal skills
- Perfectly fluent in English - French would be a plus

**Joining Servier** means working in a stimulating environment and contributing to an innovative, research-based and people-oriented organization.

Servier is the leading French independent pharmaceutical company, located in 144 countries with 21,000 employees and a turnover in 2015 of about 4 billion euros.

25% of Servier’s annual turnover is reinvested in Research & Development, reflecting the company’s dedication to its mission of innovation and discovery for improved treatment of unmet medical needs.

Organized as a foundation, we guarantee our independence toward the stock exchange market. Our founder Doctor Jacques Servier used to say: “a company is a group of human beings, so it has no price”.

Servier is well known for staff care, with particular attention to career evolution within the Group, and to an agreeable and productive working environment.

Together with international experts, for over 30 years we have been investing in programs to improve the control of neuropsychiatric and neurodegenerative diseases like Alzheimer’s, Parkinson’s, multiple sclerosis and depression.

Our Research Center in Neuropsychiatry is located near Paris, in Croissy-sur-Seine, France.

To apply or to acquire more details concerning the position, please contact Geoffroy BELLET via isabelle.larivierre@servier.com - ref.965
10 ways that *Science* Careers can help advance your career

1. Register for a free online account on ScienceCareers.org.
2. Search thousands of job postings and find your perfect job.
3. Sign up to receive e-mail alerts about job postings that match your criteria.
4. Upload your resume into our database and connect with employers.
5. Watch one of our many webinars on different career topics such as job searching, networking, and more.
6. Download our career booklets, including Career Basics, Careers Beyond the Bench, and Developing Your Skills.
7. Complete an interactive, personalized career plan at “my IDP.”
8. Visit our Career Forum and get advice from career experts and your peers.
9. Research graduate program information and find a program right for you.
10. Read relevant career advice articles from our library of thousands.

Senior Faculty Leadership Position in Immunology at Fred Hutchinson Cancer Research Center

The Vaccine and Infectious Disease Division (VIDD) of the Fred Hutchinson Cancer Research Center seeks exceptional applicants for a full-time senior faculty leadership position in immunology at the Full Member rank (comparable to Professor). The primary responsibility of this position will be to develop and lead a comprehensive, cross-disciplinary integrated research center (IRC) involving multiple investigators that will focus on pathogen-induced cancers. The candidate will be expected to conduct laboratory-based translational immunology research as part of this IRC and within VIDD, and an emphasis on mechanisms of memory/effecter cell induction and immune dysfunction in the context of cancer or cancer-associated infections is highly desirable.

Candidates for this position must have a well established, robust, funded program that is nationally and internationally recognized for excellence in immunology, immunotherapeutic design, or viral oncogenesis.

Applicants must have an MD (or foreign equivalent) or PhD (or foreign equivalent). Selection criteria include excellence in scholarship, creativity in research, and demonstrated leadership in the profession.

VIDD scientists integrate clinical care, computational methods, and basic science research in immunology, virology, and vaccine design to reduce the global burden of infectious disease.

The Fred Hutchinson offers a vibrant intellectual environment within a beautiful, lakeside campus in Seattle’s South Lake Union biotech hub. VIDD occupies a new building that is connected by walking trails to Seattle Cancer Care Alliance and the other four Divisions of the Fred Hutch and by trolley to major research partners such as the University of Washington School of Medicine, Seattle Children’s Research Institute, Center for Infectious Disease Research (formerly Seattle Biomedical Research Institute), and the Infectious Disease Research Institute.

Interested candidates should submit a CV, a concise research plan statement, and the names and contact information for three (3) references to fredhutch.org/job/6653. Specific inquiries can be directed to Julie McElrath at 206-667-1858. Applications should be received by August 15, 2016 to assure consideration and will be evaluated as received.

The Fred Hutchinson Cancer Research Center is an Affirmative Action, Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to, among other things, race, religion, color, national origin, sex, age, status as protected veteran, or status as qualified individuals with disabilities. We strongly encourage applications from women, minorities, individuals with disabilities and covered veterans.
