Don’t believe the hype

1198 IN IRAN, A SHADY MARKET FOR PAPERS FLOURISHES
New law would tame the practice of selling theses and research articles—if enforced
By R. Stone

FEATURE
1198 WHATEVER HAPPENED TO ...
Celebrity molecules promised to transform our health, but haven’t always lived up to their billing
By M. Leslie

INSIGHTS

1202 PLATING UP SOLUTIONS
Can eating patterns be both healthier and more sustainable?
By T. Garnett

PERSPECTIVES
1204 DESIGNER NANOROD SYNTHESIS
Modified cellulose strands create versatile reactor compartments
By A. Houlton

1206 HARNESSING MUTATION: THE BEST OF TWO WORLDS
Combining vertebrate and bacterial immune system components enables targeted mutagenesis
By S. G. Conticello and C. Rada

1207 VACCINE TRUST AND THE LIMITS OF INFORMATION
Understanding trust in local contexts is key to communication about vaccination
By H. J. Larson

POLICY FORUM
1209 WILL LATEST U.S. LAW LEAD TO SUCCESSFUL SCHOOLS IN STEM?
Despite shortcomings, there is room for cautious optimism
By A. Gamoran

1211 A MISSED OPPORTUNITY FOR U.S. BIOTECHNOLOGY REGULATION
Policy options for change were not on the table
By J. Kuzma

Plant Translational Biology

INTRODUCTION
1218 The new harvest
P. J. Hines and J. Travis

NEWS
1220 The plant engineer
1225 The nitrogen fix

REVIEWS
1228 The plant lipidome in human and environmental health
P. J. Horn and C. Benning
1232 Plant metabolism, the diverse chemistry set of the future
E. T. Wurtzel and T. M. Kutchan
1237 Plant-produced biopharmaceuticals: A case of technical developments driving clinical deployment
G. P. Lomonossoff and M. A. D’Aoust
1241 The next green movement: Plant biology for the environment and sustainability
J. M. Jez et al.

ON THE COVER
Camelina sativa seeds (length: 2 to 3 millimeters) in their pods, floating in oil extracted from the seeds. This antioxidant-rich oil can become a source of heart-healthy omega-3 fatty acids. Research on Camelina and other plants is exploring the means to improve food quality, build sustainability, discover pharmaceuticals, and reduce the environmental impact of deriving specialty chemicals. For more on challenges and opportunities in plant translational biology, see page 1218.
