CONTENTS

NEWS

IN BRIEF
394 News at a glance

IN DEPTH
397 MARS LANDER CRASH ADDS TO 2020 ROVER WORRIES
European rover needs €300 million and uses parts like those on doomed Schiaparelli By D. Clery

398 BABY GENOME SCREENING NEEDS MORE TIME TO GESTATE
Unenthused parents and missed diseases mar pilot efforts By J. Kaiser

399 HUNT FOR PLANET NINE HEATS UP
Discovery of icy worlds in the distant solar system offers new clues in searches for hypothetical giant By A. Mann

401 CLIMATE SCIENTISTS OPEN UP THEIR BLACK BOXES TO SCRUTINY
Modelers becoming less hush-hush about tuning, the “secret sauce” that controls fine-scale processes By P. Voosen

402 DATA CHECK: HOW A FIGURE THAT DROVE HFC DEAL WAS BORN
Small group of researchers examined how much warming HFC controls could avert By W. Cornwall

403 Q&A: MENTAL HEALTH CHIEF OUTLINES PRIORITIES
Joshua Gordon juggles early criticism that NIMH tipped too far toward basic science By M. Waldman

FEATURES

404 PUSHING THE LIMIT
By culturing human embryos for longer than ever, Magdalena Zernicka-Goetz is revealing their “powerful beauty”—and sparking debate By G. Vogel

408 AFTER THE FALL
Some scientists debarred for research misconduct remain on the faculty. How that happens may surprise you By J. Mervis

410 Name that offender? It depends
By J. Mervis

INSIGHTS

PERSPECTIVES

412 THE FOURTH DIMENSION OF VEGETATION
100 years ago, Lennart von Post first used pollen analysis to reconstruct past ecosystems By H. J. Birks et al.

414 THE ROAD TO SPECIATION RUNS BOTH WAYS
Chimpanzees and bonobos show signs of ancestral gene exchange, providing insight into the dynamics of speciation By A. R. Hoelzel

415 A FINER LOOK AT A FINE CELLULAR MESHWORK
The endoplasmic reticulum is imaged at super-resolution By M. Terasaki

416 VERSATILE CLUSTER ENTANGLED LIGHT
Dark excitons are used to entangle strings of hundreds of photons for quantum information processing By H. J. Briegel

418 PUTTING THE SPOTLIGHT ON ORGANIC SULFUR
Diverse dissolved organic sulfur compounds play an active role in ocean biogeochemistry By N. M. Levine

419 WARBURG MEETS EPIGENETICS
Glycolysis promotes T cell function by an epigenetic mechanism By C. H. Patel and J. D. Powell

421 MAKING CLIMATE SCIENCE MORE RELEVANT
Better indicators for risk management are needed after Paris By C. F. Kennel et al.

423 STRIKING THE RIGHT CHORD
A wide-ranging treatise seeks to reshape cities with an eye toward equality and resilience By S. D. Campbell

424 IS ANYONE OUT THERE?
A witty romp through the cosmos explores the scientific search for intelligent alien life By M. Huerta

LETTERS

425 SAVE THE WORLD’S PRIMATES IN PERIL
By B. Yang et al.

425 ADAPTING CHINESE CITIES TO CLIMATE CHANGE
By Q. Fang

426 ONLINE BUZZ: AUTONOMOUS VEHICLES

Published by AAAS
